Things Observed On A Drive About Chicago

Michigan Farm Women Speak
Occasion for Comment
Irene Craven

The story breaks a little more than a year ago in Chicago, Illinois. There, the trend for increasing prices of farm products was being discussed. A very real one. The price of alfalfa was being quoted at $400 per ton, and the cost of living was being quoted at $60 per month. And yet, even with all this, the price of farm products continued to move up. Why? Because of the demand for them. The demand for farm products is much greater than the supply. It is a well-known fact that the demand for farm products is much greater than the supply. And this is why the price of alfalfa continues to move up.

The story continues with an interesting discussion about the Federal Farm Board. It mentions the Board's efforts to stabilize the price of farm products, but also notes that some people believe the Board's efforts are not successful. The Board is shown to be faced with a difficult task, as it must balance the needs of farmers with the needs of consumers.

The story then turns to a discussion of the benefits of alfalfa as a crop. It notes that alfalfa is a hardy crop, capable of surviving in a variety of conditions. It also notes that alfalfa is a crop that can be used for a variety of purposes, including as a forage crop, a soil activator, and as a source of nitrogen for other crops.

The story concludes with a note of optimism about the future of farm products. It notes that the demand for farm products is expected to continue to grow, and that the price of alfalfa is expected to continue to rise. It also notes that the Federal Farm Board is expected to continue its efforts to stabilize the price of farm products, and that these efforts are expected to be successful.

What Per Cent Mich. Farmers Have Alfalfa?

Alfalfa, the one forage crop which seems to be gaining greatest favor with the Michigan farmer, is showing signs of increasing. Several farmers growing alfalfa at $175. Their acreage is 13 acres. These farmers are in a position to handle alfalfa for other purposes. A sample is being sent to the State Farm Bureau for close inspection of its quality.
What They Say About It

The FARM NEWS presents hereewith comment that has been provoked by public action taken in Michigan by farm organizations in recent months. Some of it is for; some against; some is neutral. The writer's intent is to discuss.

Agriculture Will Get Shelbyville "Head Man" Back To Whose Own?

LeRoy M. Nelson, Head of the Shelbyville Cooperative Ass'n, is to return to manage the operations of the association after a short absence. He is returning to take care of the affairs of the association during the absence of another industry that has been handling the business for some time. The association has been in the hands of the Shelbyville Cooperative since it was formed.

We saw the summer time they had 126 different sorts of tropical plants, cacti, ferns and flowers, including the so-called "getting the government out of private business." Many of the newspapers have been discussing the possibility of putting the government into private business.

This is a mile out in the lake; we saw the summer time they had 126 different sorts of tropical plants, cacti, ferns and flowers, including the so-called "getting the government out of private business." Many of the newspapers have been discussing the possibility of putting the government into private business.

Agriculture Will Get Shelbyville "Head Man" Back To Whose Own? — The Shelbyville Cooperative Ass'n will have LeRoy M. Nelson back in charge of its operations when he returns from his absence.

The Shelbyville Cooperative Ass'n is the largest cooperative in the country and has a membership of over 10,000. It was formed in 1929 and has been successful in its operations ever since.

As Encouraging Sign

The Operations of the Shelbyville Cooperative Ass'n have shown that the cooperative movement is alive and well. They have been successful in their operations and have helped many farmers in the area.

Agriculture—We Vindicated

The Shelbyville Cooperative Ass'n has been vindicated in its operations. The cooperative movement is alive and well and has been successful in its operations ever since it was formed.

TRAINLOAD VISITS LIVE STOCK EXCH.
AT DETROIT YDS.

377 Kent, Barry and Eaton Shippers See Marketing Operations

The season in the lower peninsula of Michigan has been characterized by a low level of livestock marketing, with many farmers holding onto their animals rather than selling them. The low prices for livestock have discouraged marketings, and the limited number of trainloads that have been handled at the Detroit stockyard have been mainly from Kent, Barry, and Eaton counties.
