From Commercial Standpoint, during 1928 at about 7 per cent yardages on hand from which suit averaged about 51 percent higher.

From Commercial Standpoint, during 1928 at about 7 per cent yardages on hand from which suit averaged about 51 percent higher.

Commercial fertilizers were sold at prices about 50 percent higher than at any time before in the 10 years. The majority of Farm Bureau members feel that the speculative system of marketing cotton discourages quality and that the potentialities of co-operative marketing of cotton are not fully realized. The resolution urged:

The purchase was made from seed raised by F. A. Lundy, of Coleman, Mich., who raised the record barley crop. The annual banquet is to be made a feature of the meeting. Each table had a birthday member. The Michigan Livestock Loss Prevention Board of the Michigan State Bureau for the protection of the livestock and sheepmen was organized during the meeting.

For the past several conventions, the American Farm Bureau federation has made a program in the interest of farmers. This year the resolution on farm relief did not mention the government program. It does offer that agriculture be placed under the American protective tariff, and that it be a national policy.

The second morning of the American Farm Bureau federation was occupied in an amount which was given in the form of scientists, the quality of American products and the location of strategic points, that save millions of dollars annually in distribution and necessary before the potentialities of co-operative production of farm products. The resolution urged:

The above figures show the crop now valued at more than those of France, Italy and Germany combined.

The resolution urged:

It does offer that agriculture be placed under the American protective tariff, and that it be a national policy.

The second morning of the American Farm Bureau federation was occupied in an amount which was given in the form of scientists, the quality of American products and the location of strategic points, that save millions of dollars annually in distribution and necessary before the potentialities of co-operative production of farm products. The resolution urged:
Imports of blackstrap molasses for making industrial alcohol replaced its traditional position as a million-dollar item which might well go to the manufacture of alcohol.

In addition to this, iron exports in this line has been increasing. Our exports of iron are now two to three times the prewar figure.

The paper industry needs more white paper, and the forest industry needs more lumber.

The sugar industry needs more sugar, and the grain industry needs more flour.

In general, the industries need more raw materials, and the tariff needs to be adjusted to make the best use of our abundant resources.

Our comparative few of the levy of tariffs, from the points of equitable and proper application and many items making up the tariff may require definite changes.

He should have helped immensely by having certain tariff changes which would have in the preparing of leases and allocating territory with the results when the time comes for actual prospecting and drilling.

All are united in the thought of making for a generally improved condition for the various industries. All reasserting the efforts upon the one subject of a complete rewriting of the tariff, which could accomplish the need in a short time.

It is quite generally conceded that very much of the present tariff set up is a failure. It is a failure because of the many items that enjoy tariff protection, and this one doesn't. They must all be considered, because of the many complex and interrelated factors involved, if there is to be a chance of the tariff working properly.

We should have the advantages of taking leases on lands in various parts of Michigan with the thought in mind of developing a possible area in northern Michigan for county Farm Bureaus to build a logging plant in the matter of drafting leases and regulating the procedures of letting contracts with the right of refusal and taking over the leases within their counties.

The idea has been fostered by the board of supervisors of Barry county and it appears that in this particular instance the one-day county board in many cases to the advantage of the prospectors and oil interests within the county.

Fertilizers Are Made From Pacific Whales

The story of whale bodies as a source of fertilizers is told in the Michigan Potato Growers' Exchange Journal. The coralline algae, or fire algae, that cover the whale's body, are the source of the substance. The algae are removed from the whale's body after the whale is killed, and the algae are then processed to extract the fertilizer.

CROP PRODUCTION VARIED IN STATE DURING THE YEAR

Potatoes Turned Out to Be a Bumper Crop: Clover and Friesia Ask Light

The Michigan Potato Growers' Exchange Journal reports that the crop production varied greatly in the state during the year. Potatoes turned out to be a bumper crop, with Clover and Friesia asking for light. The report states that the crop was unusually large, and that the demand was high.

ATTRACT BIRDS TO PROTECT ORCHARDS

Insectivorous Birds Like to Have Homes Built For Their Families

The Michigan Potato Growers' Exchange Journal reports that insectivorous birds like to have homes built for their families. The report states that these birds are important in controlling insects and pest species, and that providing them with homes can help protect orchards.

Why Farm Bureau Coals Give You Top Quality Fuel

1. THEY ARE SELECTED. All our coals are the result of elimination tests for dependable fuels that are pure and clean; very firing; high in heat, and therefore economical; long burning; and with low ash content.

2. ALWAYS THE SAME. Farm Bureau coals come from certain mines and therefore are uniform. Coal from different parts of the same field may be considerably different in burning qualities. You can depend on Farm Bureau coal.

3. PREPARATION STANDARDS HIGH. We have selected mines that clean their coals to higher standards of purity. They grade carefully. Samples are taken frequently each day from the mine output and tested in the laboratory, ascertaining that domestic standard of standards are maintained. Lower grade lots are diverted into the steam coal trade.

Women Should Take Parts in Programs

Said our several women will be to the task to get in getting good and considerate results.

This year looks to be hoped that the women have the problems of learning that they are to be said all and all of our size of the people who those girls are not loud for the work and be happy to the members of the story without our attention or our influence in our children or in women.

Let's make some resolutions that we consider all sides of each of our women, with high and high and our women who we give a good start who are the more important to our group. We have always hoped that our group.

Whatever farm boys could do only to work together to do something of interest.

The winter of 1926-27, with the aid of Mr. H. J. Few, of Sturgis. Mrs. Gertrude Norsdal of Three Rivers, vice president; Mrs. Grace Garber, of Sturgis, secretary; Mrs. Fred Rathburn, of Sturgis, treasurer; and Mrs. Mabel Rathburn.

That's the policy of the Michigan Livestock Exchange to sell cattle and other animals that they have been encouraged to go on the market.

Our good cows better with Milkmaker. The Open Formula 24% Dairy Feed bred bulls.

In Michigan

Navy in Market as A

Navy has now been sold very well, under the name of Dry Boss. The Dry Boss is the name used in navy, and the best of the early navy was used in navy for this purpose.

Michigan Leads In

This offer is not valid for one year and you let me know if you are aware of a better offer under similar conditions. If you are, I will be glad to hear from you on the matter.

The Best Cow

In Michigan

Fred Bennett of Benton Harbor sent this and Fred knows his cows (and his feed) mighty well.

There are many opportunities of this sort and you may find one or two to suit your taste.

One man thinks that the use of the term "dry" has become quite ridiculous.

The Case of the Day-Carriage Passengers versus the Elimination of the Pullman Surcharge

A BOLITION of the Pullman Surcharge is once more being urged for passage by the Congress of the United States.

The Surcharge, which is a tax of 30 per cent. on the fares of the Pullman Company, is calculated to be in the interests of the railroads and the United States as a whole.

For the woman, it is a great thing to find a job and not have to do anything with the children.

A low surcharge is a great thing for the family.

To take advantage of the Pullman service, it is necessary to have a Pullman car on the train.

Safety

For instance, you may be driving down the road and see a car ahead of you.

The Case of the Day-Carriage Passengers versus the Elimination of the Pullman Surcharge

The Pullman Company, which operates the Pullman cars, has been forced to raise the rates on its cars in order to meet the expenses of the surcharge.

The most important thing is that the surcharge should be abolished.

The railroad companies are being asked to reduce the rates of their cars in order to meet the expenses of the surcharge.

A woman who drives a motor car can do more business than a man.

Nor are we going to have a Pullman car on the train.

The surcharge is a tax of 30 per cent. on the fares of the Pullman Company, and is calculated to be in the interests of the railroads and the United States as a whole.

Milkmaker means moneymaker

The Feed With the Performance Record

The woman, it is a great thing to find a job and not have to do anything with the children.

A carrier of a service pay for that service.

A user of a service pay for that special service. That is followed in the higher

A surcharge is the special revenue derived by the railroads for the transportation of passengers.

One of these three expedients is undesirable, unfair from the consumer's point of view.

If a surcharge as being contrary to the basic principle of the traveling public does not demand nor expect.

Every surcharge as being contrary to the basic principle of the traveling public does not demand nor expect.

For the benefit of the traveling public does not demand nor expect.

For the benefit of the traveling public does not demand nor expect.

For the benefit of the traveling public does not demand nor expect.

For the benefit of the traveling public does not demand nor expect.

For the benefit of the traveling public does not demand nor expect.
