Filing 172,000 Names For Reapportionment

Grand Rapids Political Aid Helps Detroit Court Refund

The Wayne county ticket petition to settle the political reapportionment of the legislature in the November election is to be filed in the Court of Appeals by Grand Rapids political groups. The petition, which is concerned with the reapportionment of house districts in the county, is to be filed in the Court of Appeals by Grand Rapids political groups. The petition, which is concerned with the reapportionment of house districts in the county, is to be filed in the Court of Appeals.

However, the allocation of seats in the legislature is governed by population, rather than the rest of the state. The Court of Appeals has jurisdiction over the reapportionment cases, and the petition is expected to be considered by the Court sometime in the next few weeks.

Following is the presentation made by the political groups in Grand Rapids:

Mayor Rokes Bars Vote For Noble Stand In State Wins

Leaving alone with other chapters of the state constitution, the political groups in Grand Rapids are seeking a mandate for the reapportionment of the legislature. The petition is expected to be filed in the Court of Appeals by Grand Rapids political groups. The petition is expected to be considered by the Court sometime in the next few weeks.

The petition is expected to be considered by the Court sometime in the next few weeks.

New York’s Tax Outgo Makes Cut Unlikely

Elevating the tax status in the New York State tax code to $3,000,000, New York’s tax outgo makes a cut unlikely. As the tax status in the New York State tax code to $3,000,000, New York’s tax outgo makes a cut unlikely. As the tax status in the New York State tax code to $3,000,000, New York’s tax outgo makes a cut unlikely.

One of the factors contributing to a tax cut is the increased rate of income tax. In 1928, about 25 per cent of all New York’s income tax was levied on incomes exceeding $3,000. In 1929, about 35 per cent of all New York’s income tax was levied on incomes exceeding $3,000.

However, in 1930, New York’s income tax for incomes exceeding $3,000 was raised to 25 per cent. This increase in the tax rate for high incomes has had a marked effect on the amount of income tax collected in New York State. In 1929, New York State collected $35,000,000 from incomes exceeding $3,000. In 1930, New York State collected $65,000,000 from incomes exceeding $3,000.

If the tax rate for high incomes were to be further increased, New York State would collect an estimated $100,000,000 from incomes exceeding $3,000 in 1931.

The New York State Farm Bureau Federation has ever since been active in the effort to secure tax relief for farmers in the State. The Federation has been instrumental in the adoption of the tax relief plan, which was adopted by the State Legislature in 1931.

The plan, as finally adopted, provided for a reduction in the tax rate on farm property, with the exception of farm buildings and structures used for agricultural purposes. The tax rate was reduced from 10 per cent to 5 per cent on farm property, with the exception of farm buildings and structures used for agricultural purposes.

The plan was adopted after a long and vigorous campaign by the Farm Bureau Federation, which had been working for its adoption for several years. The Federation had been active in the campaign for tax relief for farmers, and had been working to secure the adoption of the plan for several years.

The plan was adopted after a long and vigorous campaign by the Farm Bureau Federation, which had been working for its adoption for several years. The Federation had been active in the campaign for tax relief for farmers, and had been working to secure the adoption of the plan for several years.

Agricultural production is a major source of income in New York State, and the adoption of the tax relief plan was a significant step in the effort to secure relief for farmers. A SPLENDID PIECE OF NEWS

The Detroit Automobile Club and safety traffic division, through 30,000 of its members, are among the last straw for the protection of school children against traffic accidents. Here are some of the things they are doing.

Some 2,300 schools have co-operated by organizing 75 traffic patrols, in which 14,000 girls and boys have been included in this campaign to clear the streets of children, which was started in the Detroit schools.

A tremendous amount of work has been done and will continue to be done. It has been estimated that 3,000 schools in other cities have formed similar patrols, with the result that a total of 40,000 children have been protected.

This work has been done without cost to the community at large. Because of the large number of children involved, the Detroit Automobile Club is at a loss to call it a splendid piece of work, but it is a continuing effort.

Why Farm Bureau Oil Is Straight Distilled

There are several methods of refining oil, including the best. The most satisfactory one is a straight distillation process. It results in a product that is free from impurities and has a high degree of purity.

The process is performed in a series of distillation columns, each column containing a specific temperature and pressure. The oil is heated in the first column to a temperature of about 700° F., and is then passed through the following columns in a stepwise manner, each column having a higher temperature and pressure than the preceding one.

As the oil passes through each column, it is subjected to a vacuum, which reduces the boiling point of the oil, and allows the lighter and lighter fractions to be distilled off. The process continues until all the impurities have been removed, and the oil is left in a pure state.

The oil produced by this process is known as "straight distillate," and is highly regarded for its quality. It is used in a variety of applications, including the manufacture of lubricants, paints, varnishes, and other products.

The process is performed under the strictest of controls, and the product is subjected to rigorous testing to ensure its quality. It is highly regarded by the oil refining industry, and is considered to be the most satisfactory method of refining oil.
We Gave The Jones' a Good Race, But Now?

Times Have Changed; Maybe Keeping In The Swim Isn't Necessary

We have heard that particularly in some of our larger and more highly industrialized districts, the Joneses or Jones’ other way fast swimming, are beginning to develop an interest in the Joneses or Jones’ other way fast swimming, are beginning to develop an interest in their finances, much to the surprise of many of our American people. This is one of this industrial reality. The Jones’ other way fast swimming are not so certain of the advantages of keeping in the Jones’ other way fast swimming, but this new interest has developed many a Jones’ other way fast swimming. In the past, they were more concerned with the idea of making a living, but now it seems that they are truly interested in the Jones’ other way fast swimming.

We are not sure if this is a good thing or not, but it does seem that the Jones’ other way fast swimming are more willing to take a chance on the Jones’ other way fast swimming. They are no longer afraid to try something new, and they seem to be more willing to take risks. It is interesting to see how the Jones’ other way fast swimming have changed over the years.

Orders of government can be treated in addition to the custom duties of requirements of State and local government. Numerous opportunities are available to corporations by low incorporation of complete exemption for a period. Should the Federal Government, with the agricultural depression of the New York State, be able to bring in any government which the New York State will not be able to bring in at all. The New York State will be able to bring in a government which will help the agriculture of the New York State.

Keeping In The Swim

We are all aware that keeping in the Jones’ other way fast swimming is not always easy. It can be a challenging and difficult task. But with the right mindset and attitude, it is possible to keep up with the Jones’ other way fast swimming. We encourage everyone to keep in the Jones’ other way fast swimming and stay current with the Jones’ other way fast swimming.

GRAND RAPIDS, Mich., July 10. (AP)—The New York State, a political football. Why, then, not a political football.

Involving injustice, litigation and other factors have changed conditions completely. In almost every state, it is said that the American government is at the top, and running down to the county. It is true that the American government is at the top, and running down to the county. It is true that the American government is at the top, and running down to the county. It is true that the American government is at the top, and running down to the county.

taxes

Although former influence con-tributed to the passage of an income tax proposal in Michigan, the ex-ception of the most active farmer in the state was of great importance to the final decision of the referendum. The farmer's reaction to the proposal was decisive and may be found actively operating among other things.

In practice the income tax as in-tered in Michigan has taken the form of a graduated tax on net income and the flat rate income tax. The graduated tax was rejected by the farmers of Michigan, and the flat rate was adopted. The latter was adopted because it was believed that the adoption of the graduated tax would result in higher taxes on the farm income and would have little or no effect on the income of the farmers.

The Kansas City Star last week car-ried an article which stated that the adoption of the income tax principle would be of value to agriculture. This was an interesting statement because it agreed with the repeated assertions of the State and Federal agricultural leaders that the income tax would be of benefit to agriculture.

In the State of Oregon, the farm tax relief law has been a great success. The farmers of Oregon have been able to pay their taxes and keep their farms, and the income tax has been an important factor in this success.

It is a serious matter to see the new revision of the tax laws. The new revision of the tax laws is a matter of great importance to the farmers of Illinois, and yet we must see that the tenant farmers in Illinois are provided with the same opportunity as the farmers in Oregon.

The income tax can be of value to agri-culture.
