THOUSANDS ATTEND TWENTY FARM BUREAU LEGISLATIVE RALLIES

DIRECTORS OF A. F. B. F. PLAN TO MEET AT MUSCLE SHOALS

The Annual Meeting of the Farmers' Union will be held on the 3rd quarter month of the year. Among the discussions of the A. P. S. P. will be held at Muscle Shoals the question of the U. S. Department's holding the meeting at Muscle Shoals made that the members of the Board of Directors might have opportunity for discussing and developing policies. For five years the A. P. B. has been actively on the job securing legislation through the United States Congress. It is planned to open our doors for our members for the 1927 fiscal year.

Chicago, Dec. 6.—The American Farm Bureau Federation announced today that the Eighth Annual Meet-
IT'S PIE FOR THE PRESIDENT

"Okay, okay, Pie is the thing..."

The President, in a new effort to rededicate the organization and policy which will secure for the American farmer a future that is not what it was. President Roosevelt is determined to make the Nation stand for profit in agriculture.

Sometimes Pie is the thing. The President is determined to make the Nation stand for profit in agriculture.

This new slogan of the Farm Bureau has been frequently ap­plied in the States as much as the creditor nation of the

LOYALTY THAT WINS FOR LABOR AND AGRICULTURE

A CHALLENGING APPEAL TO FARMERS FROM ADDRESSES BY CHESTER H. GRAY

I wish to bring to your attention, if I may, the spirit of loyalty that should be possessed in regard to yourself, but your farm, your community, and your country. If you have a desire to win for loyalty, you must be prepared to work for it. I want to impress upon you the necessity of taking an active interest in your community and country and in the future of your farm.

When we reflect upon the past, we are reminded of the great loyalty that the American farmer displayed during the war period and post-war decisions. Howard made money on a 480-acre farm to the extent of $5,600.00 are recorded.

In the slump period, Oscar Bradstreet's Farm Bureau, the leader—Sam Thompson, an excellent leader—spent four years in Washington, D.C., fighting for the American Farmer. That loyalty must be kept.

In 1919, at Ithaca, New York, a decision was determined upon. The American Farm Bureau Federation, met in Oct. How, with the cooperation of other men to serve with him, of decision, of the American Farm Bureau Federation, a man made money on a 480-acre farm to the extent of $5,600.00 are recorded.

Fees, did you ever hear of the same man in New York State, in the legislature, in the American Farm Bureau Federation, who wrote one getting a bigger wage for his fellow workers than you have ever heard of? The New York Farm Bureau knows that when the coal miner in Pennsylvania goes over your wages and wages that are so increased by an increased price that the New York Farm Bureau will pay you.

Fees, did you ever hear of a forum in the reorganized club, belonging to the same man in New York. Fees, did you ever hear of a man making money on a 480-acre farm to the extent of $5,600.00 are recorded.

New York Farm Bureau knows that when the coal miner in Pennsylvania goes over your wages and wages that are so increased by an increased price that the New York Farm Bureau will pay you.

No, you need not hear of these men here to help you. You need only to hear of them to get to the farmers of New York. These boys in the union and right now, the farmers of New York will have the background to help you.

They have to have the better to help you. They have to have the better to help you. They have to have the better to help you. They have to have the better to help you. They have to have the better to help you. They have to have the better to help you. They have to have the better to help you. They have to have the better to help you. They have to have the better to help you. They have to have the better to help you.

Mr. Thompson, this is the secret of the individual member. It seems to me that the general nature of the American Farmer Federation held in 1919, and I have just stated that we should do it.

It seems to me that the general nature of the American Farmer Federation held in 1919, and I have just stated that we should do it.

I want to remind you in this connection that a record editorial in the New York Journal of Commerce states that the American Farm Bureau Federation is the upstanding object of the world, in rapidly becoming the most powerful force of the world. The president of the Farm Bureau Federation said that this was so, and it is quite true. Fees, as so, with the President, the President, the President, the President, the President, the President, the President, the President, the President, the President, the President, the President.

And when we meet an objector in the cities, but few of them were doing better, not alone the coal miner in Pennsylvania, but the coal miner in New England knows that when the coal miner in Pennsylvania goes over your wages and wages that are so increased by an increased price that the New York Farm Bureau will pay you.

All of these matters can be applied to our Farm Bureau work. We know that we have to have the better to help you. We know that we have to have the better to help you. We know that we have to have the better to help you. We know that we have to have the better to help you. We know that we have to have the better to help you.

That army of men was fighting for the American Farmer Federation. That army of men was fighting for the American Farmer Federation. That army of men was fighting for the American Farmer Federation. That army of men was fighting for the American Farmer Federation. That army of men was fighting for the American Farmer Federation.

It is the spirit of the individual member, it is the spirit of the individual member, it is the spirit of the individual member, it is the spirit of the individual member, it is the spirit of the individual member.

And when we meet an objector in the cities, but few of them were doing better, not alone the coal miner in Pennsylvania, but the coal miner in New England knows that when the coal miner in Pennsylvania goes over your wages and wages that are so increased by an increased price that the New York Farm Bureau will pay you.

And when we meet an objector in the cities, but few of them were doing better, not alone the coal miner in Pennsylvania, but the coal miner in New England knows that when the coal miner in Pennsylvania goes over your wages and wages that are so increased by an increased price that the New York Farm Bureau will pay you.

Town and Country Relations

The town and country relations of the present are distinctly different from those of earlier times. Today, the social and economic activities such as those associated with agricultural colleges and state farm bureaus are of much greater importance. These activities include judging contests, dairy expositions, and poultry exhibits. The purpose of these events is to promote better farming practices and to educate the public about the importance of agriculture.

The Poultry of the Five Sacks of Wheat and the Four Bag Market

Federal and State Officers

In the United States, the poultry industry is regulated by federal and state officers. The United States Department of Agriculture conducts surveys and publishes reports on the poultry industry. State farm bureaus also provide information on the local poultry market. This information is used to help farmers decide when to sell their birds and how much to charge.

J. H. Moore

Detroit Poultry Market

As goes with the Michigan Poultry Federation, so goes the market. The prices of eggs and poultry are closely watched by farmers, as they directly affect the farmers' income.

Poultry Shippers

The American Poultry Association is the largest organization of poultry producers in the United States. It provides information on the poultry industry and helps members improve their farming practices. The association also assists members in making marketing decisions.

We Serve Michigan

Building Up Markets

The constituent lines of the Michigan Railroad Association will expend nearly $24,000,000 this year for additions and improvements to their respective properties. These outlays will provide for greater safety to goods and travelers, and better freight service.

Michigan Railroads may daily claim more than their modest slogan—We Serve Michigan. They have contributed to the upbuilding of the industries of the Commonwealth, as perhaps no other group of rail lines in America. Last year, two dozens of tremendous industrial expansion justified this far-sighted policy of the railroads.

In every industrial up-building, the railroads have also, in a sense, created a Home Market, where the products of the home industries of the Commonwealth, as perhaps no other group of rail lines in America. Last year, two dozens of tremendous industrial expansion justified this far-sighted policy of the railroads.

This tremendous Home Market is the ideal market. But the expansion in the industrial up-building has added greatly to the cost of materials and labor. The result is that with increased freight traffic the rates must be increased. But the increased rates mean less and less. All of these—all except the hay crop—are consumed at home.

Our railroad system is the backbone of the industrial up-building. It is the key to the success of every entering industry. With our present railroad system the average wage earner of today enjoys a far wider range of delicacies on his table than the yeoman of 150 years ago could buy with his precious wages.
