MR. BROWN ASKS EXPLANATION OF TAX INEQUALITIES
F. B. News Editorial on Income Tax

It seems like double taxation and is the statement in regard to real other states and why haven't some of the other 65% and pay to turn the light on in full.

Let's Neither Be Rock Ribbed Nor Hide Bound This Election

ATTENTION—MR. FARMER
Is Your Soil Acid?

CIDE SOILS will not grow alfalfa.
Agricultural Limestone is the only remedy. It corrects soil acidity and makes alfalfa a sure crop.

LIMESTONE is the Replica to the Profitable Raining of Beets.

The Michigan Farm Bureau News Lauded the Dairy Cow's Efficiency and Topped That of Pig, Hen

Dairy Cow's Efficiency

The dairy cow is usually a valuable animal. The fact that she is a good producer is her main value. Her capacity to produce milk, butter, cheese, and other dairy products makes her a valuable addition to the farm.

Topped That of Pig, Hen

The pig and hen are also valuable animals. The pig is a good producer of meat, while the hen is a good producer of eggs.

Menemence Co. Farmers, town of Menominé,
Washington, October 16.—Contrary to popular belief, the demand for information reported by the Farm Bureau is said to be on the increase. Last year, the Farm Bureau reported a decrease of 78,000 in the number of inquiries compared with the previous year. This year, the bureau reports a substantial increase in the number of inquiries. The bureau attributes the increase in inquiries to the growing interest of farmers in improving their farms and increasing their crops.

The bureau also reports that the demand for information is more specific and detailed than in previous years. Farmers are seeking information on a wide range of topics, including crop production, livestock management, and marketing.

The bureau concludes that the increase in the demand for information is a positive sign of the growing interest of farmers in improving their farms and increasing their crops. The bureau encourages farmers to continue their education and to seek information to help them achieve their goals.
