MICHIGAN FARM BUREAU BUREAU NEWS

Shiawassee, Geneseo, Lapeer in Farm Bureau Dist. No. 1

FORTH YEAR, Vol. IV, No. 1

JANUARY 4, 1925

ISSUED SEMI-MONTHLY

Our Program is directed toward the better live of Michigan Agriculture

A new development of the Michigan State Farm Bureau which is one of the greatest and most far-reaching moves the organization has ever made. The Farm Bureau Board of Directors, at its meeting in Washington, D.C., January 12, 1926, in a special session, adopted the plan by which the Farm Bureau, through its delegates, will take an active part in local, state, and national legislative matters. This plan of action is the result of several years' work in developing a program for the Farm Bureau to become an active participant in the legislative problems of the country.

The purpose of the Plan is to secure for the Farm Bureau members a larger voice in the legislation which affects their interests. The Plan provides for the appointment of Farm Bureau representatives to serve on legislative committees, to act as agents of the Farm Bureau in the Congress and state legislatures, and to give advice and information to Farm Bureau members on matters of legislation.

The Plan also provides for the appointment of Farm Bureau representatives to serve on legislative committees in the Congress and state legislatures, to act as agents of the Farm Bureau in matters of legislation, and to give advice and information to Farm Bureau members on matters of legislation.

The Plan also provides for the appointment of Farm Bureau representatives to serve on legislative committees in the Congress and state legislatures, to act as agents of the Farm Bureau in matters of legislation, and to give advice and information to Farm Bureau members on matters of legislation.
The Michigan State Farm Bureau has also completed its sixth consecutive year. The Bureau has been active in the legislature, our program of human advancement, our educational work in the schools, our cooperative marketing and our research activities. We have been working hard to help and encourage every farmer to take an active part in our organization. We have been trying to make our organization as strong as possible, so that we can continue to carry on our work in the future.

Mrs. Wagor Speaks of Farm Bureau Women's Work in '26

With these thoughts in mind I would like to close by saying that unless the members of the Farm Bureau work to make it strong, our organization can be made to live many years unless the member is taught what you think could be done with it.

Michigan Farm Bureau Federation.

The above statement is to be taken in the true spirit of human thought and action. It is our aim to be progressive in every thought and action, and to move forward with the times. We must be ready to meet the problems of the future with the same energy and drive that we have demonstrated in the past. The time for a broad program is here.

Sen. Ferris Interested in Farmers’ Welfare

The Michigan Farm Bureau is doing a great deal of work to help the farmers of this state. We are working to make the Farm Bureau a strong and efficient organization that will be able to carry on the work of the past for many years to come.

The Farm Bureau is the channel of expression of the farmers of this state. We are working to make sure that the farmers have a voice in the councils of the state and that their interests are represented.

The Michigan State Farm Bureau has been working hard to make the Farm Bureau a success. We have been trying to make sure that the farmers have a voice in the councils of the state and that their interests are represented.

THE STATE FARM BUREAU'S PUBLIC SERVICE PROGRAM

We are working hard to make the Farm Bureau a success. We are working to make sure that the farmers have a voice in the councils of the state and that their interests are represented.

7 Ships Bring 3,000,000 Lbs. of French Clover Seed to U.S.

MORE THAN HALF TO MIDWEST; SOME FOR BATTLE CREEK

Soon Enough French Seed Here to Plant

Soon enough French Clover Seed will be here to plant. Companies purchasing early this year are in a position to plant their seed this fall, and the Bureau is now receiving orders from producers interested in the cultivation of French clover for forage, hay, and seed crops, and also for the production of the new seed crop. The Bureau is now in a position to supply the entire seed crop of 1925, which will be available for planting in the spring of 1926.

The French clover seed is being imported from France through the Bureau's branch at Philadelphia and the Chicago branch of the American Farm Bureau Federation. The seed is being shipped in wooden cases, each case containing 250 lbs. of seed, and is being shipped by rail and boat to various points in the United States, including the Midwest, where it is expected that the majority of the seed will be used.

BUREAU CONTINUES FIGHT ON FREIGHT RATE INCREASES

Michigan State Farm Bureau's Toledo Office
By Monroe Keiser

A. F. F. LEADS BATTLE

Proposed Rate Boost Would Cost Each Farmer $25

The latest iteration of the Interstate Commerce Commission's (ICC) fight against a proposed railroad rate increase was highlighted recently in a meeting held in Toledo. The ICC, on the basis of its findings, has recommended an approval of the railroad rate increase. This conclusion was arrived at after a careful examination of the facts surrounding the case. The ICC held a hearing to consider the matter, and the testimony presented at the hearing was then considered by the ICC in reaching its decision. The ICC found that the railroad companies had a legitimate need for the rate increase, and that the proposed increase was not excessive. The ICC also found that the railroad companies had acted in good faith and had not engaged in any unjust or discriminatory practices. The ICC's decision was based on a careful review of the evidence presented at the hearing. The ICC's decision was a significant victory for the railroad companies, who had been fighting for years to secure a rate increase. The ICC's decision also had implications for other industries, as it set a precedent for dealing with similar cases in the future. It is hoped that this decision will serve as a reminder to all industries that they must act in good faith and follow the rules when seeking to increase rates. The railroad companies have not been idle during this period, and they have been taking steps to improve their service and efficiency. The ICC's decision is a welcome development, and it is hoped that it will lead to improvements in the rail industry.
