Haul Utah Alfalfa Seed 125 Miles to Railroad

A herd portion of the alfalfa news was in Michigan at Utah alfalfa, most of which is grown in the Utah Basin region of Utah. The Utah State Bureau of Agriculture reported that the alfalfa seeding production section of the great Utah Basin is 125,000 pounds, and this is the highest tonnage of alfalfa seed ever produced in Utah for planting. The alfalfa seed is being shipped to railroad and truckers, a job which takes a number of days, depending on weather conditions. The Farm Bureau News has handled the photography of the load to the railroad and is presenting them here.

The seed will be handled by the proposed Manlove Standard Seed Company, which will handle the seed for two years for a fee of $2,500 per year and for an additional $250 per ton.

PATRONS' DIVIDEND COUPONS MEETING WITH SATISFACTION

ANY GET THEM SOON
All Members Are Asked to Give Book a Careful Import

The Farm Bureau's Patronage Dividend Coupons Book, now in the hands of the Michigan Farm Bureau Bureau of Agriculture and Industry, has been received by the membership with a great deal of interest. Thousands of members have made inquiries about the coupons, and many have received them in the mail. The first edition of the coupons was a great success, and it is expected that the second edition will fill their place in a very satisfactory manner.

The second edition of the coupons is now in the hands of the membership, and it is expected that the coupons will be distributed soon. The coupons are available to members of the Michigan Farm Bureau Bureau of Agriculture and Industry, and they are eligible to receive them.

The coupons are designed to enable members to plant and harvest their crops in season in the proper manner. The coupons are designed to enable members to plant and harvest their crops in season in the proper manner.

GERMAN FARMERS

REFUSE TAXES IN THEIR DISTRESS

Government Faces Problem as

April Nature Calendar

Agriculturalists Mark Time

Whitewater—Farmers all over Germany are having a hard
time and the Government is facing the
question of whether it is not their duty to
lessen their financial difficulties.

At a meeting in Berlin that
appeared to be attended
by the principal German
farmers who are anxious
to lessen their financial diffi-
culties.

There is considerable interest in the wool business at present. Many new wool growers have not yet been weaned off the cotton business

Plan Vital Tariff

Suitable policies and regulations will be necessary to encourage and reaffirm the interest in wool by the farmers. The wool pool movement has been gaining ground in recent years, and it is hoped that this trend will continue.
