SHIPPERS WIN BIG VICTORY IN MICHIGAN ZONE RATE CASE

These Maps Show How the Michigan Zone Freight Rate Case Victory Benefits You

What's Doing
Self Help Peasant Farmers?

The farmer won’t be in control of his own affairs until he has an equal opportunity with other business men. The American Farm Bureau Federation, the leading organization of the nation’s farmers, is working for this end. The Bureau is represented in 48 states, the District of Columbia, the Virgin Islands and Puerto Rico, by 500,000 county Farm Bureaus and thousands of local groups.

The Breakfast Club, a Farm Bureau activity, is growing in membership and activity. The Farm Bureau also has a wide range of activities and programs to help farmers.

The history of the Farm Bureau in Michigan begins with the passage of the Michigan Farm Bureau Act of 1925. Since then, the Farm Bureau has played a key role in the state's agricultural development.

The Farm Bureau has been involved in a number of important cases, including the case on page 27. The case involved the Farm Bureau's efforts to obtain fair rates for Michigan farmers and their cooperatives. The case was significant because it was the first case in which the Farm Bureau successfully convinced the Interstate Commerce Commission to lower zone rates.

In the case, the Farm Bureau argued that the zone rates were too high and that they were unfairly discriminating against Michigan farmers. The Farm Bureau presented evidence showing that the zone rates were substantially higher than the rates charged to other states.

The Farm Bureau also presented evidence showing that the zone rates were higher than the rates charged for similar goods in other states. The Farm Bureau argued that this was evidence that the zone rates were being used to discriminate against Michigan farmers.

After considering the evidence, the Interstate Commerce Commission granted the Farm Bureau's request and lowered the zone rates. This decision was significant because it was the first time that the Farm Bureau had been able to convince the Interstate Commerce Commission to lower zone rates.

The Farm Bureau's success in this case came as a result of the Farm Bureau's efforts to establish a cooperative organization for Michigan farmers. The Farm Bureau had been working for several years to establish a cooperative organization for Michigan farmers, and this case was a significant step toward achieving this goal.

The Farm Bureau's success in this case also came as a result of the Farm Bureau's efforts to build a strong agricultural organization in Michigan. The Farm Bureau had been working for several years to build a strong agricultural organization in Michigan, and this case was a significant step toward achieving this goal.

The Farm Bureau's success in this case came as a result of the Farm Bureau's efforts to establish a cooperative organization for Michigan farmers. FARM BUREAU DID NOT EXIST WHEN STATE WAS ZONED

Fowlerville Coop Ships 20,829 Head of Stock

Fowlerville, June 12.—Two hundred and eighty-seven members of the Fowlerville Cooperative Association, consisting of 52 farms, 102 stockyards, 38 feed stores, and 11 stockyards, shipped 20,829 head of stock on the state and federal livestock markets, which is a record in this locality for the month of June.

In recent years, the cooperative movement has made great strides in the state, and the Fowlerville Cooperative Association is one of the leaders in this movement. The association has been successful in building a strong organization and in obtaining fair prices for its members.

The success of the Fowlerville Cooperative Association has been due in large part to the efforts of the Farm Bureau, which has been working for several years to establish a strong cooperative organization in Michigan.

The Farm Bureau has been successful in its efforts to establish a strong cooperative organization in Michigan, and this case is a significant step toward achieving this goal.

In this case, the Farm Bureau has been able to convince the Interstate Commerce Commission to lower zone rates. This decision was significant because it was the first time that the Farm Bureau had been able to convince the Interstate Commerce Commission to lower zone rates.

Farmers Win Two Great Public Reforms in 1925

Casualty Tax and Zone Rate Case Touched Each Lasted 4 Yea.

Those who drive on our roads are accustomed to the notion of a two-cent-per-gallon tax on gasoline. It is a tax on which the state government is the only benefactor. It is a tax that the average merchant can talk about, but it is not a tax that the average consumer can see.

The system of taxing gasoline was set up in 1922, as an attempt to check the weight of phaeton drivers. It has just been passed. In a substantial way, it will begin to be seen in the states and in the territories. It is a tax on the new gas and the old gas. It will be increased gradually until it becomes more and more a tax on the new and less a tax on the old. It will be lowered gradually until it becomes more and more a tax on the old and less a tax on the new.

These are two great public enterprises, which are described in detail in the Michigan Public Utilities Commission report of 1925.

The report of the farm bureau members was based on the following facts:

1. The members of the farm bureau were not confronted by higher rates and better service than the consumers who were not members of the farm bureau.

2. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

3. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

4. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

5. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

6. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

7. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

8. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

9. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

10. The members of the farm bureau were not confronted by the same conditions as the consumers who were not members of the farm bureau.

Co. Farm Bureaus Are Doing Surprising Things

Mrs. Wagner Has Traveled Many Miles And Tells Us About This Work

By his. EVEREST M. WAGNER

Chairman, Farm Bureau District 6

"What sort of a program do you have in your district?" was a question put to me of some of the leaders of the County Farm Bureaus recently. I was able to answer quite fully because our county is carrying out a program in which we are cutting right along. It is to have our farmers prepare good, fine feeder stock which we hope will be brought to the county fair and sold for a profit. We have been able to do this through the cooperation of the local farm bureaus, the state bureau, and the state department of agriculture.

A Vocational Committee

Another section has a vocational program which many people in the county feel is not only important but also profitable. This section is carried out by a group of people known as "The Young Farmers' Vocational Committee." They work in close cooperation with the local farm bureaus and the state bureau. This group is doing a splendid job of training farmers to better care for their animals. They are also working to improve the quality of the animals being raised. They are getting new breeds introduced, new feeds experimented with, and new methods of management tried. They are making great progress.

M. W. LARKIN

Chairman, Farm Bureau District 6

Mr. LARKIN SHOWS WHAT BECOMES OF OUR POOLED WOOL

Use Made of Wool Depends Upon Length and Fineness of Staple

Determining the purpose with which wool is to be used calls for an exact knowledge of the staple. Wool is not one thing but many. It is composed of fibers of varying lengths and degrees of fineness. The staple length and fineness of wool determine the uses to which it can be put. The staple length and fineness of wool determine the uses to which it can be put. The staple length and fineness of wool determine the uses to which it can be put.

Wools are classified according to length. Those wool over 2 inches in length are classified as "long" wools, those 1-2 inches in length as "medium" wools, and those under 1 inch in length as "short" wools. The staple length of wool determines the kind of clothing in which it can be used. Long wools are best suited for worsted fabrics, medium wools for worsted fabrics, and short wools for worsted fabrics.

Wools are also classified according to fineness. The fineness of wool is determined by the number of fibers per inch. The finer the wool, the greater the number of fibers per inch. The fineness of wool determines the kind of clothing in which it can be used. Fine wools are best suited for worsted fabrics, medium wools for worsted fabrics, and coarse wools for worsted fabrics.

Kalamazoo Gazette Solid For Farm Bur. Program

Compared Business and Labor
Development With Farm Opportunities

The Kalamazoo County Farm Bureau held its annual meeting at the First Baptist Church in Friday afternoon. Num- ber one of the resolutions adopted was one that dared to tell the story of the county's economic development.

W. S. Hartley

WHEN FARMERS GET TOGETHER

In his address to farmers and laborers in Kalamazoo County, Mr. W. S. Hartley, who is employed by the county farm bureau, said:

"The problems of agriculture and industry, and labor, in every instance, front in the same direction. They are inter-related, and the problems of the one affect the other. The problems of the former are the cause of the problems of the latter, and the problems of the latter are the cause of the problems of the former. Therefore, it is upon the efforts of the farmers and laborers that the future of the county depends.

THE DEAN

"The problems of agriculture and industry, and labor, in every instance, front in the same direction. They are inter-related, and the problems of the one affect the other. The problems of the former are the cause of the problems of the latter, and the problems of the latter are the cause of the problems of the former. Therefore, it is upon the efforts of the farmers and laborers that the future of the county depends.

MILKMAKER'S PUBLIC FORMULA

The Truth in Feeds

The Key to Economical Milk Production

The key to the best results in milk production is a properly balanced, highly digestible ration of the proteins found in milk and the correct proteins needed for the upkeep of the cow herself.

The current proteins must be furnished in a form which the cow can utilize directly. A cow can't build up these necessary proteins from general food materials except in a very limited extent.

Michigan Milkman, 10%: protein, fully meets the cow's protein requirements with six milk making ingredients. They contain the necessary variety of proteins is highly desirable, nutrient value. These proteins are not be found in any single high protein concentrate, such as corn gluten meal. The proteins are as varied and quite highly balanced that the ration will never injure a cow. You have some sort of enjoyment during overfed, malted mash, etc. This will not happen with Milkman.

Farmers know in feeding Milkman that they have no "filler" or second rate ingredients of any kind to hold down their production. They have witnessed some remarkable results with the past.

Milkman is made up from the milk producer's view- point—to increase production, lower feeding costs, and maintain healthy, vigorous, luscious milk. Milkman is the best feed you can give a dairy cow.
