THREE GOOD FARM BUREAU MEETINGS HELD ON FARM IN KENOSHA COUNTY

President Kenyon L. Butterfield of Michigan State University was the principal speaker at the joint meeting of the Kenosha County and the Peoria Chapter of the Farm Bureau at the start of the season's meetings.

Do you know that a weight tax was imposed on motor vehicles under the three cent gas tax law? The weight tax was abolished with the inception of the Michigan Legislature in 1929. The weight tax made? This would have brought in some $5,000,000 into the state treasury for next year, you would have one-half rates to Chicago and return from Sec'y Brody's office or from the Motor Service Association. Failure to have your tickets turned in by the time the train leaves will result in not receiving your tickets.

The Business of the Farmer

Three Bureau meetings were held in Lake Michigan between The Membership And State Headquarters.

MENOMINEE FARM BUREAU HELD 150 STRONGER MEETING AT NEW MEETING PLACE.

Lake Michigan Between The Menomonie town council had a meeting Tuesday afternoon at the Menomonie School. The council is making up a list of streets to be resurfaced with an increase in the rate of $1.25 per cwt. to settlements at a later date.

The Business of the Farmer

The next meeting of the Menomonie town council will be held Wednesday afternoon at the Menomonie School. The council is making up a list of streets to be resurfaced with an increase in the rate of $1.25 per cwt. to settlements at a later date.

Leaf Hopper Burns Foreign Clovers

Domestic Strains Escaped: 1927 Work at State College Adds Emphasis to the Importance of Using British Adapts

The following letter from Professor J. P. Thorpe of the University of Wisconsin emphasizes the importance to every one who plants drier or alfalfa. It was given more light on the importance of Michigan adopted seeds.

Mr. C. L. Shute, Director, Michigan Farm Bureau, Lansing, Michigan

Dear Mr. Shute: The new season has been a difficult one for those engaged in the production of clover and alfalfa. The leaf hopper, a destructive insect, has caused considerable damage to the forage crops in many parts of the state. It is a sign that something is not right with the present situation.

The leaf hopper is a small, greenish insect that feeds on the leaves of clover and alfalfa. It has become more prevalent due to the lack of control measures and the improper use of protective chemicals. The insect feeds on the leaves, causing them to turn yellow and eventually die.

The damage caused by the leaf hopper can be minimized by proper cultural practices and the use of resistant varieties. It is important to use seeds that have been adapted to the local climate and soil conditions. Michigan is fortunate to have a variety of clover and alfalfa seeds that have been developed and tested by the state extension service.

The Michigan State Farm Bureau takes a good deal of pride in the variety of seeds it offers. It has been the policy of the bureau to select and adapt the seeds to the local conditions. The seeds are grown under the supervision of the state extension service and are tested for their adaptability and yield.

The bureau has been working closely with the Michigan Agricultural Experiment Station to develop new and improved varieties of clover and alfalfa. The seeds are available to members of the state Farm Bureau at a reasonable price.

SPLENDID MARKS INauguration of London's Mayor

Brilliance Of Medieval And Modern Pages Reveals Circus Day

London, Nov. 17.—Christopher a g l a m ous and in the two centuries since its inauguration the city's annual event, the Mayor's Ceremonial Procession, has been a spectacle to behold.

The parade begins with the Lord Mayor, followed by a cavalcade of cars, each containing a prominent figure. The procession makes its way through the streets of London, stopping at various points to receive the cheers of the crowd.

The City's Mayor, Sir James C. A. G. Vickers, was on hand to lead the procession. He was accompanied by his wife and the Lord Mayor of the City of London, Sir John A. Vickers. The Lord Mayor of the City of London, Sir John A. Vickers, was also on hand to lead the procession. He was accompanied by his wife and the Lord Mayor of the City of London, Sir John A. Vickers.

The parade was a spectacular sight, with colorful floats, marching bands, and a large crowd of spectators. The procession arrived at the Guildhall, where a grand banquet was held for the guests.

COTTONSEEDS ONCE A NOISELESS NEW GOLDEN NUGGETS

The cottonseed, once a noiseless golden nugget, is now the object of increased interest and research. The seed is rich in proteins and is a valuable source of nitrogen for fertilizer.

The cottonseed is a small, round, brownish seed that is about the size of a pea. It is the seed of the cotton plant and contains about 40% oil. The oil is extracted from the seed and is used in the production of vegetable oils.

The cottonseed is a valuable source of protein and is a good source of nitrogen for fertilizer. It is also used as a feed for livestock and poultry.

In the past, the cottonseed was a waste product and was often discarded. However, recent advances in technology have made it a valuable source of protein and nitrogen.

The plan most often used is to have an annual delegate or mass meeting of the members that election is held and the chairman is chosen. The plan is decided upon by the board of directors and the secretary and chairman are elected from among the members.

The plan of the Farm Bureau is divided into sections and it is the responsibility of each section to hold at least one meeting each year.

The sections are: Berrien County, Cass County, Hillsdale County, Jackson County, Kalamazoo County, Kent County, Lenawee County, Livingston County, Macomb County, Monroe County, Oakland County, St. Clair County, Saginaw County, Shiawassee County, St. Joseph County, Washtenaw County, and Wayne County.

Declares Equalization Fee Is Needed For Surplus Control

SENATOR WATSON GIVES VIEWS ON PROPOSED PLAN

Says Farm Will Pay Cost, Bear Any Losses, Get The Benefits

LIKE OTHER BUSINESS

May-Need Changes. As Old 1 C. C. Federal Reserve Legislation

By SENATOR JAMES E. WATSON

This farm legislation can be made more beneficial to the farmers, but much of the present waste of money and trouble can be avoided if a plan is proposed that will not involve the Federal Reserve System.

Barren of Assistance. Senator Watson said that the Federal Reserve System is not needed for the purpose of making the farmers pay the cost of surplus production, but that it can be done in a much simpler and more efficient manner.

The present system is too complicated and involves too much waste of time and money. It is time that a simpler plan be adopted.

Senator Watson said that he was in favor of the farmer paying the cost of surplus production, but that this could be done in a much simpler and more efficient manner than by the present Federal Reserve System.

The farmer should be given the freedom to carry on his business as he sees fit, and not be forced to follow the system imposed by the Federal Reserve System.

The present plan involves too much waste of time and money. It is time that a simpler plan be adopted.

The farmer should be given the freedom to carry on his business as he sees fit, and not be forced to follow the system imposed by the Federal Reserve System.
No Farmer Has Ever Found a Good Organization a Liability

MILK PRODUCERS HEAR PRES. HULL ON CO-OPERATION

Rule For Improvement As Good Today As 30 Years Ago

But the vital membership of the Michigan Milk Producers' Association, on the 13th annual meeting of the organization, which took place in Pontiac, November 14, 15, 16, should be noted. Of the over 4,000 farmers affiliated with the organization, there were less than 500 members present at the meeting, representing a decrease of 100 from the previous year. This shows the importance of the work that the organization is doing in promoting the interests of the dairy farmers of Michigan.

The milk producers' association, which was formed in 1917, has grown from a small group of dairy farmers to a large organization with a membership of over 4,000. The association has been successful in promoting the interests of dairy farmers by providing a variety of services, including marketing, education, and research.

One of the main goals of the association is to improve the quality of milk produced in Michigan. The association has been successful in promoting the use of modern farming practices, such as improved feeding and management practices, to improve the quality of milk.

The association also provides education and training programs to help farmers improve their farming practices. The association has a variety of programs, including workshops, seminars, and training courses, to help farmers improve their skills.

In addition, the association provides research services to help farmers improve their farming practices. The association has a variety of research programs, including field trials, laboratory tests, and surveys, to help farmers understand the factors that affect the quality of milk.

The success of the milk producers' association is due in large part to the dedication of its members. The members are committed to improving the quality of milk produced in Michigan and are willing to work together to achieve this goal.

The milk producers' association is an important organization for dairy farmers in Michigan. The association provides a variety of services to help farmers improve their farming practices and the quality of milk produced in Michigan.

It's simple chemistry. Calcium Carbonate is what eggshell is made of. A hen gets just enough from her food to form one eggshell only once a day. So if your product requires the best eggshell, use Calcium Carbonate. It's simple chemistry. The fact is, you can't get milk without a dairy cow, just as you can't get eggs without a chicken. And don't forget, you can't get milk or eggs without the farmers who raise them! It's simple chemistry. Use Calcium Carbonate, it's what eggshell is made of.

Milk Producers Re-elect Four Directors Nov. 4

In the 11th regular meeting of the Michigan Milk Producers' Association, held in Pontiac, November 4, four of the seven directors were re-elected. These directors are responsible for the management of the association.

The directors of the organization are elected by the members of the association and serve three-year terms. The directors are responsible for the management of the association, including the development of policies and programs, the allocation of resources, and the representation of the interests of the members.

The re-elected directors are: J. O. Armstrong, M. S. Ford, W. E. Rodgers, and A. E. Smiley. These directors will continue to serve on the board of directors of the organization for the next three years.

The Michigan Milk Producers' Association is an important organization for dairy farmers in Michigan. The association provides a variety of services to help farmers improve their farming practices and the quality of milk produced in Michigan.
