STATE TAKES OVER PERMANENT BOVINE T-B ERADICATION
Has $135,000 Annually To Test And Pay Necessary Indemnities.

COUNTRIES ARE RELIEVED
Must Test 500,000 Cattle Per Year To Hold Schedule.

Utah—With an appropriation of $135,000 the State Board of Agriculture has purchased the entire state an area protected from bovine tuberculosis.

This new series of T-B testing work will be carried on in the eastern six counties and the expenditures are expected to be about $14,000 per year with a total allowance permitted to the state. The only competition was given by the State Department of Agriculture, but the plan was approved by the Board of the United States Department of Agriculture, which has approved the plan of the state.

New Mexico—With an appropriation of $135,000 the state must test 500,000 cattle per year.

The state has been approved by the Board of the United States Department of Agriculture, which has approved the plan of the state.

Maryland—With an appropriation of $135,000 the state must test 500,000 cattle per year.

The state has been approved by the Board of the United States Department of Agriculture, which has approved the plan of the state.

Costs 24 Cents Per Cow

The cost of the test is 24 cents per cow. This includes all costs of test and maintenance, including the cost of state livestock inspectors and the state board of health inspectors. The state is expected to receive a return of 24 cents per cow, which will be applied toward the cost of the test.

 farmer of all the state, the state board of health inspectors.

COLLEGE IS TRYING CROSS CULTIVATION OF SUGAR BEETS

To Compare Yield, Costa With Hand Blockage, Hoisting Method.

Cross cultivation of sugar beets has been an important field of study in the state. A number of experiments have been made on the effects of cross cultivation on the yield of sugar beets. The results of these experiments have shown that cross cultivation increases the yield of sugar beets by about 20%. The experiments have been conducted by the Institute of Technology, the University of California, and the University of Illinois.

Food From the Sea

Held Nutritious Diet

Young, Robert L., editor of the Michigan State University Bulletin, has written a paper on the nutritive value of food from the sea. The paper is published in the Bulletin and is available for free to anyone interested in the subject.

RIO GRANDE VALLEY PLANTERS

Harvesting Nears End

The harvest of the Rio Grande Valley planters is nearing its end. The planters are harvesting the sugar beets now, and the harvest will be complete in about a month. The planters are using the latest harvesting equipment, and the work is going on smoothly.

SWAT THE FLY

Scientists Win Capper Award

Discovered That House Flies Mosquitoes Carry Disease.

James M. Capper, associate professor of entomology at the University of California, and his co-workers, have discovered that house flies carry diseases, including the disease that causes malaria. The discovery has been made by the National Research Council, and the scientists have been awarded the Capper Award for their work.

BORDER PROOF CORN

A Possibility in Several Seasons

Cross of American Corn With Michigan Stock Is Promising.

This border proof corn, a cross of American corn with Michigan stock, is promising. The corn has been grown in several seasons, and the results have shown that it is resistant to European corn borers and is more productive than the American corn.

Bones on Capitol Lawn

Have Brilliant History

In the Capitol Building, the bones of U. S. Grant are being displayed. U. S. Grant was a great military leader, and his bones are of historical interest. The bones are displayed in the Capitol Building, and they attract visitors from all over the world.

What a Boy!

"He is a person who is going to carry on what you have started. He is to sit right where you are sitting—and when you are gone—attend to those things you now think are so important," says the Boy's Club Magazine.

"You may adopt all the policies you please, but how they will be carried out depends upon him. Even if you make changes and treaties, he will have to manage them. He will assume control of your cities, states and nation."

"He is going to move in and take your churches, schools, universities, and commercial undertakings. All your work is for him, and the fate of the nation and humanity is in his hands. So it might be well to pay some attention to him."

What U. S. Wheat Growers Refused To Do

American delegates to the Moscow Conference of wheat exporting countries of the world now tell us what was asked of the United States and what we refused to do.

The American delegation from the Farm Bureau refused to allow other nations "to interpret" Farm Board or the Wheat States Anything to stand as notice to the world that the United States would hold that wheat indefinitely. In that case other nations could control future surpluses and figure and rates at us if we counter to their "interpretation."

The American delegation refused to support a limit for wheat exports, proposed at the conference for all nations. The Americans in the arguments that were developed that every country was equal, and for export quotas "in principle," whatever that means. American delegates declared that the Farm Bureau delegation had authority to pledge an export quota, but all were for "in principle."

Russia likes the scheme because they demand their own war-pre-war export average of 164,000,000 bushels annually; because limited exports by other nations would enable the Russians to sell wheat for more money. Whatever the war Russia expected twice as much wheat as any other nation.

Principal business of the conference appeared to be that universal wheat surpluses will continue until falling price changes in various parts of the world.

College Honors

Prof. M. R. Pettit has been presented with a watch on the occasion of his retirement as dean of the School of Agriculture at Michigan State University.

When the roost of the college turns out to be in the dark of night, the University's School of Agriculture will receive a new dean in the form of the late Dean, H. R. Pettit. He will find the dean's chair in the yard, and the dean's name on the door. He will wear a cap and gown, and he will be called the Dean of the School of Agriculture.

The late Dean of the School of Agriculture was M. R. Pettit, who was a native of the University. He was the first dean of the School of Agriculture, and he died in 1921.

Run Economy Seeding Tests on Barleys

Dr. J. A. Conant, head of the Department of Agriculture, has announced that the late Dean of the School of Agriculture, M. R. Pettit, has been appointed to the chair of the Department of Agriculture.

The late Dean of the School of Agriculture was M. R. Pettit, who was a native of the University. He was the first dean of the School of Agriculture, and he died in 1921.

Michigan Resort Area Poultry Prices Better

The prices paid for chicken and duckling eggs in Michigan are much better than in many other states. The prices for chicken and duckling eggs in Michigan are much better than in many other states. Michigan's poultry prices are much better than in many other states.

Last Buffalo Hunt of Omaha Tribe Described

By JESSE FRITZ LITZWICK

Almost every part of the animal was made to be of some importance. The hind quarters were of great importance to the Omaha tribe. The hind quarters were carefully skinned and the meat was removed. The bones were split and the meat was then cut into strips. The meat was then roasted and eaten. The bones were used to make tools and weapons. The hide was tanned and used for clothing. The hooves were used for shoes. The tail was used for lashing and the horns were used for tools.

STATE COLLEGE BD.

Eight Puzzles Were Solved in Loomis Battery

According to the court, the battery proceeded with the military campaign. The battery went through such hardships as the capture of the enemy's fortifications. The battery went through the thick of the war upon his return home. The men of Loomis battery held on with grim, haggard faces. After four months, the battery was ordered to advance and to engage in a night attack. The battery was successful in capturing the enemy's fortifications. The battery went through the thick of the war upon his return home.

Modern Farmer

Examines charges for hauling milk

Deny of Ap. Is Checking Costs in Detroit

Lansing—At the present time, the state is spending a lot of money for having their milk hauled. The state is also spending a lot of money for having their milk hauled. The state is also spending a lot of money for having their milk hauled. The state is also spending a lot of money for having their milk hauled.

other inflammable material. It is the cause of road fires. The state is continuing to prescribe equipment. Last year a thousand miles of track were prescribed.

Last Buffalo Hunt of Omaha Tribe

Omaha tribe is told by Dr. Gilmore, the young scouts who served on this hunt, that the tribe used to have a tradition of going through the buffalo hunting. It was a tradition that was passed down from generation to generation. It was a tradition that was passed down from generation to generation. It was a tradition that was passed down from generation to generation.
WHY HAS HAPPENED?

PART II

For months he had been a pattern of self-abnegation. It was all new to Polly. By dint of her own toil she had made her home and suddenly she found a little world there, and, and, and...for her.

She had not been able to think of her own wants. She had been thinking of her mother's wants. She had been thinking of the wants of the persons about her. And she had been living in the way that she had thought her mother and father expected her to live.

And now she found that she was to be free. That she could do for herself. And it was then that she realized the fact that she was a woman. She had been a thing for her mother and father to live on. She had been a thing for them and not for herself. And now she was to be free. She was to be free to do as she pleased.

And now she found that she was to be free. That she could do for herself. That she could do as she pleased. And it was then that she realized the fact that she was a woman. She had been a thing for her mother and father to live on. She had been a thing for them and not for herself. And now she was to be free. She was to be free to do as she pleased.

And now she found that she was to be free. That she could do for herself. That she could do as she pleased. And it was then that she realized the fact that she was a woman. She had been a thing for her mother and father to live on. She had been a thing for them and not for herself. And now she was to be free. She was to be free to do as she pleased.

And now she found that she was to be free. That she could do for herself. That she could do as she pleased. And it was then that she realized the fact that she was a woman. What The Package Costs

In your store an 8 ounce jar of vinegar will sell for 10 cents. Shell a penny for a quart of vinegar in bulk. The consumer will not trust the shelf price which suggests that he must pay more for the package, in the hope he will buy it. The average price of a bottle of vinegar is 30 cents. Shell a quarter for a bottle of vinegar in bulk. The consumer will pay 10 cents for bulk and only 13 cents in the package.

Buy in bulk when you can, and when you can't buy in bulk, buy 8 ounces for a quarter.

Motorists Buy Flour

East Lansing-Motorists who buy flour from roadside markets save seven cents per pound. In a package, a pound of flour costs 50 cents.

Advantages of Buying Bulk

In a package, a pound of flour will cost only 30 cents. In a package, a pound of flour will cost only 13 cents. The advantages of bulk are similar to those of buying any other product in bulk. When every penny counts, it is well to know at what price you are buying.

These Things for Hot Weather Comfort

Drinking plenty of fresh water, cold drinks, and iced drinks is a must. Keep your body temperature down to a minimum. Refrigerate your food, but use caution. Do not throw away any breakfast egg, milk, or bread.

These Things for Cold Weather Comfort

Keep your home heated to a minimum. Use the least amount of coal, wood, or kerosene. Use the least amount of heat, but keep your body warm.

Four Good Recipes

Rice Ermine Macaroni

Yield: 3 cups

1. Preheat oven to 325°F.
2. Cook macaroni according to package instructions.
3. Drain and set aside.
4. In a large mixing bowl, whisk together:
   - 1 cup butter
   - 1 cup flour
   - 1 cup sugar
   - 1 teaspoon salt
5. Stir in:
   - 3 cups milk
6. Pour into a greased 9x13-inch baking dish.
7. Bake for 30-40 minutes, or until golden brown.

Bear Chase 4 Men Into Volcano Crater

Orange, Calif.—On Tuesday, the Bear Chase 4 Men traveled from Orange to a volcano crater in southern California. They were successful in their attempt to reach the summit.

Bear Chase 4 Men

Yield: 4 men

1. Preheat oven to 325°F.
2. In a large mixing bowl, whisk together:
   - 1 cup butter
   - 1 cup flour
   - 1 cup sugar
   - 1 teaspoon salt
3. Stir in:
   - 3 cups milk
4. Pour into a greased 9x13-inch baking dish.
5. Bake for 30-40 minutes, or until golden brown.

New York—On Monday, the Bear Chase 4 Men traveled from Orange to a volcano crater in southern California. They were successful in their attempt to reach the summit.

Soft Drink Quenchers

Banana Milk—If you can't carry a banana in your pocket, try this milk. It is a soft drink that can be made by mixing banana juice with water. It is a refreshing drink that is good for hot weather.

Michigan's Highest Points

The highest point in Michigan is Mount Emmons, in the Upper Peninsula. It is 1,483 feet above sea level.

College Invites Farm Women

East Lansing—The annual Farm Women's Week at Michigan State College, which has been in operation for 20 years, was concluded on Saturday, May 18. The week was designed to encourage farm women to make the most of their opportunities for personal and professional growth.

College Activities

1. Preheat oven to 325°F.
2. In a large mixing bowl, whisk together:
   - 1 cup butter
   - 1 cup flour
   - 1 cup sugar
   - 1 teaspoon salt
3. Stir in:
   - 3 cups milk
4. Pour into a greased 9x13-inch baking dish.
5. Bake for 30-40 minutes, or until golden brown.
