HURON COUNTY MEMBERS INFORMED OF STATE FARM BUREAU'S PROGRAM FOR TOWNSHIP HIGHWAY ECONOMIES

Research Engineer From Mich. State College Addressing Farmers at Bad Axe On Nov. 23 And Cities Provided With Getting More Improved Roads

The question of township road improvement was brought up at the annual meeting of the Huron county Farm Bureau, which was held this week and was presented by John L. Rothery, research assistant in civil engineering, of Michigan State College.

Mr. Rothery, who has talked this subject of better and more improved roads in some 30 counties of southern Michigan during the past five months, bases his lectures and discussions on conditions as the county has found them, with the principles of highway construction and financing which have come to be accepted as most efficient and most economical.

With about 85 per cent of the roads of the county will in state of nature and with one third of all automobiles owned by farmers, the latter in dollar for road improvement work may be considered as a practical or practically impossible township roads during a major portion of the year, the farmers of Michigan know that action this winter so that during the next season of road building many dollars will be saved and much more effectively than ever before has been worked for.

If a township does not improve more than to make the best use of the materials found in its roadsides, the savings in dollars in one season will be amazing, to say the least, he explains.

It doesn't show poor management in every township, he adds, but the whole thing simmered down, showed a general laxity on the part of the farmers themselves.

They pay the toll for bad roads, he says, adding that they have everything to do with the appearance of the road, that at the end of the season, that their failures are due to the fact that they have not been put in order, and that the things can be done.

It is a general state of affairs, this engineer states, that the roads have been made either by teams at the farm or by the state. It is in any given parish and any given township that the lack of系统 and the only instance where a considerable sum of money has been spent on a road was in Mr. Rothery's class of road.

It is only through the community that system can be worked for every township, he adds, and that the system, if properly maintained, will be a success.

Definite Plan Necessary

The proposed plan, he explains, is the development of the farm and the farmer's responsibility, that the most satisfactory and only effective way to build and maintain roads will be to have a definite plan for every township for the building of roads and the maintenance of the roads.

Emphasis is placed on the fact that the saving is not only in dollars, but that the roads can be made more durable and will last longer, if properly maintained.

Several sessions held in preparation for the winter road construction work have been attended by Motley, Huron and Superior counties, and it is planned to have all the township roads in the county in order by January 1.

CENSUS INDICATES DAIRYING INCREASE

Market Records Show Change In Production and Price Holding

Growth of the state dairy industry has been shown in the volumes of milk and cream shipped for the year ending June 1, 1926, according to the latest reports from the United States bureau of agriculture.

For the year ending June 1, 1926, there were marketed 17,852,553,265 pounds of milk, an increase of 34,931,393 pounds over the year previous.

Census data in preparation for the year ended June 1, 1926 show that the dairy farms in Michigan have increased by 4,294 since the previous census.

A most significant departure in the dairy industry is the fact that the state dairy industry has increased by 4,294 since the previous census.

The Census shows that the amount of milk marketed has decreased by 1,056,253,265 pounds over the year previous.

According to the latest report from the United States bureau of agriculture, the amount of milk marketed has decreased by 1,056,253,265 pounds over the year previous.

BUREAU PROTESTS TELEPHONE RATES

Our Chicl's country westerner recently reported that he had about $1,700 in the bank. May be a case of great infamy, one might think. However, the young man is none other than Great Britain's best known foreign correspondent. When the young man is paid to write for a foreign newspaper, he is not paid in dollars, but in dollars.

The Minneapolis Star Bulletin recently paid a young man to write for a foreign newspaper. When the young man is paid to write for a foreign newspaper, he is not paid in dollars, but in dollars.

This can be done by the county Farm Bureau, and a special rural road service is special for this big convention. Both are to operate to the attention of their own members and the public, and are to be available for all members and officials of the Farm Bureau, and are to be available for all members and officials of the Farm Bureau.

Reserving Rooms and Securing Certificates Will Aid Big Convention

Delegate's stay from Michigan this year to attend the annual convention of the American Farm Bureau Federation at Chicago will not be limited to the enjoyment of the convention itself. The convention will be a part of the world's greatest and most successful road-building program in history.

Throughout the convention, delegates will have the opportunity to attend the convention and will be able to make their own plans and see the various exhibits and demonstrations during the convention.

The convention is being held in Chicago, and the special rural road service is special for this big convention. Both are to operate to the attention of their own members and the public, and are to be available for all members and officials of the Farm Bureau, and are to be available for all members and officials of the Farm Bureau.

WATER ROUTE IS URGED

Grant LAKE- St. Lawrence Waterway Would Boost Farm Income

This is the first of a series of articles that explain why the proposed Great Lakes project of the U.S. Department of Agriculture should be approved. It will help many farmers, particularly those who live near the Great Lakes. It will also explain some of the benefits that will accrue to farmers in other states.

Why should I be interested in all this? I have to think of the farm problem in a national sense. What are the implications of the tariff on farm prices in the United States? What are the implications of the tariff on farm prices in the neighboring countries? What is going on in the world? How do people get the good things we enjoy? What are the advantages of living in a country like ours? I think we should all be interested in these matters.

The Chessman will be held at Chicago on October 12, the eighth annual convention of the American Farm Bureau Federation. It is sponsored by the Michigan Farm Bureau, the Michigan Milk Producers Association, and the Michigan Farm Bureau Supply Service, in conjunction with the Michigan Farm Bureau, the Michigan Milk Producers Association, and the Michigan Farm Bureau Supply Service. Winter Season Is Proper
Time to Outline Program

County Groups Can Accomplish Much By Planning

The program of the county's most active farm group, the
MICHIGAN FARM BUREAU, is being
planned at this time to meet the needs of the
winter months. The winter is a
vital period for the farm
organization, and the
activities planned for this
season will determine the
success of the year.

The main emphasis of the
winter program is on
educational activities. The
MICHIGAN FARM BUREAU supply
service, for example, is
planning a number of
programs, including a
series of educational
workshops. These will
provide an opportunity for
farmers to learn new
techniques and improve
their farming practices.

In addition to the
supply service, other
programs that will be
planned includes the
Farmers' Institutes,
which will continue to
provide educational
programs for farmers.

Also, the MICHIGAN FARM
BUREAU will continue to
publish its weekly
newspaper, THE FARM BUREAU
NEWS, which will be
devoted to educational
content.

The winter season is a
vital period for the
MICHIGAN FARM BUREAU, and
the activities planned for
this season will determine
the success of the year.

Home and Community Leaders Meet

POULTRYMEN SET
HIGH STANDARDS

Innovations Announced To Better Condition

The poultrymen, who are the
leaders in the dairy industry, are
setting new standards for the
year. They are organizing the
MICHIGAN FARM BUREAU for a
new season of success.

The poultrymen are
announcing a number of
innovations that will
improve the condition of
the poultry industry. One of
these innovations is the
introduction of new
breeds, which will improve the
quality of the poultry raised.

Another innovation is the
use of new techniques in
nursery care, which will
increase the health and
productivity of the
poultry.

The poultrymen are
announcing these
innovations to improve the
condition of the poultry
industry and ensure its
success in the coming year.

In regard to growing apples, Prof. Ferdinand French research worker, was on hand to give the farmers from Cass, Mecosta, and Ionia counties much valuable information.

NEW SEED INDUSTRY DEVELOPS IN STATE

Astrum County New Land In World's Production of Radishes

Producers and handlers of radishes are being encouraged to consider the possibilities of new varieties of this vegetable. The Astrum County Fruit Growers' Association has established a new field of production in Astrum County. The radish is being grown in large quantities. Cultivating radishes offers a new opportunity for those interested in the vegetable industry.

PAYMENT IS MADE TO MICH. GROWERS FOR WOOL POOLED

Association Manager Says It Was Largest Pool Ever

The largest payment ever made to Michigan farmers for wool was made recently. This payment represents a large investment of resources in the wool industry. The manager of the association responsible for this payment emphasized the importance of supporting the wool industry.

One Auto in 20

One of the most significant developments in the automotive industry is the increase in the number of automobiles produced. This trend has been driven by various factors, including the growth of the economy and the rise in disposable income. The government also plays a role in promoting the automobile industry through various policies and regulations. The automobile has become an integral part of everyday life, with millions of people relying on it for transportation.
