MANY MEMBERS TO HEAR PRESIDENT COOLIDGE ADDRESS AMERICAN FARM BUR. IN ANNUAL MEETING AT CHICAGO

Farm Bureau Officers Assuring Every Member Attending Dec. 7-9 Sessions Seat to Hear The President; Secretary Jardine, Other Leaders to Be There

Chicago, Oct. 15—For the seventh time the organized agriculture of America will assemble to outline its policies and develop plans for the expansion of its industry.

Registration will be the Seventh, Annual Meeting of the American Farm Bureau Federation, which will be held at the Sherman Hotel in Chicago, December 7, 8, and 9.

At this meeting some 2,000 delegates, representing 1,800 county Farm Bureaus and the 45 state Farm Bureau federations, will assemble to consider agricultural legislation, taxation, transportation and many other problems afflicting America's $30,000,000,000 dollar industry-agriculture.

The importance and significance of this meeting is attested to the acceptance of Calvin Coolidge, President of the United States, of an invitation to attend and address this gathering.

Among other distinguished guests will be Wilbur F. Jardine, Secretary of Agriculture, who will also address the Farm Bureau meeting.

Convention Hall Seats 4,500

The sessions of the A. F. B. F. annual meeting will be held in the new hall-room of the Sherman hotel. All general and sectional meetings are planned to be held in the new twenty-story section which has been leased, which will make the Sherman House in the hall-room, where the general sessions will be held, the largest meeting place in the city. It is from this hall-room that great and important meetings of the Farm Bureau movement have been held. The Farm Bureau folks will have first choice.

At the time of the annual meeting of the A. F. B. F. there will be installed some of the finest equipment in the world, which will make the voice of the speaker distinct and clear for everyone—not only to the 2,000 in the main hall room but to all others in different auditories.

Members Come First

Farm Bureaus always make arrangements which are being made for the annual meeting, particularly emphasizing the fact that the first thought should be for the Farm Bureau members, either delegates or visitors attending the meeting. The Farm Bureau folks will have first choice, and every Farm Bureau member attending is assured by all the Farm Bureau folks and by the members of the meeting. The Farm Bureau folks will have first choice. They can hear and see President Coolidge when he addresses the delegates.

Special Railroad Rates

Arrangements are being made to secure special railroad rates for all delegates attending the convention. These arrangements have already been completed which will insure Farm Bureau delegates having a certain amount of service and saving, to the extent of $3.00 a person. Details of these arrangements and instructions for obtaining the best possible service and saving will be announced through the columns of the News Letter from week to week up until the time of the convention.

The railroads will be watching over the Michigan Farm Bureau meeting, and in this year's annual convention of the A. F. B. F. it is contemplated to broadcast all of the most important features of each session of the convention from two or three high-powered broadcasting stations. The address by President Coolidge will be broadcast from stations covering the entire United States.

Arrange Program

A high-powered panel of speakers will add to the program which will make the meeting one of the most successful ever held. The convention will be held (for convenience of editors, kinship and community, and alike) throughout the entire East and West. The purpose of the convention is to entertain and instruct.

The efficiency of officers in this convention will be left to the director of meetings, who will have the best of everything for the delegates and visitors to hear and see. The Michigan Farm Bureau president will be present at all times.

President Beltz to Be There

The eighth annual meeting of the Farm Bureau will be held in the new hall-room of the Sherman hotel, and this meeting will be held (for convenience of editors, kinship and community, and alike) throughout the entire East and West. The purpose of the convention is to entertain and instruct.

The efficiency of officers in this convention will be left to the director of meetings, who will have the best of everything for the delegates and visitors to hear and see. The Michigan Farm Bureau president will be present at all times.

Important Changes

The Farm Bureau members are going to make some changes which will be important for a number of reasons. The first is that the Farm Bureau has been organized, and the purpose is to entertain and instruct. The second is that the Farm Bureau has been organized, and the purpose is to entertain and instruct. The third is that the Farm Bureau has been organized, and the purpose is to entertain and instruct. The fourth is that the Farm Bureau has been organized, and the purpose is to entertain and instruct.

In other words, the changes are in order, and the Farm Bureau members will be entertained and instructed.

FINANCING THE FARM ON A BUSINESS BASIS

Charles Stimson, a New York State farmer about 54 years of age, lived in a small agricultural community that has already made a grade in the economic mainstream. The school and the church are especially well taken care of, and farmers that live in that sort take a considerable pride in supporting community movements.

There were three children in this family, a two and boy and a girl. The boy and girl were made up of those schools which would fit them for carrying on a useful livelihood. Both boys are at the University of Michigan. The girl has just graduated from an agricultural school, and she has been married and is keeping a 10-room house located on one of the farms. Mr. Stimson has been the head of the farm since before the war.

Concerning the future of the oldest boy from the agricultural school, new ideas were brought into operation of the farm, and new techniques were made up of those schools which would fit them for carrying on a useful livelihood. Both boys are at the University of Michigan. The girl has just graduated from an agricultural school, and she has been married and is keeping a 10-room house located on one of the farms. Mr. Stimson has been the head of the farm since before the war.

Considerable attention was also given to a change in the crop production system on the farm. In the past, a great deal of emphasis was placed on growing corn, beans, and potatoes, and a short move was made in growing certified sweet potatoes, and it is treated as a cash crop. The planting of a considerable number of cherries and plum trees, and some small fruit. These changes in operations will add considerably to the income of the farm, as previously this had been a very high yielding crop.

In order to bring all of these debts into one place, so that this committee can see how the money is being disposed of, a committee was appointed to the Agricultural and Industrial Research Board to study the problem of small loans. The step to be taken was the making of a study of the question of small loans, and the committee was given the responsibility of determining what are the most important questions that are to be answered.

One of the questions that the committee has been asked to answer is this: "What new ideas are being brought into operation of the farm, and new techniques are being developed?" A great deal of emphasis has been placed on growing corn, beans, and potatoes, and a short move was made in growing certified sweet potatoes, and it is treated as a cash crop. The planting of a considerable number of cherries and plum trees, and some small fruit. These changes in operations will add considerably to the income of the farm, as previously this had been a very high yielding crop.

Pries, Noon and Mrs. Wagner attended Conference at 9 a.m. October 11 1921 and release of the man-made adhesives, which is not the case. The electric power company will also have to be consid-

MINNESOTA ON THE MAYFLOWER

In the history of the early settlers of this country, the Mayflower was an important event. It was the first ship that brought English colonists to the New World, and it is considered a symbol of the beginning of American democracy. The Mayflower set sail from England on September 6, 1620, and arrived at Cape Cod on November 11, 1620. The ship was owned by a group of merchants, and it was financed by investors who hoped to profit from the new settlement.

WRITERS PRAISE, NOON WAT ANOT HEARDC In Chicago

Michael was the most popular name among the writers who lived in the city. He was a famous painter and sculptor who lived from 1876 to 1956. He was known for his abstract and surreal works, which were characterized by their use of color and form to create a sense of movement and energy. Michael's art was influential in the development of modern art, and it continues to be respected and admired today.

NEARLY 18 MILLION CARS BEING DRIVEN

Nearly 18 million cars are being driven on roads today. The number of cars on the road has increased steadily over the past few decades, and it is now estimated that there are more cars on the road than ever before. The increase in the number of cars on the road has led to a number of problems, including traffic congestion, air pollution, and accidents.

LOOK AT THE MAP AFTER READING THIS

Everyone knows the large map of the country. The United States is divided into states, and each state is further divided into counties. The map is useful for understanding the geography of the country, and it can be used to locate cities, towns, and other features of interest. The map is also useful for understanding the political boundaries of the country, and it can be used to identify the states and counties that make up the United States.

HARDS OFF CO-OP MARKETING IS CRY OF DAIRY FARMERS

Take Some Stand as Michigan Farm Bureau Against

The Ohio State University's State Farm Bureau is changing its position on the issue of cooperative marketing of dairy products. The University is now calling for a "hands off" approach to marketing, which would allow dairy farmers to make their own decisions about how to sell their products. The University is also calling for a "hands off" approach to marketing, which would allow dairy farmers to make their own decisions about how to sell their products. Two Instances Show How Milk Buyers Quit Protections Its Farmers

GUARANTEES ALL SALES

As a Gives Members Both
Sales and Financial

Forcibly

During the last two months the Michigan Cooperative creamery at Detroit, Mich., has been a thorn in the side of the milk buyers. The farmers in that district have demanded a contract that would pay them at least the cost of production plus 25 per cent. This would mean that the farmers would get from 8 to 10 cents per gallon for their milk, whereas last year they got from 3 to 4 cents.

In case of refusal to make this contract, the farmers were to sell their milk to other creameries in the state or to other states. The creamery was at a loss for what to do. It was not willing to accept a loss of 25 per cent, and it was not willing to refuse the farmers their demand of 25 per cent. The milk buyers were also in a loss. They were willing to pay for the milk, but they were not willing to pay the farmers what they considered to be an unfair price. The two parties met and agreed to work out a compromise.

The compromise was as follows: The farmers would sell their milk to the creamery, and the creamery would pay them 25 per cent above the cost of production. This would mean that the farmers would get from 8 to 10 cents per gallon, and the creamery would pay from 8 to 10 cents per gallon. The compromise was accepted by both parties, and the farmers are now selling their milk to the creamery.

New Contract

The new contract is to be carried out for a period of one year. The farmers are to receive 25 per cent above the cost of production, and the creamery is to pay 25 per cent above the cost of production. This contract is to be in force for one year, and it is to be renewed for another year if both parties agree.
