ELEV. EXCHANGE
RE-MAKES STATE'S GRAIN MARKETING

Has Become Largest Handler Of Grain And Beans In State.

82 ASSOCIATION MEMBERS
Financial Success Is No Less Remarkable Than Its Growth.

The Michigan Elevator Exchange is one of the best-operating and most
active of the state's grain and bean associations, and its members, the
herald the fact that in 1930 the exchange handled an estimated 10,000,000
bushels of grain and beans. The exchange is handled by honor, and its
yearly net income has been distributed among the members of the

COFFEE, BANANA, RUBBER DISEASES TAKE GREAT TOLL

Nations Sometimes Lose An Industry And Have To Start All Over Again.

While there are many ways in which coffee plantations are affected by
diseases, one of the most serious is the “coffee rust.” This disease is
found in most countries where coffee is grown, but it is most
serious in those countries where coffee is the only crop grown.

It is estimated that coffee rust has caused a loss of $25,000,000 to the
coffee growers of the world. The disease is caused by a fungus
which attacks the leaves of the coffee plant, and it is spread by
wind and water. The spores of the fungus are carried by
air currents and are blown from one plant to another. The

1930 Bean Acreage
Highest In History

Beans are grown in the state of Michigan, especially in the counties
of Oakland, Macomb, and Washtenaw. The total acreage of beans
grown in the state during the 1930 crop year was 1,200,000 acres.

The Senate passes the bill to establish the Children’s Dental Health Month. The senator notes that this initiative is a step forward in addressing the oral health needs of children across the state. The senator emphasizes the importance of early intervention and preventive care in maintaining good oral health. The legislation will require schools to provide dental education and screenings, and it will allocate funds for community dental health programs. The senator invites colleagues to support this important legislation for the well-being of our youth.
Bureau Dedicated To Better Farm Life

It Would Solve Problems That Hold Us Back Says Winter

"Twelve years ago American farmers
produced an average of 1,700 bushels
of corn per acre. Today this average
has reached about 2,600 bushels. Both
this increase in standards and the
improved soil fertility, have resulted
in a higher standard of living for farm
families who have excellent judg­
ment."

Farmers' Day, Friday, August 1,
Michigan State College has a
program for those who are interested.

New Elevator Exchange Remakes Map for 31 Counties

The Soil of Michigan

KENT CO. FARMS
SOILS DESCRIBED
New U. S. Map For County Tells Everything About Soils

All the soils in our farm is very good. Michigan, Indiana, Michigan, Wisconsin, and the
Midwest have been mapped the past few years. The map will help farmers understand the
quality of their soil. They can see where to plant crops that are best for each type of soil.

Economy and Modesty

This year’s prime in economic in feeding—
seedling and fertilizing. Economy is like modesty—there are two kinds—true
and false. False economy is often a waste of time and effort and false
fertilizing is often a waste of money. True economy is based on good
judgment and true fertilizing is based on sound principles.

Feed Wheat To Help The Profits, College Advises

Provision Markets Permit Its Use In Bread Crops

One way of obtaining a profit from this year’s crop of wheat is to use it in bread crops, which
will bring a better market than wheat. The demand for bread is greater than the demand for
wheat and the prices are higher. By using wheat in bread crops, farmers can increase their

Economies and Modernization

In the future, farmers will have to be more economical and modernize their operations.
