TWO COUNTY FARM BUREAUS PASS THEIR OLD MEMBERSHIP MARK

The Farm Bureau conference will cover the whole range of issues, from the state level to the local level, to ensure that the organization is well represented in all areas. The Michigan Farm Bureau has arranged for a special edition for the conference, and women will attend the sessions there will be plenty of input from women. The conference will be held at State College, and the focus will be on the needs and concerns of farmers. The theme of the conference is "Women in Agriculture: Opportunities and Challenges." The conference will feature keynote speakers, panel discussions, and workshops on topics such as sustainability, policy, and leadership.

CLINTON AND OCEANA ARE FIRST TO GO OVER TOP; MEMBERSHIP EFFORT IS GOING GOOD THROUGHOUT STATE

Kent, Sanilac, Huron, Berrien, Tuscola Counties. The June 2 edition of the Michigan Farm Bureau News finds the 30 County Farm Bureau membership campaign standing at 2,511 members. Clinton and Oceana counties have been the first to go over the top, with 1,400 and 1,300 members, respectively. All counties are working hard to maintain their membership levels and to increase their membership efforts. The campaign is still in its early stages, and the goal is to reach 2,500 members by the end of the year. The Michigan Farm Bureau is encouraging all members to get involved and to work towards achieving this goal. The organization is committed to providing support and resources to help counties achieve their membership goals.

Ibuked Attempt to Create

This is a story of a group of citizen growers who were determined to do something about the growing of their own welfare. They were tired of the idea that they could not control their own affairs, and that they were at the mercy of others. They wanted to do something about the crops they grew, and to make sure that they could be sold at a price that was fair for all.

They decided to form a cooperative, and to work together to sell their produce. They knew that this would not be easy, and that there would be many challenges along the way. But they were determined to do it, and to make sure that they were successful.

They knew that they would need to be organized, and that they would need to have a plan. They talked things over, and came up with a plan that they thought would work. They knew that they would need to have a leader, and that they would need to have a way to get things done.

They decided to elect officers, and to set up a system of voting. They knew that they would need to have a way to communicate, and that they would need to have a way to make decisions. They decided to have regular meetings, and to have a way to keep track of what was going on.

They knew that they would need to have a way to get their message out, and that they would need to have a way to get their produce to market. They decided to have a system of advertising, and to have a way to get their produce to the people who would buy it.

They knew that they would need to have a way to handle the finances, and that they would need to have a way to keep track of the money. They decided to have a system of bookkeeping, and to have a way to keep track of the money that was coming in and going out.

They knew that they would need to have a way to handle the legal affairs, and that they would need to have a way to handle the taxes. They decided to have a system of legal advice, and to have a way to handle the taxes.

They knew that they would need to have a way to handle the personnel, and that they would need to have a way to handle the workers. They decided to have a system of personnel management, and to have a way to handle the workers.

They knew that they would need to have a way to handle the equipment, and that they would need to have a way to handle the machinery. They decided to have a system of equipment management, and to have a way to handle the machinery.

They knew that they would need to have a way to handle the difficult situations, and that they would need to have a way to handle the challenges. They decided to have a system of problem solving, and to have a way to handle the challenges.

They knew that they would need to have a way to handle the unexpected situations, and that they would need to have a way to handle the surprises. They decided to have a system of crisis management, and to have a way to handle the surprises.

They knew that they would need to have a way to handle the broad-based situations, and that they would need to have a way to handle the generalizations. They decided to have a system of broad-based management, and to have a way to handle the generalizations.

They knew that they would need to have a way to handle the narrow-based situations, and that they would need to have a way to handle the specificizations. They decided to have a system of narrow-based management, and to have a way to handle the specificizations.

They knew that they would need to have a way to handle the long-term situations, and that they would need to have a way to handle the strategies. They decided to have a system of long-term management, and to have a way to handle the strategies.

They knew that they would need to have a way to handle the short-term situations, and that they would need to have a way to handle the tactics. They decided to have a system of short-term management, and to have a way to handle the tactics.

They knew that they would need to have a way to handle the large situations, and that they would need to have a way to handle the large-scale. They decided to have a system of large-scale management, and to have a way to handle the large-scale.

They knew that they would need to have a way to handle the small situations, and that they would need to have a way to handle the small-scale. They decided to have a system of small-scale management, and to have a way to handle the small-scale.

They knew that they would need to have a way to handle the easy situations, and that they would need to have a way to handle the easy tasks. They decided to have a system of easy task management, and to have a way to handle the easy tasks.

They knew that they would need to have a way to handle the difficult situations, and that they would need to have a way to handle the difficult tasks. They decided to have a system of difficult task management, and to have a way to handle the difficult tasks.

They knew that they would need to have a way to handle the predictable situations, and that they would need to have a way to handle the predictable tasks. They decided to have a system of predictable task management, and to have a way to handle the predictable tasks.

They knew that they would need to have a way to handle the unpredictable situations, and that they would need to have a way to handle the unpredictable tasks. They decided to have a system of unpredictable task management, and to have a way to handle the unpredictable tasks.

They knew that they would need to have a way to handle the routine situations, and that they would need to have a way to handle the routine tasks. They decided to have a system of routine task management, and to have a way to handle the routine tasks.

They knew that they would need to have a way to handle the sporadic situations, and that they would need to have a way to handle the sporadic tasks. They decided to have a system of sporadic task management, and to have a way to handle the sporadic tasks.

They knew that they would need to have a way to handle the continuous situations, and that they would need to have a way to handle the continuous tasks. They decided to have a system of continuous task management, and to have a way to handle the continuous tasks.

They knew that they would need to have a way to handle the discontinuous situations, and that they would need to have a way to handle the discontinuous tasks. They decided to have a system of discontinuous task management, and to have a way to handle the discontinuous tasks.

They knew that they would need to have a way to handle the day-to-day situations, and that they would need to have a way to handle the day-to-day tasks. They decided to have a system of day-to-day task management, and to have a way to handle the day-to-day tasks.

They knew that they would need to have a way to handle the week-to-week situations, and that they would need to have a way to handle the week-to-week tasks. They decided to have a system of week-to-week task management, and to have a way to handle the week-to-week tasks.

They knew that they would need to have a way to handle the month-to-month situations, and that they would need to have a way to handle the month-to-month tasks. They decided to have a system of month-to-month task management, and to have a way to handle the month-to-month tasks.

They knew that they would need to have a way to handle the year-to-year situations, and that they would need to have a way to handle the year-to-year tasks. They decided to have a system of year-to-year task management, and to have a way to handle the year-to-year tasks.

They knew that they would need to have a way to handle the multi-year situations, and that they would need to have a way to handle the multi-year tasks. They decided to have a system of multi-year task management, and to have a way to handle the multi-year tasks.

They knew that they would need to have a way to handle the current situations, and that they would need to have a way to handle the current tasks. They decided to have a system of current task management, and to have a way to handle the current tasks.

They knew that they would need to have a way to handle the past situations, and that they would need to have a way to handle the past tasks. They decided to have a system of past task management, and to have a way to handle the past tasks.

They knew that they would need to have a way to handle the future situations, and that they would need to have a way to handle the future tasks. They decided to have a system of future task management, and to have a way to handle the future tasks.

They knew that they would need to have a way to handle the present situations, and that they would need to have a way to handle the present tasks. They decided to have a system of present task management, and to have a way to handle the present tasks.

They knew that they would need to have a way to handle the present situations, and that they would need to have a way to handle the present tasks. They decided to have a system of present task management, and to have a way to handle the present tasks.

They knew that they would need to have a way to handle the present situations, and that they would need to have a way to handle the present tasks. They decided to have a system of present task management, and to have a way to handle the present tasks.

They knew that they would need to have a way to handle the present situations, and that they would need to have a way to handle the present tasks. They decided to have a system of present task management, and to have a way to handle the present tasks.

They knew that they would need to have a way to handle the present situations, and that they would need to have a way to handle the present tasks. They decided to have a system of present task management, and to have a way to handle the present tasks.

They knew that they would need to have a way to handle the present situations, and that they would need to have a way to handle the present tasks. They decided to have a system of present task management, and to have a way to handle the present tasks.

They knew that they would need to have a way to handle the present situations, and that they would need to have a way to handle the present tasks. They decided to have a system of present task management, and to have a way to handle the present tasks.

They knew that they would need to have a way to handle the present situations, and that they would need to have a way to handle the present tasks. They decided to have a system of present task management, and to have a way to handle the present tasks.
**POLICE INSPECTOR ON RURAL CRIME**

**N.Y. Farm Bureau Vigilance Committee to Probe Farm Property**

New York, June 21—Lieutenant Governor of New York State, Alfred E. Smith, expressed his approval today of the Federal Farm Bureau's Vigilance Committee to probe farm property.

The committee's efforts are aimed at providing the production of farm property to rural residents from the standpoint of the public interest and at the expense of the public good.

Furthermore, this line in 1925 committed its million members to the task of exposing farm property. In the meantime, the committee has reached the conclusion that the public interest can be served only by the prevention of such practices.

The committee's activities are supported by the New York State Committee to Probe Farm Property, which is actively engaged in exposing farm property.

**Claim Packers Nullify Stock Yards Control**

Private Yards Being Used to Beat Down Terminal Markets

UMAISQOHURS PLANS ECOLOGICAL AND STOCK YARDS ACT OF 1922 TO BE USED AS AN ARMED FORCES OF THE DOLLAR RESULT OF NATION-OF-ARMY MANIFESTO OF NARROW MIND.

Here are some of the fellows we are watching in Lapeer County Farm Bureau's membership campaign. They expect to have a good one and to build up again an active membership and a good program of work in Lapeer County.

**Lapeer Farm Bureau Boosters**

**Fungus Controls The Clover Leaf Weevil**

The clover weevil does considerable damage in the clover crop, but without control crop failure because of the clover weevil could be disastrous. In the clover weevil we have a very dangerous pest, and the pest is not easy to control. The presence of the pest in the fall, during which period invisibly injures the leaves, makes the pest hard to control. The pest is a real menace and the only way to control it is by chemical application.

**ORDER YOUR BINDERS NOW**

The demand for Michigan State Industries binder twine, made at Jackson, is always heavy. Sometimes the supply becomes limited. Therefore, we suggest that you see your co-operative's manager at once and order your 1926 needs.

The Michigan Farm Bureau Supply Service handles Jackson twine because it is the best. It is one of the few standard Yugoslav sisal twines containing long fibers of mulberry.

We are ordering Jackson twine in two sizes—the old five pound ball and the new 8 pound ball, illustrated here. The 8 pound ball fits for farm work and makes lovely twine. The 5 pound ball is for city work. We recommend it.

**Detroit Poultry Market**

As the breeding season gets under way, prices are fairly steady, according to Leonard J. W. Kees, owner of the Detroit Poultry Market.

**SIX GREAT FARM QUESTIONS THAT MUST BE ANSWERED**

**What are they?**

- Country School
- Selective Production
- Public Improvements
- County Church
- Cooperative Marketing
- Agricultural Fairs

**Who cares?**

- Farmer's Wife—Our Boys and Girls—Our Neighbors

**What are they?**

- We can't solve these problems individually—Nor by waiting—by shouting—by proxy
