FLOCK INSPECTION SHOWS POOR LAYERS
Proper Feed Is Important For Greater Profit From Farm Hens.

By R. H. Addy, Farm Bureau Feed Service

A flock inspection of a number of broiler flocks in central Michigan area showed that the condition of the layers is not too bad. Lack of adequate feed has been a definite factor in many cases. The layers should receive a better diet.

MARKET IS UNSAFE FOR SPECULATIONS IN WHEAT & BEANS
Elevator Exchange Sees No Prospects Of Early Improvement.

The market for wheat and cots is unsatisfactory, according to the Elevator Exchange. The market is not expected to improve until the early part of 1929.

DETROIT MOVES TO GET FIRST DIP IN STATE ROAD FUNDS
Gasoline, Vehicle Taxes Ate Canning City Hands To Begin Bidging.

The Detroit City Council has authorized the mayor to seek a new source of funds for the city's road construction program.

Life Guards Restore 43 Drowning Bathers
Life exists on the building of local and state organizations, including the American Farm Bureau Federation. In the past 20 years the number of persons who have drowned has been reduced by 50 per cent in large part because of the work of local and state organizations.

Excavators Unearth Historic Millstones
Workmen excavating for the cellar of a house in St. Joseph, Michigan, recently discovered a group of millstones. The millstones were used to grind corn into flour.

Let’s Talk About Automobile Taxes

Motor vehicles are taxed in all 36 states of the United States. They range from 3 cents per hundredweight in Delaware, Iowa, Michigan, Pennsylvania and Tennessee, to $10.50 with a $7.50 fee in New York. Massachusetts now levies an automobile tax at the rate of $.50 per $10 of value. The tax is collected at the time of registration; the last time the tax was collected in New York was 1938. The tax is levied on the value of the automobile, not the benefit derived from its use.

The average total tax per motor vehicle in Michigan ran $8.77 for the year ending June 30, 1939. The average total tax per motor vehicle in New York for the year ending June 30, 1939, was $8.64. The average total tax per motor vehicle in Massachusetts for the year ending June 30, 1939, was $8.54. The average total tax per motor vehicle in New Jersey for the year ending June 30, 1939, was $8.45.

These figures include all taxes on motor vehicles, except the tax on the use of motor vehicles, which is a tax on the use of motor vehicles, and is a tax on the use of motor vehicles, and is a tax on the use of motor vehicles, and is a tax on the use of motor vehicles. The average total tax per motor vehicle in Michigan for the year ending June 30, 1939, was $8.77. The average total tax per motor vehicle in New York for the year ending June 30, 1939, was $8.64. The average total tax per motor vehicle in Massachusetts for the year ending June 30, 1939, was $8.54. The average total tax per motor vehicle in New Jersey for the year ending June 30, 1939, was $8.45.

A Farm Observation Of Government Cost

New Revenues Should Serve To Lighten Burden Of Agriculture

One-third of the farmers live in families that are making a profit, Mr. Perry stated. This is a startling statement and one that should be quoted to all farmers. Mr. Perry said that this is a startling statement and one that should be quoted to all farmers. The statement is based on the fact that the government is making a profit from the sale of livestock and that the farmers are making a profit from the sale of produce.

HENRY FORD BUYS A COMPLETE LOG CAMP

Old Lumbering Methods Are Preserved For Future Generations

Henry Ford, through his representatives, has purchased a complete log camp in Michigan for the purpose of preserving old lumbering methods. The camp is being restored to its original condition and will be open to the public for educational purposes.

The camp includes a variety of traditional lumbering equipment, such as grub hooks, loaders, and saws, as well as historical records and photographs of logging operations. The camp aims to promote the understanding of the role of logging in American history and the importance of preserving such practices for future generations.

DO YOUR OWNSELLING

When you kill your stock to raise money for your Crop  Organization- Commission Men or your friends will get the lion's share. With the help of your friends you can get much more money. Do your own selling.

Guthrie Brothers, Phoenix, Ariz.

FEWER CATTLE ARE PUT ON FEED NOW

Some cattle raisers are still feeding cattle, but the majority have stopped feeding for the season. This is because of the high cost of feed and the low prices for cattle. Cattle raisers are now focusing on improving the quality of their cattle through selective breeding and proper management practices.

DEER HUNTERS ARE TO WEAR BUTTONS

The Department of Conservation will require deer hunters to wear bright orange buttons on their clothing. The buttons are designed to increase visibility, making it easier for other hunters and drivers to see deer hunters in the field.

Corn Borer Control Calls
For Co-operation In Growing Ranks

The Michigan Farm Bureau is making a special appeal
for co-operation in the corn borer control campaign.

Corn borer control is necessary and is possible
but control work demands the co-operation of
all farmers. The borer has already reached
this state, and it is only a matter of when,
not if, the complete borer control campaign
will have to be made. The success of the re­
ports of the borer in Michigan in recent years
has been due entirely to the co-operation of
farmers in caring for their own corn and in
reporting observations of the corn borer in
Michigan.

The corn borer is a very destructive insect, and
is one of the worst pests of the corn crop in
the world. It attacks corn in the tassel stage
and in the ear or on the stalk. When the borer
pierces the corn, it lays its eggs in the kernel
and the larva begins to feed on the food
material in the kernel.
