Farm Bureau Pledges Farm Board Support

Wants Price Stabilization Extended to Other Crops Than Wheat, Cotton; Will Defend Marketing Act; Twelfth National Convention at Boston.

— By Robert K. Conner

Boston—Full support and co-operation with the Federal Farm Board in its efforts to administer the Agricultural Marketing Act was pledged by the American Farm Bureau Federation at its 12th annual convention here, Dec. 8-10.

Price stabilization in wheat and cotton were endorsed. It was recommended that such stabilization activities be extended to other surplus crops.

Farm Leaders Say No Support Needed.

Legislation.

Congress was asked to amend the Agricultural Marketing Act to extend price stabilization activities to other crops than wheat and cotton, to be, however, broad enough to include the 3,000,000 acres of surplus crops. Full support and co-operation with the Federal Farm Board in its efforts to administer the Agricultural Marketing Act was pledged by the American Farm Bureau Federation at its 12th annual convention here, Dec. 8-10.

Support of the board was also asked in extending price stabilization activities to other surplus crops, to be broad enough to include the 3,000,000 acres of surplus crops. A Moscow and the Taxpayers

Senator Lenon tells us that Michigan's state and local bonded indebtedness is $800,000,000 and the annual interest which must be raised by taxation amounts to more than the entire Michigan general property tax for all purposes. Twenty years ago, according to Mr. Lenon, our general property tax for all purposes was $55,000,000. Today it is $265,000,000.

A Northwestern University professor has calculated that Chicago is spending $200,000,000 annually in governmental support for public service industries such as the electric, gas, and water services. In all, we have spentand are still spendinga sum which, by any definition of reasonability, must be considered an outrage upon the community.

The trend toward public utility support of private business is coming from spokesmen for business. They argue that local and state public expenditures should be applied toward justifying local and state public expenditures before we vote on the future use of local and state bonded indebtedness. Two things that the voters can do for lower taxes:

1. Justify local and state public expendures before we vote for them; insist that our public officials do likewise before authorizing any public expenditures.

2. Have stricter property taxation laws. Millions could be saved on account of taxes if a law were passed which would make it impossible to purchase a home below certain limits. The federal government was spending $1,000,000,000 in 1909. That's going some for a single city. It's also going some for a single State.

The trend toward public utility support of private business for all of us any more than any business leader has been able to lead us into the depression, no man can predict with the turn will come, or what must come before the turn. Too many factors involved.

Two things that all of us and every one of us could do is have more taxes. Justify local and state public expendures before we vote for them; insist that our public officials do likewise before authorizing any public expenditures. Money that hasn't been spent or committed can't be spread on the tax rolls. Economies effected should be applied toward reducing the total tax to be spread.

Business News Farm Board in Kindlor Light

At least this year for the first time in three months the Federal Farm Board's Grain Stabilization Corporation has been credited with secretly buying wheat to prevent a collapse in prices. The West's flour mills were getting ready to barter huge quantities of wheat for cash. But the wheat was bought and made its way to the Midwest. The Federal Board's bond, a million-dollar bond of cash wheat and futures under its control.

Sentiment in favor of the Board efforts to hold United States wheat prices against world wide depression that has sent markets outside this country to extreme low levels apparently is being growing.

Farm Board Must Use All Powers

Farm Board has had its hands tied. Its work has been undone by the speculators. Mr. Arthur, President of the Farm Board, said the Board had had its hands tied. The Board must be given all the power it needs in order to do its work. It is a great pity that the Board is not given the power it needs. It is a great pity that the Board is not given the power it needs.

Black Underwear Lasts But 16 Days in Auto Show Tempering Room

By A. K. CLEVELAND

Black underwear is usually described as a fast-fading material. Until recently, however, under the severest tests of time, and as comes to illustrate the statement, it is believed that a single eviction will last from 10 to 16 days.

A few days ago, a gentleman was on his way from Chicago to Detroit. He was involved in a car accident and was rushed to the Detroit and Northern Hospital. The emergency room was crowded with patients and the only available bed was taken by a man who had been there for the past three days. The gentleman had been brought to the hospital by a friend who had been there for the past three days. The gentleman had been brought to the hospital by a friend who had been there for the past three days.

A mild temperature was found to be the cause of the frequent change of underwear. The patient had been wearing the same underwear for the past three days. The patient had been wearing the same underwear for the past three days.

The medical staff at the hospital decided to change the patient's underwear every day. The patient was placed in a small room adjacent to the emergency room. Each day a new pair of underwear was changed. The new pair was placed in the emergency room and the old pair was placed in the small room. This process was repeated until the patient was discharged from the hospital.

About 16 days later, the gentleman was discharged from the hospital. At the time of his discharge, a new pair of underwear was placed in the emergency room. The old pair was placed in the small room. This process was repeated every day.

Farm Loan Associations of the states

Business Leader Addresses
American Country Life. A.

Businesses in the small towns and rural areas are hiring, according to a survey made by the National Farm Loan Association. The survey shows that in the past year, the number of men employed in rural areas has increased by 10%. The increase is due to a number of factors, including the increase in the number of farmers who are able to make a living on their own, and the increase in the number of businesses that are able to operate profitably in rural areas.

The survey also shows that the average wage for men employed in rural areas is $8 per day, which is slightly higher than the average wage for men employed in urban areas. The survey also shows that the average age of men employed in rural areas is 35 years, which is slightly younger than the average age of men employed in urban areas.

The survey shows that the number of men employed in rural areas is increasing, and that the number of businesses that are operating profitably in rural areas is increasing. The survey also shows that the average wage for men employed in rural areas is increasing, and that the average age of men employed in rural areas is increasing. The survey also shows that the number of businesses that are operating profitably in rural areas is increasing.

Christmas Giving

By Mrs. Milton Wagner

As the holiday season approaches, I am reminded again and again of the beauties of giving a gift. And if it is an "Xmas" gift that is to be given to those in our immediate circle, I find that the gift is best if it is something that the person has been desiring, something that fits his needs, that is offered in the name of love and affection.

One of the most beautiful gifts that I have ever received was an heirloom pearl necklace that has been passed down through the family for generations. It was a gift that was meaningful because it represented the love and affection that had been passed down through the generations.

I think that gifts are the best when they are personal and meaningful. A gift that is chosen with care and thoughtfulness is one that is truly appreciated.

When I give a gift, I try to think about what the person would really like. It could be something practical, like a new book or a piece of jewelry, or it could be something more personal, like a piece of artwork or a photo of a memory that is special to them.

I think that gifts are one of the best ways to show someone that you care. It is a way to express love and affection, to let someone know that you are thinking of them, and to give them something that will make them feel special.

So, as the holiday season approaches, let us remember to give gifts that are personal and meaningful, that are chosen with care and thoughtfulness. Let us remember that it is the thought and the love that goes into a gift that makes it truly special.
**Federal Bean Grades Come To Michigan**

**Great Niece**

NEWS'S asks Inspector What That Means To Farmers.

Lansing—Michigan bean growers have been promised that the United States Bureau of agriculture will handle the grading of the state's shares in the world's wheat market during the current session.

Recollect for foreign grades by the bureau of agricultural economics, the secretary of agriculture, and the War Department in Cleveland, Ohio, said the state gave the public a clear idea of the price it would pay for top grade beans, and for others of the respective sections.

The secretary of the Michigan bean association discussed the question of the state's rights in the market and the possibility of using the federal grading service for foreign beans.

The secretary said that the state would like a good service in the grading of its beans, and that it would be willing to pay the price for the service.

Mr. Kittle was asked if the state had any price in mind for its beans.

"There is no price in mind," he said. "We want a good service, and we will pay the price for it.

The secretary of the Michigan bean association said the state would like to see a good service in the grading of its beans, and that it would be willing to pay the price for the service.

In one sense his work is like the Ein-...
