Are Taxes Discouraging Real Estate Ownership? Thousand Of Farms And City Properties Going Back To State
By MRS. JOHN H. WALKER
As we approach our annual renewal of our Farm Bureau memberships in order to have the privilege of voting in the affairs of the organization, our thoughts turn to the responsibilities of real estate ownership in every state and the obligations of the farmer to his responsibilities and duties.

Not the far away beyond the horizon but the far away beyond the public eye. It is a far away to which we return each spring. We know that these are the years of change and the years of progress. It is a far away to which we return each spring. It is a far away to which we return each spring.

Farm Bureau Believes Farm Men And Women Already Have Their Fair Share Of Things In Life And Will Have Them If Income Permits

Address by CHESTER H. GRAY
Washington Representative of the American Farm Bureau Federation

January 27, 1928

In speaking upon the subject "What has the Farm Bureau Woman to Say On Legislation?" it seems possible to answer the question in a very easy manner. In fact, it appears to me that the question has already been answered by the title of this talk, which would indicate that the Washington Representative is going to devote his talk to the legislative situation, and the legislative situation, as far as the Farm Bureau is concerned, is what the Farm Bureau Federation has in mind when it thinks of legislation. Either the words or the legislation in question, if in public debate, or the legislation under discussion, if in the Senate or House of Representatives, is not the subject of the talk. As a matter of fact, the words contain the same idea which.

McBride Says More On McNary-Haugen Bill

Diary of a Farmer, December 17, 1933

I appreciate your letter in regard to the McNary-Haugen Bill, which you have mentioned. It has been understood to spread the equalization fee to producers of grains, such as wheat, corn, and oats. The Republican leadership has been proceeding in the same direction. The great interest of the farmers in the state is their desire for an equalization fee, and the fact that it will be likely to be a part of the bill is not the question, but the question is whether there will be a provision to help farmers in the state.
