With A Strong Farm Bureau House Limits Debate On M'NARY-HAUGEN BILL; ADOPTION IS CONCEDED SIZE OF MAJORITY ONLY QUESTION

Haugen Bill Is Substituted For McNary Measure Just Passed By Senate; American Farm Bureau Presents Improvements Made On Prevarious Farm Relief Plans

As the Farm Bureau News goes to press the McNary-Haugen agricultural amendment to the proclamation being debated in the House at Washington, with debate limited to 16, hours, the Democrats of the Senate decided April 12, the Senate passed the McNary bill with a majority of more than two to one. When the McNary bill came over to the House, it was decided to substitute for the McNary bill, in order to clear some differences between the Senate and House versions of the bill, brought about by Senate amendments to the McNary bill.

Enactment of the Haugen measure by the House seems to be a foregone conclusion. The only question seems to be the size of the vote in its favor and the size of that majority when the time comes to consider passing the McNary-Haugen bill over the almost certain Presidential veto it faces because of the President's opposition to the equalization fee.

Advises from Washington say that the committee of the day time allowed to opponents of the McNary-Haugen plan have been allocated to Rep. Charles L. Van Zandt of Michigan and Rep. J. B. Jones of Texas, who will argue the debates plan as a substitute for the McNary-Haugen plan. In each case a promise of a report of the committee on Agriculture rejected the debate plan.

Opinions Washington and elsewhere seems to be that the McNary-Haugen plans with the equalization fee is the only real measure that the House can pass in the current session. Certain legal objections have been eliminated. The American farmers, however, should stop and consider whether a better measure cannot be substituted for the one now under consideration.

May Nature Calendar

(Prepared for Michigan Field Bureau News by The Cleveland Museum of Natural History)

"Not to have seen as much as arowning acquaintance with the birds and flowers takes a modicum of time. Sure there will be woodpecker after woodpecker, hard-billed and soft-billed to be heard and watched and you may get advice and help from the others who have been watching."

There is a faithfulness to White oak leaves, new flavor and all of the early spring flowers. Opening flower and budding leaves to the warmth of the new day. Spring is about us and we are watching the march of the seasons. It is a wonderful thing to have the opportunity to watch nature at her best. We all have a part in it and we should try to make the most of it.

The May Flowers - Flowers! Spring is a flower as well as a season. It is a time for growth and beauty. May flowers are a reminder of the beauty of nature. They can be seen in gardens, fields, and along the roadsides. They are a symbol of the coming of spring.

A few weeks with the celebration will enable you to appreciate the beauty of these flowers and bring them in to your home. You can plant a few of these flowers in your garden or flower bed. They will bring you joy and happiness as they blossom.

But the fields, meadows, roadsides, fields, flower beds, and the woods, are a reminder of the beauty of nature. The flowers are a reminder of the beauty of nature.

Directing Buying Is Not Good for Producer

In order to make cooperation an effective instrument, it is necessary that the producer understand the importance of the organization and that we work together for the common good. This will enable us to make the most of our produce and help others to do the same.

In the diagram, you will see the organization and the relationship between the producer, the consumer, and the organization. You will also see the importance of cooperation and how it can be achieved.

In order to make cooperation an effective instrument, it is necessary that the producer understand the importance of the organization and that we work together for the common good. This will enable us to make the most of our produce and help others to do the same.

The packers argue that when they sell cheese, they are giving the product to the consumer. The consumer is the one who pays for the product, and it is his or her decision to save farmer shippers in the organization and that we are working together for the common good.

Some Other Views of May 1, and Child Health

Careful Consideration Needed in Adding, To School Demands

By Mrs. E. M. MAGRIS

Two ages ago the workaday of May 1 as a day of celebration was extended to every youngster in the school system, and we have all sympathized with the sentiment of the movement. With the passing years the movement has brought to all of us a desire to contribute to the health and well-being of every child in our communities. But I am concerned that we not get so hung-up over other, so-called important things that we fail to extend this celebration worldwide. It is a day of health, a day of achievement, a day of hope.

Save the Tag and Sample Seed

Farmers in Michigan will reap a far richer harvest this fall, next year and subsequently, if they will enroll in the farm seed sampling program of the Extension Service, which is scheduled to begin in August.
