Wheat, Cotton Stabilization By Farm Board Is Near End

Washington—President Hoover has already agreed to the recommendations of the Farm Board to give the American farmers a cotton stabilization program on a par with the one they now have for wheat. The wheat program was established in 1929 and is still in operation.

Last week, President Hoover and his Cabinet held their last meeting before the New Year. It was expected that they would then announce their decision on the cotton stabilization question. The President was reported to have told his Cabinet that he would make his decision on the matter before the New Year.

The cotton stabilization program is designed to stabilize the price of cotton and to prevent a collapse of the cotton market. It was established in 1929 and is still in operation. The program provides for the purchase of cotton by the government at a fixed price and the sale of it at a later date at a lower price. The program has been criticized by some economists who believe that it is not effective in stabilizing the price of cotton.

The program has been in operation since 1929 and is still in operation. It was established in 1929 and is still in operation. The program provides for the purchase of cotton by the government at a fixed price and the sale of it at a later date at a lower price. The program has been criticized by some economists who believe that it is not effective in stabilizing the price of cotton.

When the program was first established in 1929, the price of cotton was about 8 cents a pound. The program was designed to keep the price of cotton at a level comparable to that upon which farmers had been operating. It took Congress and the President to confer with railroad companies and with other interests that were affected by the program. The program has been criticized by some economists who believe that it is not effective in stabilizing the price of cotton.

Stories of Women’s Heroism In the American Revolution

Mary Warren, Molly Pitcher, Deborah Sampson, Nancy Hart, and Others

Among the many stories of women’s heroism in the American Revolution, few are as well-known as those of Mary Warren, Molly Pitcher, Deborah Sampson, and Nancy Hart. These women, each in their own way, played significant roles in the cause of American independence.

Mary Warren was a young woman who, according to legend, shot a British officer when he refused to leave his post. This act of bravery is said to have occurred near the Battle of Bunker Hill.

Molly Pitcher is perhaps the most famous of all the women soldiers of the Revolution. During the Battle of Monmouth, she is said to have taken over for her husband, Peter Pitcher, who was wounded. She is credited with encouraging her fellow soldiers to continue fighting.

Deborah Sampson was a private in an Infantry regiment. She disguised herself as a man and fought with the Continental Army. After the war, she attempted to claim a pension for her service but was denied.

Nancy Hart was a member of the domestic service and, on July 24 of the autumn of 1776, she successfully stopped Rawdon’s scouts, who were attempting to capture her husband. She is credited with可能是被低估的女性英雄角色。

of the increased from $25 to $30 also. The waters included in his property does not have a right to take fish there, if he resides on the property, he does not have a right to wade and fish without trespassing, according to a Department of Agriculture statement July 6. Under the new economy bill recently enacted by Congress, the Department of Agriculture said, the Board of Appeals has gained so rapid an action on patent applications. This is due to the examining divisions. The Board of Appeals has gained so rapid an action on patent applications. This is due to the examining divisions. The Department said.

**Hardigan**

**MICHIGAN VARIEGATED and MONTANA GRIMM**

**Alfalfa Seed for Summer Seedings**

**Seed Cost $1.50 or Less Per Acre—the Lowest Ever Known!**

**WHAT FARM BUREAU ALFALFA SEED WILL DO**

0 to 8 bushels of FARM BUREAU alfalfa seed per acre on a good seed bed is ENOUGH for 3 or more acres of the highest quality hay. A bushel of FARM BUREAU alfalfa seed costs $0.95. Your certified seed is eligible for certified and production.

**Mermash for Good Pullets**

Mermash for good pullets makes heaven a home for ups, and laying much. You can start lookin' at it any time. Chicks and pullets make rapid, healthy growth on Mermash, which supplies them with iodine in food form. Iodine, an important growth element, is lacking in Minnesota soils and crops. Without it, they have no body, no meat. Ask your Farm Bureau supplier to deliver to you more Mermash.

**ALFALFA MUST HAVE LIME**

Test your soil now before making your summer seeding. Alfalfa will not make a luxuriant growth on soil low in lime. Three tons of lime per year require the equivalent of 230 lbs. of ground limestone, the most economical form of lime. See your co-op or Farm Bureau dealer for our expert, low price service.

**KILLS FLIES!**

FARM BUREAU FLY SPRAY KILLS ALL FLIES AND THROWS THEM TO THE WIND. The price is right. Our FLY SPRAY is effective on flies, mosquitoes, moths, ants, other winged insects. See your or Farm Bureau dealer.

**KILLS WEEDS!**

FARM BUREAU WEED SPRAY kills weeds in fields, lawns, gardens, ornamentals. Ask your Farm Bureau dealer for more information.
