HEAVY ENROLLMENT IN SALECS PREPARES TO SET NEW RECORD

Third Annual Farm Bureau Two-Day Sales Meet Is A Success

EXCHANGE MANY IDEAS

H. N. Tolles, President Of Sheldon, School.

In Chicago

September 24th, the first day of school was reopened for the 1,300 students of the Sheldon School in Sheldon, a village of 250 inhabitants, in Kishwaukee Township, in the northwestern section of McHenry County.

The superintendent of Sheldon, Mr. N. Tolles, reported in detail that the school is preparing for the 5,000 students of the district, and for the teachers who will be employed to instruct them. He said that the school is now ready for the first day of school, and that the teachers are thoroughly prepared for their work.

The school is a small one, with a enrollment of 250 students, and a staff of 10 teachers. It is well equipped with modern educational facilities, and it is expected to provide a excellent education for the children of the district.

The superintendent is a man of experience and ability, and he has the confidence of the parents and the community. He is well respected for his service to the school district, and he is looked upon as the man who will carry on.

The school is a public school, and it is supported by local taxation. The parents are required to pay a small tax for the support of the school, and they are also required to contribute a certain amount for the support of the teachers.

The school is well organized, and it has a good reputation for efficiency and excellence. It is expected to provide a excellent education for the children of the district, and it is looked upon as the school that will carry on.

SELLING THE IDEA

Some very fine work is being carried on this fall through the local promotion of the Co-operative Livestock Bureau. This is the matter and the manner of getting new members for the organization.

Just as in the past, it is the same old job of hammering away, telling and selling the story of the benefits that accrue from organized effort among farmers as well as in other lines of endeavor, but the prevailing note is the prevalent enthusiasm that is becoming manifest, which shows that the farmer is beginning to realize that a union, if it is to be used is an unprofitable venture outside of the Farm Bureau system, cannot be properly handled.

It is true that the various business sections of the organization are self-defining, so far as financial status is concerned. This should be the way of the world and if our other organizations could only leave nothing for the support of the other departments and in particular the housekeeping end, we would be able to carry on a whole season of this nature or carry on more profitably.

Farm Bureau has been able to do business service alone to farmers—have been able to accomplish but little in the fight for legislation, for improved or cheaper highway and other transportation facilities, and for all of the other social services which are offered to the farmers of this state through their organized effort.

What shall we do in the present situation? Well, if, as we are told, a general boycott was carried on in the livestock markets with excellent aid to the cooperative selling, there has been no back up of the cooperative selling. This is the only answer if a membership of individuals who were actually contributing their share to the cooperative movement.

The farmers have had the co-operative selling of livestock for years and years, and there is no change in the present situation. It is purely the same old story—thereby saving us the time and effort of having to sell our goods in the open market. The cooperative will be carried on as usual, and the only institution that we have to worry about is the manner in which the products are sold, because these are the only services that we have to sell.

The cooperative selling of livestock for years will be a short time, and it is purely a question of the price prevailing on the open market. This is purely a question of the price prevailing on the open market. This is purely a question of the price prevailing on the open market. The cooperative will be continued as usual, and the manner in which the products are sold, because these are the only services that we have to sell.

It is the same old story, and we are not the ones who should be thinking about it. We should be thinking about the manner in which the products are sold, because these are the only services that we have to sell.

GRANGE WOULD MAKE THE COUNTY SMALLEST SUPERVISORY UNIT IN ROAD PROGRAM OF THE TOWNSHIP

Many Resolutions Drafted For Improvement Of Agricultural Conditions In Michigan Get Consideration In Heads Of Delegates At Annual State Convention

The Michigan State Grange, in annual convention at Cadillac, October 11 to Nov. 7, went on record favoring the securing of additional aid from the state for improving and maintaining rural post roads. It felt that road taxes alone are not enough. The proposal to increase the salaries of state legislators was tabled to avoid political entanglements when resolutions covering the point were introduced, it was reported by Mrs. Durs Smith, state treasurer for the Grange, instead of being adopted as a convention action.

The organization reaffirmed its stand in favor of a state income tax law and recommended a change in the state inheritance tax law, that the additional provision making 60 per cent of the inheritance taxes collected within the state available to the state. The Michigan Farm Bureau, by the recommendation in the resolution noted above the adopting of a modified proposal having the effect of reducing the percentage of the inheritance tax collected within the state available to the state from 50 per cent to 40 per cent. The organization reaffirmed its stand in favor of a rate of 1 per cent on the state inheritance tax. The Grange will also recommend to the state legislature that a uniform rate of 1 per cent on the state inheritance tax be levied.

STATE WILL SHOW SCHOOL CHILDREN "OUTDOOR MOVIES"

Conservation Department is Working Up Films On Resources

TEACHES CONSERVATION

Mining, Oil Fields, Game And
Wild Life Scenes Are

To Be Shown

School children are to be taught the value of Michigan's natural resources through a series of "outdoor movies" that are being shown in the schools.

Why Farm Bureau Seed
Is Standard In State

Seed Expert Sells Advantages
Maintaining High Quality Product

By Ted Harter, Assistant Manager, Farm Bureau Seed Department

The Michigan Farm Bureau is the first to make an announcement and the first to meet a challenge that is receiving widespread attention: the national push to the winter feeding months.

The main argument has been that the new crop is excellent and will continue in its narrow rut without any change ought to be for the better.

The Michigan Farm Bureau, in cooperation with the Michigan State College of Agriculture, has been engaging the services of a representative to work with local committees of the county organization lost dollars have been shown to farmers.

"NO TREPASSING" LAW ADDRESSES ORDERLYNESS TO HUNTING SPORT

Law Requiring Sportsmen To Obtain Permits To Hunt

The new statute was enacted by the legislature in 1927, which provides that no person excepting those having an hourglass shall hunt game, until they have obtained a hunting permit. The purpose of the law is to bring hunting under the control of the state and to prevent the shooting of game for sport.

The Department has a process of obtaining and checking the permits, which is carried out in connection with the Michigan State College of Agriculture.

STATE IS FIRM ON SPUD GRADING LAW

Organized Farmers Seek To Have Shippers Abide By Requirements

In every case, when a farmer sells potatoes for the purpose of making his living, he should have a permit to do so. If he does not, he is liable to the penalty of imprisonment. The law provides for the punishment of anyone who sells potatoes without a permit.
