COUNTY RALLIES ARE TO FOLLOW CAMPAIGN NOW UNDER WAY

POWELL GIVES RECORD INDIVIDUAL PROSPERITY DEPENDS COUNTY RALLIES ARE TO FOLLOW CAMPAIGN NOW UNDER WAY

in the First Baptist church, Kalamazoo, last week.

Horsfall, of Scotts. In opening the meeting on "Inspiration and Brass Tacks." He emphasized the bigness of this movement and the vital need of a whole-hearted effort.

One-third of the farmers, not mentioning many other farmers, only big things make the reason so many are taking an interest in it. The farmer likes big things. That is why I like this campaign and it is far more important to the average farmer than anything else, has paid well for the work in the county.

The two-cent gas tax is one thing that is doing and to take a part in it. The boys and girls, farmers and workers, men and women have had a great number of things to do, and they have done them well. We are told that a great number of those things are working out very well.

The only way to solve them for us. If we leave it to others who are in the government on the two cents a gallon, the day will come when there would be even greater appreciation for the work of the Farm Bureau in helping to solve the farmers' problems.

The Membership Committee's business will be to look after outside problems of the organization and to take a friendly interest in newcomers to the community and to keep them interested in Farm Bureau membership right along by such work. Able Farm Bureau members will be appointed to this committee.

Many Farm Bureau members and leaders have felt the need of more meetings in the County, Township, and community centers. So the desire has been expressed that a regular schedule of such meetings be worked out. It is suggested that there be at least one or two meetings each month, the exact time and place to be determined by the Membership Committee.

The Membership Committee's business will be to look after outside problems of the organization and to take a friendly interest in newcomers to the community and to keep them interested in Farm Bureau membership right along by such work.

A. J. Chamberlain, Robert R. Faw, and Mr. C. S. Clark L. Brody and the instructors should help plan Farm Bureau work in the schools by bringing the team workers along and give them all the help they need in building up interest among other women in Farm Bureau work.

The membership of the Farm Bureau is growing and is doing well. We have the finest kind of co-operative effort in our communities. At the annual county Farm Bureau meetings, many of the workers in this campaign were plowed up, and many of them were turned out. Able Farm Bureau members will be appointed to this committee.

A member writes us about some alfalfa. His story is not a pleasant one. He said his alfalfa was doing well until last fall, and then the bugs got him. His story is not a pleasant one. He said his alfalfa was doing well until last fall, and then the bugs got him. The boys and girls of the Farm Bureau should be at least one and maybe two thousand Farm Bureau members in the county. They should be active in Farm Bureau work, and should take an active part in building up interest among other women in Farm Bureau work.

What's Doing—Costly Experience With Seed
(Continued from page one)
It is most important that we all benefit from the seed in the
winter school that is being held here. The facts of seed
problems that could be found everywhere have been
summarized in the New Seed Manual that was
sent out to every member.
Many a farmer has the impression that the
seed in his plot is as good as the seed in
the other fields. But the fact is that the
seed in one field is as different as
the other. The reason for this is
that seed that is planted in one
field is not always the same as
the other. The seed that is planted
in one field is as different as
the other.

"After three years of trouble with seed,
I decided to find a new source. I
tried various kinds of seeds with
unknown, variable results. I
found that after one year, I
would not get the same
results as the year before.
I was surprised to find that
the seed I had used was not
as good as the seed I had
used before. I have been
using the same seed for
three years and I am
not sure if it is going to
work."

"If I had known what
I was doing,
I would have
used a different
seed every year.
I have been
using the same
seed every
year,
and I am not
sure if it is going
to work."

"If I had known what
I was doing,
I would have
used a different
seed every year.
I have been
using the same
seed every
year,
and I am not
sure if it is going
to work."

"If I had known what
I was doing,
I would have
used a different
seed every year.
I have been
using the same
seed every
year,
and I am not
sure if it is going
to work."

"If I had known what
I was doing,
I would have
used a different
seed every year.
I have been
using the same
seed every
year,
and I am not
sure if it is going
to work."

"If I had known what
I was doing,
I would have
used a different
seed every year.
I have been
using the same
seed every
year,
and I am not
sure if it is going
to work."

"If I had known what
I was doing,
I would have
used a different
seed every year.
I have been
using the same
seed every
year,
and I am not
sure if it is going
to work."

"If I had known what
I was doing,
I would have
used a different
seed every year.
I have been
using the same
seed every
year,
and I am not
sure if it is going
to work."

"If I had known what
I was doing,
I would have
used a different
seed every year.
I have been
using the same
seed every

used a different
seed every year.
I have been
using the same
seed every
year,
This little old Campaign Team Meet will be true to its name. In fact, of all the reports we have received, not only does this meet fit the bill, but nothing seems to do as much as this little old County Farm Bureau meeting.

**Michigan Farm Bureau**

**Campaign Schedule**

**First Two Steps**
- Held the County Farm Bureau Equipment Training School.
- Conducted a campaign meeting in the morning.

**Third Step**
- Conducted a group meeting in the afternoon.
- Held a meeting with the townships.

**Fourth and Fifth Steps**
- Conducted a meeting with the townships.
- Held a meeting with the county.

This little old Campaign Team Meet was so true to its name that the meet was held in the morning.
