COOPERATIVE EFFORT ON PART OF FARM BUREAU AND SEED MEN MAKE LAW APPLY TO ARGENTIN IMPORT

Ten Per Cent Of Alfalfa Seed From Southern Country Must Be Stained Orange-Red In Compliance With A Compromise On Federal Seed Staining Law

Although following as somewhat of a compromise as to color, corn and a federal ruling requiring the staining of a tenth per cent of each lot of foreign alfalfa and clover seed imported into this country, seed of alfalfa from the Argentine must carry a 10 per cent stain of orange-red color beginning July 2.

This is a decided victory won by cooperative effort on the part of the Farm Bureau, the seed trade and agronomists whose flood of testimony at a hearing a few months ago proved beyond question of doubt that Argentina's alfalfa seed is not adapted for use in the United States, especially in the northern states where the bulk of the imports of this seed have been sold to the consumer.

This means practically the elimination of close to eight million pounds of seed, which is valued in the markets where it has been sold in past seasons in direct competition to the domestic seed.

HEARING DATE SET TO BAN OHIO CORN

Michigan Seeks Endorse To Protect State Corn

Federal government's corn ship embargo from Ohio, Michigan, Illinois, and Indiana, was set by the Department of Agriculture for July 30, the day following the previous date selected for a referendum in the absence of a quorum in the Michigan legislature.

The request is based on the alleged necessity of taking what is termed the "emergency" corn situation under the Farm and Power Act of 1927, and there is no indication that it will be backed to the full extent of the power conferred on the department by the act.

A full hearing was held in Washington to determine the necessity and if it should be held.

3 $2 Limit Authorized On Corn Borer Payments

If Michigan farmers turn in alfalfa borer claims for as much as $2 an acre, they will be paid $2 for each acre involved, according to word received by the Michigan Farm Bureau from the Department of Agriculture.

Many farmers have been receiving as little as 15 cents an acre, in some cases, on claims for alfalfa borer, 

and some have been paid as much as $1.45 an acre on claims involving less than $2 an acre, including interest, according to the bureau.

There is a limit of $2 on each acre involved, and the borer claims are to be paid in full, according to consideration of the act.

It is expected that the corn borer situation now be limited to $2 an acre, including interest, as a limit to claims and payments.

A full investigation of the situation is being conducted by the department of agriculture, which is expected to make a final report in a few weeks.

The Corn Borer situation is now being investigated by the state department of agriculture, which is expected to make a final report in a few weeks.

...producers will be taken on to fill the program. That kind of followship makes a leader happy. Be who follow intelligently a leader who has mapped out a plan that way, yet it spells protection to American labor, and we are glad that this "infant" needs very little more of the tariff "milk." While the tariff environment of the late 1920s enabled the United States Steel Corporation to make the largest single investment in the country. Only recently has it announced a dividend of about 10% per cent, amounting to $80,000,000,000, and it is said that even the President of the United States shared in the "milk." It is a not uncommon sight to see a golden dollar bill turned into a billion dollar bill, and the money spent on these issues has been a never-ending stream.

Committee Reports

On St. Lawrence Canal

Chairman Thompson reported that the committee had visited the Collingwood, Bahamas, and Lake of the Woods points and had also been to the St. Lawrence basin and the great lakes. It is the opinion of the committee that the present system of navigation is not economically sound, and that an effort is being made by the Dominion government to remedy the situation. The committee's recommendations will be presented in the near future.

COLD STORAGE STOCKS HEAVIER THAN YEAR AGO

Cold storage facilities of meat packers andprocessors have been materially heavier this year, while stocks of frozen food products have shown a smaller volume.

Don't Deliver Your Livestock

For your own protection, sell your livestock to one of the recognized livestock dealers, who will deliver them to the market for you. Only farmers who own their own trucks are anxious to pick up livestock at the farm and deliver to market. It is not advisable to sell to unknown persons, as they are likely to be unscrupulous.

The Price Depends on the Fleece

The best market price is paid for the fleece, not for the carcass. The price of the fleece will fluctuate according to the market, and it is not advisable to sell your livestock on a low market for the carcass.

CASS COUNTY IS DOING MUCH FOR MEMBER SIGNING
Second Quarterly Meeting Was Held Tuesday. 100 Attended
COOPERATION IS NEEDED
County Organization Work Aided By Meetings Of The Bureau
The second quarterly meeting of the Cass County Farm Bureau was held Tuesday in the office of the office of Mrs. W. A. Martin, superintendent of the county bureau. The meeting was well attended and several new members were added to the rolls of the bureau. The main topic of discussion was the need for cooperation among farmers and the importance of working together to achieve common goals. The meeting was concluded with a call to action for all members to sign up for the next quarterly meeting.

LIVESTOCK CO-OPS INCREASE RAPIDLY
Commission Companies Are Principal Agencies For Selling
Confidence in livestock marketing co-ops continues to increase rapidly, according to the report of the United States Bureau of Agricultural Economics. While the number of co-ops has been growing, the adoption of co-ops by farmers has also been increasing. The Bureau estimates that the number of co-ops has doubled in the past five years, with the largest growth occurring in the western part of the country.

Loyal Cooper Is Enlightened Farmer
The idea of a local cooperative is not new, but the success of the co-ops has been due to the enthusiasm of farmers who are dedicated to the idea of working together for their mutual benefit. The co-ops are able to offer farmers a higher price for their livestock, which in turn gives them more money to spend on other farm needs.

THESE PROVEN TESTS OF SOIL CONDITIONS ARE WORTH STUDYING
In the selection of the proper fertilizer, the proper test of the soil conditions is necessary. These tests will show the farmer what he can do to improve the soil and what kind of fertilizer to use. This information is necessary in order to get the best results from the soil. The tests also help to prevent the overuse of fertilizer, which can be harmful to the soil.

Are You Paying Excessive Freight Charges?
The State Farm Bureau will investigate this for you and will help you reduce your cost. Call your local agent.

ORDER BINDER TWINE
NOW
The demand for Michigan State Industries binder twine, made at Jackson, is always heavy. Sometimes the supplies become limited. Therefore, we suggest that you see your co-operative's man at once and order your 1927 needs.

The Michigan Farm Bureau Supply Service handles Jackson twine because it is one of the few STANDARD YUCATAN SISAL TWINES containing long fibers.
