**SEEN WOOL POOLING AS ONLY POSSIBLE SHOW FOR GROWERS**

Pooling Places in Michigan Ask Members to Go to Local Demand

**BUYERS SEEK CONTROL**

Condition of World Market Is Described at Local Growers' Meetings

For the first time in the history of the number of Michigan wool processors of the Michigan Farm Bureau, a wool pool has already been set up and wool growers have already seen and will soon see the fruits of their labor. Michigan wool growers have been working with the wool market and through a better pool and a better plan of marketing, they will be able to get a better price for their wool than ever before.

The general plan for the pool will be to pool all wool grown on the farm. Wool will be accumulated in a central warehouse. The warehouse will be either owned or managed by the Michigan State Farm Bureau and in the near future, Michigan wool growers will have a central place to sell their wool.

The reason for this situation is that the wool pool is an answer to the problem of the wool market. In the past, wool growers have had to sell their wool to local dealers and many times, because of the lack of demand, they have been forced to sell at a loss.

Mr. Walker described the general situation as one where the wool pool was being established. He showed how the Michigan State Farm Bureau was working with the wool growers and how a better plan of marketing would be set up through the wool pool.

The wool pool is not only good for the wool growers but it is also good for the processors and the manufacturers. The wool pool will provide a better market for the wool growers and a better market for the processors and manufacturers.

The wool pool is the answer to the problem of the wool market. It is the answer to the problem of the wool growers. It is the answer to the problem of the processors and manufacturers. It is the answer to the problem of the wool market.

Mr. Walker went on to say that the wool pool would be set up in the near future and that it would be a better plan of marketing than ever before.

The wool pool will be set up in the near future and it will be a better plan of marketing than ever before. It will provide a better market for the wool growers and a better market for the processors and manufacturers.

**THE STATE OF OUR ADJACENCY**

Prof. Fred W. Green has been presented with a manuscript prepared by the United States Department of Agriculture, based on the history of the amount appropriated for various purposes under the appropriations bill for the fiscal year 1921.

In addition to the several appropriation millions for the state at large, the Appropriations Committee, at its meeting on Monday, February 12, approved an appropriation of $5,000,000 for the settlement of the Eastern States.

This appropriation is necessary to the settlement of the American wool market at a time when the wool growers are facing a difficult situation. The wool growers need the support of the government to help them through the difficult times.

Although time for adjournment was called at 3:30 P.M. on Wednesday afternoon, March 1, it was not expected that adjournment would be made until Thursday morning, March 2.

The Appropriations Committee, on Wednesday, decided that the adjournment would be made until Thursday morning, March 2.

The committee decided that the adjournment would be made until Thursday morning, March 2.

COUNTY GROUP MEETINGS PLANNED TO GIVE MEMBERS OPPORTUNITY TO ASSIST WITH A UNIFORM PROGRAM

First Meeting Under the New Plan Is Slated For June 4, at Kalamazoo and Atwater, on June 5, to be Held at Paw Paw, Eastern Part of The State

A new departure in the matter of holding Farm Bureau district meetings is planned for this summer, starting with meetings in several districts in June. Under this plan, the entire membership in each district will be called upon to participate.

The district meetings of the past, since the state organization first adopted the plan of holding district meetings every year or so, have been largely conference meetings, participated in by the officers of the several County Farm Bureau organizations in each district.

This method of directing the activities in the districts has worked to a decided advantage for the entire organization and the results in the work of the district plan have been truly gratifying. The new plan is designed to carry the benefits of the district plan even further down the line of the membership.

At these district meetings as called, beginning in June, the members will be given on hand information of the work in which the American Farm Bureau Federation is engaged and it is expected that an increased number of members will be interested in the work of the district plan.

The districts are to be divided as follows:

- **District One**: Kalamazoo County and Calhoun County, with about 1,000 members.
- **District Two**: Berrien County, with about 500 members.
- **District Three**: Cass County, with about 1,500 members.
- **District Four**: Allegan County, with about 1,200 members.
- **District Five**: Van Buren County, with about 1,300 members.

The districts are to be divided as follows:

- **District One**: Kalamazoo County and Calhoun County, with about 1,000 members.

AMERICAN SYSTEM OF SELLING WOOL CUTS FARM PRICE

Comparison With Selling in Other Countries Shows
Plan Needs Change
SELL WOOL TOO QUICK

Auction System of Selling Wool Is Causing Farmers Trouble Throughout World

By J. P. Walizer, Consulting Specialist, C. U. Department of Agriculture.

This is the second part of a series of articles on this subject appearing in this and the next issue of this magazine. The first article appeared on February 22.

Considerable speculation in the sheep and wool world over the recent great drop in prices of wool in the United States is due to the auction system of selling wool. This system is now being adopted in many of the wool-producing countries of the world. It is being held up as a great improvement over the old system of selling wool at the different markets. That system was a good one when wool was a luxury and was brought to the market by a few men, but it has failed to meet the requirements of modern times when wool is sold to the world at large, and when there are thousands of growers who are interested in the production.
Radio Is Used To Tell Story of Farm Bureau

Michigan Farm Bureau: "The Air" Daily Far

Farming Features

The Michigan Farm Bureau, which was formed in 1927, has become one of the most important organizations in the United States. It is the largest and most powerful farm organization in the world, with nearly a million members in every state. The Farm Bureau is dedicated to protecting the interests of farmers and rural communities, and it works to improve the economic well-being of farmers through its advocacy, education, and technical assistance.

The Farm Bureau is active at every level of government, from local to national. It has representatives in each state and in every congressional district, and it works closely with elected officials to ensure that farmers' voices are heard. The Farm Bureau also provides technical assistance to farmers, including crop and livestock management, marketing, and financial planning. It is a valuable resource for farmers seeking to improve their operations and increase their profits.

In addition to its advocacy and technical assistance, the Farm Bureau also provides a range of services to its members, including insurance, health care, and legal services. It is a comprehensive organization that is dedicated to serving the needs of farmers and rural communities.

The Farm Bureau is an important partner in the effort to improve the economic well-being of farmers and rural communities, and it is a vital resource for those seeking to improve their operations and increase their profits. Whether you are a small farmer or a large-scale operator, the Farm Bureau can help you achieve your goals and reach your full potential.

FERTILIZER MATURERS

CORN CROP ENRICHED

And Increases the Yield Per Acre

The feeding value of mature corn is much greater than corn which has not been hardened. State College tests show that fertilizers on corn ground matures the crop from a week to ten days earlier, and increases the yield.

The College finds that $1 invested in the right fertilizer can be expected to return $1 to $3 or more on the investment, in increased yield per acre. Farm Bureau fertilizers give the young plant the quick vigorous start that is so important for early maturity and increased yield per acre, as well as additional nitrogen, phosphoric, and potash for quick establishment and vigorous growth.

We feel the feeding value of mature corn is much greater than corn which has not been hardened. State College tests show that fertilizers on corn ground matures the crop from a week to ten days earlier, and increases the yield.
4 COUNTIES MOVE TO REDUCE THEIR ASSESSED VALUES
Sanilac, Huron, Lapeer and Tuscola Counties Call For Tax Survey
Help This Year
Seeking to gather information for the purpose of bringing about a reduction in the local taxes, numerous residents of Sanilac, Huron, Lapeer and Tuscola counties have petitioned the county commissioners to conduct a tax survey in each municipality.
A somewhat general survey of real estate assessed in Sanilac county shows that assessed valuations are far below the market value of the property. The county assessors estimate that the market valuations varying from 31 to 41 per cent of the assessed market value of the farms in that county were divided in this preliminary survey. Moreover, the assessed valuation of the farm lands in Sanilac county is far below the value of the land by 41 per cent.
This survey has already been launched by John Goodall, secretary of the County Farm Bureau in Sanilac county, who is conducting the survey in the county seats and the larger settlements. The survey is being made by the County Farm Bureau in cooperation with the State Farm Bureau.
