This is the Story of an Ice Gorge and a Disastrous Flood

5 FEET OF WATER HURLED INTO TOWN IN TEN MINUTES

To the Reader

17 MILLION LBS. OF FRENCH SEED HERE--WHO WILL GET IT?

IMPORTS DROPPING OFF

Little Over One Million lbs. Came in the Past Week

1,000 FARM PEOPLE ATTEND SERIES OF TUSCOSA MEETINGS

Delegates Chosen For Great Farm Bureau Rally at Cass City, Apr. 7

Mr. W. H. L. Price, noted authority on law enforcement and other measures to protect the nation's interests, will address the Farm Bureau rally at Cass City, April 7, on law and order in the protection of the United States, which has been under constant threat of invasion in recent years.

The rally will be held in the Cass City public school. Mr. Price, a former member of the Michigan state legislature, is well known for his work in the field of law enforcement, and his address is expected to be of great interest to the farmers and others who attend.

FRENCH SEED HERE; SHOWS WHAT LOSS PREVENTION WORK CAN ACHIEVE

Michigan Ships to Work With Railroads In the Matter

The peddlers of what can be termed the 'inconsistent' French seed are being given a run for their money by the railroads in Michigan, who are doing everything in their power to prevent the spread of this seed that is causing such trouble in the state.

The railroads are doing this by inspecting the freight cars and requiring that any such seed be destroyed before it is shipped out of the state.

The railroad companies are also working with the Michigan Agricultural College to develop a better seed for the state, and they are doing this in an effort to prevent the spread of the French seed that is causing so much trouble.

GODDING-KETCHAM BILL PROGRESSES

President McPherson of the Board of Directors of the Michigan Farm Bureau has been working hard to move the Godding-Ketcham bill forward.

The bill was introduced in the Michigan legislature in 1922 and has been working its way through the various committees ever since.

It was passed by the Senate in 1928 and by the House in 1930, but was vetoed by the Governor.

This year, President McPherson has been working hard to move the bill forward again, and he is hopeful that it will be passed this year.

ATTEND SERIES OF LOCAL MEETINGS

Hundreds of Michigan Farm Bureau members have been attending the series of local meetings that have been held throughout the state.

These meetings have been held in all 80 counties in the state, and they have been attended by thousands of farmers.

The meetings have been held in the various communities, and they have been attended by farmers from all over the state.

The meetings have been held in the various communities, and they have been attended by farmers from all over the state.

Climate Booster and Wit
Letter to the Editor

Once again, I vent my old friend, J. P. Callahan of Arkansas, to the editor to express my own opinions. I am concerned about the welfare of our state and consider what they might support.

In the commence, water was everywhere. There was a flood that overwhelmed the crops and prevented the normal business activities. However, the state was able to recover, and we have seen a great deal of water in the years to come.

I have been following the situation closely, and I believe that we need to consider what might happen in the future. I hope that we can work together to address these issues.

I am confident that we can work together to address these challenges and ensure the continued prosperity of our state.

Use This Coupon

This coupon is valid until June 30, 1926. Please present it to the nearest Michigan Farm Bureau Office.

The Michigan Farm Bureau Wool Pool will market wool cooperatively with the Ohio Wool Growers Cooperative. Use this coupon to take advantage of this opportunity.
TAYLOR CHURCHILL

By Fred Grayson

TAYLOR CHURCHILL is a name, and a name that means something to any boy, anywhere in the country, who plays baseball in the sun. Taylor Churchill, whose home was a railroad camp near Waukegan, Illinois, was born on March 26th, 1892. He was a mighty boy and a mighty dreamer. But in the eyes of every boy who reads about Taylor Churchill, he is a mighty warrior. Taylor Churchill is the Boy in every boy's imagination in the world, the boy who makes heroes of the men the world honors, the boy who stands for every boy who others might despise.

Two Days Ago, Taylor Churchill was his battlegrounds, nursing his broken arm, and unable to play ball. For the past ten days he had been hunting for a baseball bat, with a tough task of breaking the news to his mother. It is unanswerable from without, but the boy of two days is now a man of ten, and a mighty man. He will not play ball again for a long while, but he is not going to give up his dream of being a ball player. He is a mighty boy, and he is a mighty dreamer. He is Taylor Churchill, and he is our boy.

No, sir, don't mean maybe, as the boys used to say, but it was just such a thing as maybe. One evening, as he was coming down the street, a man asked him if he would like to go to a baseball game. He said yes, and he went. He saw the game and he was very much interested. He went back to the game the next day and he saw the game again. He went to the game every day after that, and he saw the game every day.

Then began the battle. First a mighty blow with his skilful ash, and a mighty blow with his ball, bullet-like, squarely over the fence at Navin field. No, sir, don't mean maybe, as the boys used to say, but it was just such a thing as maybe. One night looking rather tired, and looking for a baseball bat, he asked the Bambino to take a look at him. He said yes, and he went. He saw the game and he was very much interested. He went back to the game the next day and he saw the game again. He went to the game every day after that, and he saw the game every day.

The dream rises in the mind, the dream rises in the heart, the dream rises in the soul, and the dream rises in the blood. It is Taylor Churchill, and it is our boy. He is a mighty boy, and he is a mighty dreamer. He is Taylor Churchill, and he is our boy.

During this time of trial, his ambition was fed with the usual stuff: the ambition to be a ball player, the ambition to be a great ball player, the ambition to be the greatest ball player in the world. It left him helpless, unable to do anything, and please don't pity Taylor Churchill, but let him be his own man.

RURAL LANDSCAPE TO BE BEAUTIFIED

Conference Plans Educational Program; Radio to be Big Feature

The Michigan Farm Bureau held its second annual meeting early this summer in connection with the joint meeting of the Hartland and Kalamazoo county farm bureaus.

The conference theme was "Rural landscape," and the educational program was arranged to give the farm community an understanding of the problem and to help it to improve the rural landscape situation in the county.

A series of lectures, demonstrations, and discussions were given on various aspects of the rural landscape problem, including the use of trees and shrubs in the landscape, the planting and care of lawns, and the use of flowers in the landscape.

The educational program was well attended, with an average attendance of between 500 and 600 people per session. Many of the participants were farm operators, extension agents, and other interested citizens.

The Michigan Farm Bureau is to be commended for its efforts to improve the rural landscape situation in the state. It is an important part of the overall effort to improve the quality of life on the farm, and the bureau is to be commended for its leadership in this area.

A good many Michigan farmers are having equally satisfactory experience with Michigan Milkman, 95% protein, prob- able-sodium dairy food. We had no milkman for 150 years, but now we have a milkman. We can get milkman for 150 years, but now we have a milkman. We can get milkman for 150 years, but now we have a milkman. We can get milkman for 150 years, but now we have a milkman.

The Michigan Farm Bureau has been working hard to improve the rural landscape situation in the state, and it is making good progress. It is an important part of the overall effort to improve the quality of life on the farm, and the bureau is to be commended for its leadership in this area.
N. Y. FARMERS ARE WARNED AGAINST IMPORTED CLOVER

Prof. Wiggans Tells Situation at Cornell's Future Week

Elyria, N. Y., Mar. 10.—Prof. W. W. Wiggans, Cornell's prominent agricultural economist, warned New York farmers this week that imported red clover and Problemus clover would soon make their appearance on New York markets, and that farmers should be on their guard against them.

The professor said that clover hay, a good substitute for hay, can be made from Problemus clover. It is a species of clover which grows in the United States, but it is not widely cultivated because it is not as hardy as the foreign clovers. The foreign clover is hardy and can be grown in colder climates than the Problemus clover. However, the problem of growing clover hay from Problemus clover is not as severe as growing clover hay from foreign clover.

During the past two years, there has been a great demand for clover hay in New York, and the demand has increased in recent years. The demand for clover hay has increased because of the increasing use of clover hay as a substitute for other kinds of hay.

The demand for clover hay has been met by the importation of foreign clover hay. The foreign clover hay is hardy and can be grown in colder climates than the Problemus clover. However, the problem of growing clover hay from foreign clover is not as severe as growing clover hay from Problemus clover.

The demand for clover hay has increased because of the increasing use of clover hay as a substitute for other kinds of hay.
