NEW OLEO RULING DISABUSES THE LAW TO SHIELD BUTTER

Stuart Chemist Enables Palm Oil In Butter, etc., To Evade 10c Tax

FARM BUREAU PROTESTS

Grant Hearing January 10

Michigan Congressmen

Lansing—A severe blow at the dairy industry has been struck in Lansing, where the Michigan State Farm Bureau has successfully urged the Senate and House of Representatives to pass a resolution urging the Michigan Department of Agriculture to oppose the Michigan Senate's attempt to provide a legal basis for the deduction of the 10c state tax on oleo products.

The Michigan Farm Bureau, in a recent letter urging the Michigan Senate to resist the urge to legalize the deduction of the 10c state tax on oleo products, made the following statement:

"We are opposed to the deduction of the 10c state tax on oleo products. The law providing for a deduction of 10c from the 10c state tax on oleo products is unconstitutional and should be declared so. The law is an attempt to evade the state tax on oleo products and should be declared void.

"We are opposed to the deduction of the 10c state tax on oleo products. The law providing for a deduction of 10c from the 10c state tax on oleo products is unconstitutional and should be declared so. The law is an attempt to evade the state tax on oleo products and should be declared void.

A striking thing, in the face of the past year and of the many hard years since 1920, has been the stability of agricultural production. The wheat harvest for December 1939 showed only about 1 per cent reduction in winter wheat acreage and a 4 per cent increase in yield, compared with a year ago. A second determination shows only about 1 per cent decrease in this fall's pig crop and indicates that the agricultural situation for the past 12 months was as good as last year.

STATE WIDE SERIES
FERTILIZER, SEED MEETS JAN. 19-31

Farmers Invited to Hear Sims And Maurer on 1941 Crop Plans.

Leading crop yields in 1931 will be featured on furnaces and imported oil took a new high at the end of the year. The total 1,810,000,000 lbs. of oil imported into the United States last year makes that "keep the oil cool" campaign" and so can be increased tremendously if the public oil companies are successful in having their present "tax exemption, now under line of our daily interests and our major packers. The packers use their animal oil by every channel.

"All rice is Uncle Sam's fed tax per pound as a matter of keeping it at Federal market rates," according to the Texas Farm Bureau, because the price of edible butters was on profitable that dirty interests secured legislation years ago to tax all shortening, 10 per cent.

Aside British gentlemen reasoned that if cheap palm oil having a natural, butterlike color, could be refined to suit the edible taste, it would become 10 per cent cheaper than it is now. The 10 per cent tax on oil made from palm oil as well as on reins is now, and artificers. All this has been supposed to understand that the British, as an offer to Washington and a cooperation in New York, are seeking also to have the palm oil and all other fats under a 10 per cent per pound tax. The estate gentlemen worked quietly and swiftly. No hearing was called. The report was a tax. The executive considered the point and favored a large. Dirty interests protested strongly the 10 per cent per pound nominal ruling removing the tax.

The Michigan Farm Bureau is to be congratulated for its prompt protest to Interior Revenue Commissioner Hume, to Michigan. A committee of the state department of the department of internal revenue accepted the ruling, pending the hearing, is the subject to be sought.

1831 Outlook—Summary of 1930

The most recent studies, finding farmsteads with the necessity of reducing production costs, urge the Bureau of Agricultural Economics, U. S. Department of Agriculture, in January 1930 in the agricultural situation. Forced to operate under conditions of low-priced farm products and a world-wide farm depression, the Bureau, through efforts by farmers to cut costs by using only their best land, improved equipment, productive measure of efficiency, and by using larger areas for small crops, was able to increase the average yield per acre. The Bureau, through an act of Congress, is receiving a 5 per cent stamp duty per acre. The reclamation service also had a good year.

"Agricultural production, as a whole, declined in 1930. In 1930 the total output of the principal crops was 7 per cent less than the previous 10-year average. Nonetheless brought about a considerable saving in labor and cost. The Bureau's reports indicate that the supply of winter wheat was increased 45 per cent over the previous year, under Federal inspection in the first 10 months (amounting to 131 billion pounds), was about 4 per cent less than the previous year.

"The amazing thing, from the farmers' standpoint, was the sweeping decline in prices. The crops of 1930 had an aggregate value of $3,274,000,000, compared with an average value of $5,637,000,000 in 1929, a 38 per cent loss. The average price per bushel fell from 7 cents in 1929 to 3 cents in 1930, a 58 per cent reduction. This is the result of a larger supply of wheat added to the distressed market for all interested parties.

"The amazing thing, from the farmers' standpoint, was the sweeping decline in prices. The crops of 1930 had an aggregate value of $3,274,000,000, compared with an average value of $5,637,000,000 in 1929, a 38 per cent loss. Tell Your Wife (from an Editorial in Wallace's Farmer)

Tell last, an Iowa newspaper. Like most of us, he is busy with the war effort and the demands of the war effort. But he is also busy with the care of his farm and his family. So he has found a way to combine the two.

The idea is simple: he gives his wife the names of the best farms in the county. Then he teaches her how to keep track of the progress of the war effort. She can do it from her own home, and she can do it without leaving her own home.

The wife is happy, because she can now help her husband with the war effort. And she is learning something new about farming in the process.

Why Mermash Pleases Poultrymen

A poultryman tells us: "We have been using Mermash feeds for poultry about a year and have put to it every test and used it under practically all conditions found on a large poultry farm. Our observations have been:"

1. It increases hatchability 10% to 15%.
2. It produces chicks that are stronger and more vigorous.
3. It reduces chick mortality.
4. It reduces hens for winter eggs.
5. It produces a higher yearly egg average.
6. It reduces feeder chickens.
7. It decreases the amount of feed required.
8. It produces healthier eggs.
9. It increases the amount of eggs.
10. It reduces feed costs.

Mermash is the best chicken feed on the market. It is the best feed for your chickens, and it is the best feed for your business.
WHAT IS LEAST PLEASANT THING IN FARM LIFE?

By Mrs. W. F. TAYLOR

She was tired of being confined, of being put on a diet when she was hungry, of not having enough to eat, of not having enough money to buy things she wanted, and of not being able to go anywhere. She also had to work very hard and often got tired and sick. The worst thing of all was that she had to take care of the children, who were always misbehaving and giving her trouble.

* * *

POOR PA

By MARY SCHIFF

Poor pa! I never thought I would miss him, but now that he's gone, I realize how much I loved him. He was always there for me, no matter what happened. I miss his laughter, his big smile, and the way he always knew how to make me feel better when I was down.

INTERESTING FARM WOMEN

When one attempts to count the men who are leaders of anything in our state, we find thousands of names, but as we have to select those we know best. The selection is great. For the selection of many farm women because it is comparatively few lives that would equal to any emergency if called upon to do work. It is huge work, and the selection is great. For the selection of many farm women because it is comparatively few lives that would equal to any emergency if called upon to do work. It is huge work, and the selection is great. Annual meeting of the Michigan Farm Bureau at LeVally Farm, will be addressed by Mr. E. McPherson, chairman of the State Farm Bureau Commission, and former state commissioner of agriculture. McPherson, a native of Ionia County, is known for his work in marketing and stress the need for a strong farm bureau. His address will be focused on the importance of the farm bureau in representing the interests of farmers. McPherson's speech will be an opportunity for the audience to learn more about the role of the farm bureau and its impact on agriculture. The meeting will be held on January 21, 1930.
