FREIGHT RATES ON GRAIN SHIPMENTS RECEIVE BIG CUT
Michigan Farmers Expected To Benefit By Order This Season
FARM BUREAU ASSISTED
About 14 Per Cent Lower Rate Is Ordered On Michigan Crop.
In the interests of the Eastern shipping public, freight association members, who have not already done so, are requested by the National Farm Bureau Federation to reduce freight rates on grain shipments from Michigan to all points. The recommendation is made by the National Farm Bureau Federation, of which Michigan is a member, in an effort to secure co-operation in the reduction of shipping costs on farm products through a common action on all co-operating lines.
The reduction will save considerable money to the farmer, and is expected by the Farm Bureau Federation to result in a reduction of shipping costs on other farm products.

LIFE INSURANCE

Without using ads in the way of blatant advertising, life insurance as a business has developed so rapidly and so steadily in the last few years, that no one can take a responsible position in the field without going almost staggering. It is a business that is taking on so much importance that one must have an. idea of its position and its growth in the mind of the general public. A great many people have had an idea of the importance of life insurance, but most of them have had not an idea of the real value of life insurance. The public has not been aware of the true value of life insurance, but it has been aware of certain phases of the business that are considered to be of importance. The result is that the public has not been aware of the true value of life insurance, but it has been aware of certain phases of the business that are considered to be of importance.

We all know there are a lot of men in business who do not believe in life insurance, but who think it is the big thing. However, the public has not been aware of the true value of life insurance, but it has been aware of certain phases of the business that are considered to be of importance.

The public has not been aware of the true value of life insurance, but it has been aware of certain phases of the business that are considered to be of importance.

**ICE WELL PROVES SUCCESSFUL PLAN FOR COOLING MILK**

First Experiment Shows At Simple Process Of Refrigeration

The well for cooling and storing water and cream on the farm of the refuge. The well has been in operation for several weeks and is showing results that will be of great interest to other farmers who have not yet made use of the method. The well consists of two pipes, one of which is a 2-inch pipe and is located in the field. The other pipe is a 4-inch pipe and is located in the field. The water is stored in the well and is drawn from the 2-inch pipe. The well is equipped with a pump, which is used to pump the water into the field.
