SEN. SMOOT TELLS WHY SUGAR BEET INDUSTRY DROOPS
American Interests Want To Kill Denver Sugar Production.

In the April 12 edition of the News.

In the United States Senate.

In the United States Senate, at a hearing before the Joint Committee on the Administration of the Internal Revenue, the statement of the proposed increase in the gross sugar duties of the Mexican sugar, as a means for ensuring that what is called the "exclusion of foreign competition," was presented by Senator Reed Smoot of Utah. The Senator was the chairman of the committee, and it was his duty to present his views on the subject. The measure, which was introduced by the Senator, was designed to prevent the importation of Mexican sugar, and to give a preference to the domestic sugar industry.

The Senator stated that the purpose of the measure was to protect the sugar industry of the United States, and to prevent the importation of Mexican sugar. He said that the sugar industry of the United States was in a state of depression, and that the importation of Mexican sugar was causing great suffering to the sugar growers of the United States. He said that the measure was necessary to protect the sugar industry, and that it was a matter of public welfare.

The Senator further stated that the sugar industry of the United States was in a state of depression, and that the importation of Mexican sugar was causing great suffering to the sugar growers of the United States. He said that the measure was necessary to protect the sugar industry, and that it was a matter of public welfare.

The Senator further stated that the sugar industry of the United States was in a state of depression, and that the importation of Mexican sugar was causing great suffering to the sugar growers of the United States. FIND CORN PAYS GOOD DIVIDEND ON FERTILIZER COST
Fertilizer On Corn Returns $2.38 For Every $1.00

Although a recent survey shows that for every dollar spent on fertilizer, farmers may get back only 24 cents for their money, there are those who still believe in the value of fertilizer. Michigan State College, through its soils department, has had the opportunity to test many different fertilizers on fields of corn. According to the Michigan State College Bulletin, each bushel of corn grown from a ton of fertilizer returns $2.38 for every dollar spent on fertilizer. This is shown by the fact that for every dollar spent on fertilizer, the farmer can get back 88 cents for his money. This is a substantial return on his investment and is proof of the value of fertilizer.

CROP OUTLOOK FOR MICHIGAN
Increased Acreage Advised On Alfalfa, Feed Crops, Bota, Only.

To the agricultural production of Michigan, the increased acreages of alfalfa and feed crops are advised. This is due to the increased demand for these crops. Alfalfa is important not only for its own production but also for its ability to develop a soil that is rich in organic matter. Feed crops, on the other hand, are important for their ability to produce a large percentage of protein.
