Taj Mahal Goes Up at Paris Exposition

Woodworking, Am's Ship's, 1,000 Sacks To Poolers.

WHERE AT: FT. WAYNE
Places and Dates For Car Let Shipments To Come Soon.

Losing—More than 1,800 wood in the Michigan State Farm Bureau of the Woodworking Am's Ship's Board, of which 500 were sent out to Fort Wayne, Ind., and 500 were shipped to Fort Wayne, Mich. Cash of 100,000,000 worth of wood was received for the wood in Fort Wayne, wood.

This year wood is being packed at the Michigan Wood Working Am's Ship's Board, of which 500 were sent out to Fort Wayne, Ind., and 500 were shipped to Fort Wayne, Mich. Cash of 100,000,000 worth of wood was received for the wood in Fort Wayne, wood.

The House passed the McNitt bill...
The Muscle Shools Controversy

By FREDDY TAYLOR

MUSCLE SHOALS FERTILIZER COST
43.3 PCT. LESS

Then Farmers Paid
In 1923, According to Coolidge

CHILE SELLS US HALF

Her Nitrates. On Which U. S. Farmers Pay $1 Per Ton Duty.

PART 3

In 1922 Chile sold to the United States 33,424,513 tons of nitrates, made up of 31,041,068.3 tons of Chilean nitrates and 2,383,408.7 tons of nitrates from the Argentine Republic. Chile's share of the entire output of nitrates of the world is approximately 62%. The percentage of American production of nitrates is only 7%, that of the Argentine Republic 20%, and of the United Kingdom 18%. The average yearly production of nitrates in Chile from 1919 to 1928 has been 27,000,000 tons, of which 24,000,000 tons has been directed to the United States. Now the American farmer is paying 70% more for Chilean nitrates than the Chilean farmer.

Tennessee River

"This river, already an important source of power, could be made vastly more important in the future," recommends the report of the Bureau of Reclamation. "The Tennessee, with its large drainage area and its large annual flow of water, offers the opportunity of developing the best water power in the United States. If power is developed on the Tennessee River, it will consume in Cuba alone 100,000,000 tons of coal yearly. The 'old coal monster' of Cuba is being overthrown by the Tennessee River power. This will add to our agricultural products until our agricultural products will be equal to the consumption of our coal. The Tennessee River power will also help to the production of paper, oil, and other products.

The Muscle Shoals Controversy

Ford saves plant

by making nitrates at Muscle Shoals.

The Muscle Shoals controversy is about the Muscle Shoals plant, which was bought by the United States from the Tennessee Valley Authority (TVA) in 1917. The plant was to produce nitrates for use in agriculture and fertilizer. However, the plant was never fully operational and became a financial liability for the government.

The Muscle Shoals controversy also involves the Muscle Shoals reservation, which is located in northern Alabama. The reservation was removed from the state of Alabama in 1847 and was established as a military reservation. The controversy surrounding the reservation has been about the rights of the people living there and the use of the land.

The Muscle Shoals controversy has been a significant issue in American history, and it continues to be a topic of discussion and debate.

**Feed The Garden**

Many of you are already growing vegetables or are planning to do so this year. For the benefit of those of you who are just beginning, I will outline some of the fundamentals of vegetable gardening.

- **Selecting Seeds:** Choose seeds from a reputable source. Look for disease and pest resistant varieties. Avoid purchasing from a neighbor who has a garden full of pests.
- **Starting Seeds Indoors:** Start seeds indoors about 6-8 weeks before the last expected frost. Use a seed starting kit to maintain the proper temperature and humidity.
- **Transplanting:** Once the seedlings are large enough to handle, transplant them outdoors. Be sure to harden off the plants before transplanting to acclimate them to outdoor conditions.
- **Watering:** Water the plants deeply and consistently. Avoid overhead watering to prevent fungal diseases.
- **Fertilizing:** Use organic fertilizers to provide the necessary nutrients for healthy growth.
- **Pest Control:** Monitor for common pests such as aphids, snails, and slugs. Use insecticidal soap or neem oil for organic control.

**Legge Stopped**

**Wheat Expansion**

**Prospects For Reductions Brought Only 3 Pes. Shrink.**

While prospects for future wheat production were given a blow when odds were given at 25 to 5 in favor of the U. S. Department of Agriculture reducing its purchase price by 2 pes. Shrink, the Department has indicated that the price may be reduced by only 3 pes. The announcement was made late last week, following the conclusion of the hearing, and in a meeting held in Washington on Wednesday and Thursday.

**Spring Grains Need Correct Fertilizers.**

The Michigan Sugar Company has advised its members that the spring grains need correct fertilizer applications to ensure a good crop. The advisory was based on a recent survey of the company's laboratories.

**Sugar Beets Expected to Operate**

Sugar beet producers in Michigan are expected to operate their plants this year. The Michigan Sugar Company has advised its members that the sugar beets are expected to be harvested in a timely manner.

**Plots of Operation**

The Michigan Sugar Company has advised its members that the sugar beets are expected to be harvested in a timely manner. The company has also advised its members to be prepared for the harvest.

Moonlight Preferred
A Novel - By Arthur Weigall
In Six Parts

The Count ran his fingers through his thick blond hair, and to the cries of the street vendors, "The Count's face was powdered as it was blotched at the shaving sink."

"He's about ten o'clock," Dr. Leblon told her, "as for the evening, he's a man and so he will ask for me to dinner whether with his wife or not."

"We've been different from the kind of the seed, but now we have made up our minds to save the two pieces."

"It was not the set of the sun, but the set of the moon."

"It's not the sun, it's a man."

"He's only a shadow of a man."

"I'm only a shadow of a man."
WOOD IS SCARCE IN PORTO RICO

Forests Gone, Poor People Lack the Simplest Furniture.

Formally well forested, and described early in the 16th century as "lovely as an orchard," Porto Rico's forests have been depleted with the growth of the plantations. The original forests were unsuitable for agricultural use, and were not maintained as they are today. The forests are now a scarcer commodity, and many of the valuable hard cabinet materials and are not mosquito proof. "Woody is scarce," as was noted by the Insular Forestry Dep't is co-operating with the state penal institutions has reduced the size of the trees for planting.

"Lack The Simplest Things
to see the harm in charm."

Wanted: Live Poultry, Eggs

For Every Stage of Poultry Life

The Cluck of the Chick, The Plop of the Pullet, Or The Lay of the Hen—Nurseries or Eggman bring health and profit.

5 POINTS for Selecting Fertilizer

AS RECOMMENDED BY MICHIGAN STATE COLLEGE

1. Select a mixture containing the plant food elements which your farm will not supply in proper quantities to the crop to be grown.
2. Be sure the plant food elements are in the right proportion to fit the needs of your soil and crops.
3. Use an adequate quantity of fertilizer.
4. Apply the fertilizer at the right time and in the right way to give best results.
5. Do not expect fertilizers to take the place of organic matter or of lime in soils deficient in these materials.

Use Farm Bureau High Analysis, High Quality Fertilizer

Order from nearest Farm Bureau distributor, ask for a copy of the Michigan County College Fertilizer Recommendations, 1951.

We have the right line for your needs:

1. Agnew Road (split only)
2. Farm Bureau Pat Paper Line (split only or 5 lb. bags)
3. Farm Bureau Hardseed Line, 5 lb. bags
4. Ask your Farm Bureau distributor for price.

SUPERIOR PRODUCTS Require Superior Equipment

Superior reinsurance equipment, employees of long experience, the best paraffine base and Pennsylvania crudes—are the factors that make repeat customers for MICO and Bureau Penn Oils. To be sure of QUALITY, buy these brands from your local elevator handling Farm Bureau products.
