WESTERN PEOPLE APPRECIATE THE FARM PROBLEM

All Classes in Corn Belt Are Discussing the Staple
development of the country and its economic future. The farmers are making plans to increase production and improve efficiency. They are discussing the need for better roads, more water, and better marketing facilities. The farmers are working together to make their farms more profitable.

TAXES!

The state administrative board has released the tax lists for the year. The total amount of taxes collected is $4,000,000 less than last year.

URUGUAY INCREASES IMPORTS OF POTATOES

This year the potato harvest in Uruguay has been record-breaking, and the country is now importing potatoes from other countries.

CHAMPION SEED DEALERS OF STATE

MAKE TRIP THROUGH NORTHWEST AS FARM BUREAU SEED SERVICE GUEST

First Contest To Promote Alfalfa Seed Sales

Afforded Two Weeks Tour Of Utah And Northern Alfalfa Regions To 5 Leaders In Local Seed Industry

The Michigan State Farm Bureau Seed Service's trip to the alfalfa seed producing regions of Utah, provided for the local leaders in the seed industry to see the production methods. They were shown the production and handling of alfalfa seed. In addition, the trip included a visit to the headquarters of the Farm Bureau Seed Service.

INSURANCE WORK GIVEN APPROVAL BY 7 EXAMINERS

Status Of State Farm Mutual Auto Insurance Company

Reported Good

AUDIT 1927 BUSINESS

Report Favorable Finding On Claim Adjustment And Loss Settlement

The business of the State Farm Mutual Automobile Insurance Company has been audited, and the report indicates that the company is in a sound financial condition. The company has been in operation for 40 years, and it has a well-established reputation for honesty and fairness in handling claims.

POSTAL DEP'T. FINDS RULES VIOLATED

Record kept at a post office disclosed that the laws were being violated. The record showed that certain letters, postcard notices, or other written communications were being handled without proper authorization.

CUBA IS BIGGEST IMPORTER OF OUR RUBBER FOOTWEAR

Great Britain Second Among The Countries Importing American Rubber Footwear

Great Britain has long been a major importer of American rubber footwear. The country has a large market for this product, and it is used in many different industries.

SPUDS MADE: GOOD WILL TOUR

A better field-handled undertaker may be able to make a marketing forecast in the potato business. The potato crop was grown locally, and it is expected to do well. The farmers are hopeful of a good crop.

LIVESTOCK RATES CUT 12 PER CENT BY I. C. R. R.

The rates for livestock have been cut 12 per cent by the I. C. R. R.

IMPROVEMENT SEEN IN LIVESTOCK LINES

With the purchasing power of the pork producer in the market, the pork industry is expected to improve in the near future.

FEDERAL REPORT FAVORS MICHIGAN POTATO CROVERS

New Arrangement Makes Feed Available To Local Groups

The Pork Bureau has made arrangements to make feed available to local groups.

Savings Banks of Bloomington, 111., representing the State of Kansas; J. W. Nicolson, former Manager of the Farm Bureau, and Earle Nicolson, manager of the supply service; E. E. Unstead, president of the supply service; and G. G. Newell, superintendent of the supply service, have written a very interesting report on the trip. Some of the pictures which the group took during the trip are as follows:

- Leaving Kansas City, we found the weather very pleasant.
- We had a good time in Chicago, and the city was full of activity.
- We were able to get through the city without much difficulty.
- The trip through the countryside was very enjoyable.
- We had a very good time in St. Paul.
- We returned to Kansas City in the shortest time possible.

Michigan Farm Bureau News

A Newspaper for Organized Michigan Farmers
WE MUST STANDARIZED

In the city we are busy with the show. They are a lot of price cutoffs, many central, and their promises are returned by the house manager to the customer. And in such a case, whoever could pick up his commodities, the easiest and at the same reason, the easiest.

The home towns merchant has to follow the show more or less a price variable by price variable. But, the other tendency of offering a good grade of merchandise is his trade.

This means that the chain store method of merchandising is nothing new, and all the artificiality in the making necessary for the grower, especially the small producer, of such crops as tomatoes and potatoes, to keep to his own line, is to speak, and have his produce in the most marketable form. Just potatoes, or just apples or whatever the commodity may be is not sufficient today. It must be graded potatoes or assorted

This all means we farmers have in our adopt sales methods and supply the narrow and the deep pockets we adopt. We must be ready in our business affairs, even in the coming of a produce crop. The show line has taken a view a view which calls for expedience and a giving along with the oil, the modern methods of distribution. To follow this trend is a producer of potatoes and I am not sure if this trend is followed by the rest of the, of the remixed interests, each within its own ranks.

Standardization and proper handling and holding the word is a more praiseworthy condition for the period.

WATERWAY TRANSPORTATION

The result of the competition of the railroad probably affects that can be expected from the waterways where the shipping of the proposed waterway along the St. Lawrence river from the Great Lakes to the Atlantic.

A recent report filed with the War department along the route of enlargement through the Pennsylvania during the year ending June 30 was more than double that of last year, indicating the shipping service is increasing.

As the total tonnage of waterway transportation handled through the canal this year, the United States engaged in the payment of shipments and Commerce throughout the United States is estimated to amount to $1,420,000,000.

With more than 90 per cent of this tonnage handled for Commercial Continental of the United Kingdom, we get a fair idea of what an all-cargo waterway means in bringing the produce from the producing areas of the West to the great world markets, and from these vast ocean roads, where water is a nearly free water route along the St. Lawrence and is one of the greatest advantages that we have in comparison with the rail and river rate优势 which this means of transportation affords us.

A happy day when—ill appetites eradicated, all consuming mind, shall not have, the research of the world. Almost we could do this, unless there shall be neither a day nor a dimming of the earth—how could you do such a thing and the credits of these revolutions that shall have

STATE FORECASTS

BIG POTATO CROP, SMALL BEAN CROP

Expect Country As Whole To Turn Out Record Crop Of Potatoes

A crop report from the Secretary of Agriculture here today indicates that this crop and next year's crop of potatoes is moving ahead. The prospects are that this year's crop will be the best on record and that the United States will surpass last year's record crop of 1931.

Agricultural experts say that this year's crop will be larger than last year's and that the Michigan prospects are good. Michigan is one of the chief potato states and Michigan is estimated at 1,200,000 tons. Last year's crop was 500,000 tons.

Bones In Huron Sand

Tell Of Early Life

Dredges have made the discovery that bones of the Pleistocene age have been found in the sands of the Huron river. The bones are believed to be those of a extinct species of animal.

The bones were found near the mouth of the Huron river and were brought to the attention of the Geological Society of America.

The bones are believed to be those of a extinct species of animal. The species has been named the "Huron Sand Bony." The bones were found near the mouth of the Huron river and were brought to the attention of the Geological Society of America.

Women Are Coming To The Forefront
The "Wanted!" Sex Is Not So Weak When Allowed Full Rights
By Mrs. Ethel M. Wagner
Every man is a bit of a philosopher. The man who has been moralized or sanctified by the importance of the job he is doing is just as likely to be a bit of a fool as the person who has never done anything of importance at all.

If business is good, the man is able to defend his own weaknesses and ambitions. If the business is bad, he is able to defend the interest of those who are better than himself.

There are more reasons for the woman in business than there are for the man. But the man is better equipped to make use of the business situation than the woman. The woman is better equipped to understand the business situation than the man.

The man can live in a world of his own and get satisfaction from it. The woman can live in a world of her own and get satisfaction from it.

The man can work for the business and then go home and work for his family. The woman can work for the family and then go home and work for her husband.

The man can work for the business and then go home and work for his children. The woman can work for the children and then go home and work for her husband.

The man can work for the business and then go home and work for his wife. The woman can work for the children and then go home and work for her husband.

The man can work for the business and then go home and work for his family. The woman can work for the family and then go home and work for her husband.

The man can work for the business and then go home and work for his children. The woman can work for the children and then go home and work for her husband.

The man can work for the business and then go home and work for his wife. The woman can work for the children and then go home and work for her husband.

The man can work for the business and then go home and work for his family. The woman can work for the family and then go home and work for her husband.

The man can work for the business and then go home and work for his children. The woman can work for the children and then go home and work for her husband.

The man can work for the business and then go home and work for his wife. The woman can work for the children and then go home and work for her husband.

Farmers Interested in Improvement of Soil

**Definite Cropping Program Under the Keystone Rotation Plan, As Conducted On The Farm Of The Pennsylvania R. R., Shows Results in Improved Crops**

Farming Circles prize an Indiana farm of 160 acres, 800 feet long by 200 feet wide, that is making a distinct advantage of having a definite cropping program under the Keystone Rotation Plan. The fact that four of the leading hog-producing states are producing returns and in some cases are running an orange colored culture, would indicate that a market is available for this year a crop of 901,000,000 bushels and Canadian crop

In the Keystone Rotation Plan, a single ton-litter is another factor in the hog price. The hog price "broke" from $2.50 to $2.75 per 100 pounds, according to a survey, and the outlook in the middle of September, according to a survey, is that heavy hogs may be a small crop, at best only, and possibly, with crops of peas and oats, will not have manure enough to go around, and that they can very profitably use commercial fertilizers, particularly if they are in wooden cages, the market is available for 100,000 pounds of manure. But at that, they find that they can use commercial fertilizers, particularly if they are in wooden cages, the market is available for 100,000 pounds of manure.

Thus, the increased seeding cost per acre should not exceed $1.75 on wheat. The average increase in yield is 3 to 5 bushels. Furthermore, this disease free, noxious weed free seed production, is reflected at harvest. Such superiority is reflected at harvest. The increased seeding cost per acre should not exceed $1.75 on wheat. The average increase in yield is 3 to 5 bushels.

Several Tor-Cherry Lights

The 1927 budding period, in which cherry growing is in 24 states, was characterized by a remarkable increase in the number of cherry trees. The number of cherry trees in 1927, as was reported in 1926, was 50,000,000, with an estimated increase of a ton of more than 16,000,000 trees.

The number of cherry trees in 1927, as was reported in 1926, was 50,000,000, with an estimated increase of a ton of more than 16,000,000 trees.

**Farm Bureau Quick Heat Coal**

Our local distributors for this well named, stable, heavy southeast Kansas cool for cooking or heating.

Quick Heat gives you the five things you want in a good domestic coal:

1. **Pure Heat Coal.** No foreign matter.
2. **Quick Kindling.** It will catch and fire at once.
3. **High Heat.** Therefore economical.
4. **Long Burning.** With intense even heat. Can be used like wood.
5. **Low Ash.** Without clinker. Quiet 'Heat's' secret.

Quick Heat has a great sale by our local distributors. It is a coal that will give you much satisfaction.

Michigan Farm Bureau Supply Service, Lansing, Michigan

**State Farm Mutual Auto Insurance Co. of Bloomington, Ill.**

**Provides The Best Insurance Protection Available.**

**Our Rates Are Reasonably Low.**

We have small reserves and surplus to enable us to offer automobile insurance, based on low rate of operation. Assets of the company exceed $40,000,000, and represent the business of more than 150,000 satisfied policyholders in 31 states. Less than two years of operation in Illinois has brought it to a third largest one in the State. Our risks are almost entirely farm risks.

Our Agency operates in every community. A local representative in your neighborhood will gladly call and explain our policy. If you have not already done so, wire the Insurance Service, Michigan State Farm Bureau, Lansing, Michigan
