Several Matters For The Special Session

1. New power to revoke the bonds on real property in consideration of State income tax.
2. Select tax acts.
3. Elimination of the property tax for highway purposes.
4. Extension or postponement of the period for Federal government taxes.
5. Extension of the time for paying delinquency taxes.

The last three items are matters that have been hanging for years. In spite of misrepresentation they have made to the public, the obligation remains as great as ever.

BATTLE LINES ARE FORMING FOR THE SPECIAL SESSION

The Need For An Honest Dollar

The shocking decline in price that Michigan farmers receive for their crops is merely the outermost of a great structure of repressing factors which are effectively reducing living standards that have been found on any class of farm. In the words of the Michigan Farm Bureau, "It is unwise to decry the system of agricultural prices and costs of living. The system is not responsible for high prices in the store. The system is responsible for high prices in the store. The system is not responsible for low prices in the store. The system is responsible for low prices in the store."

The Federal Reserve System was established by an act of Congress in 1913, and it is administered by a Board of Governors. The Federal Reserve System is the central banking system of the United States and is responsible for the regulation and administration of the nation's monetary and bank system. The system is composed of the Federal Reserve Board, the Federal Reserve Banks, and the Federal Reserve Bank of New York. The Federal Reserve System is designed to promote the stability of the financial system, to protect consumers and promote competition in the financial industry, and to maintain the integrity of the currency system.

The Federal Reserve System is composed of twelve Federal Reserve Banks, which are located in different parts of the United States. Each Federal Reserve Bank serves a district and is responsible for the supervision and regulation of banks within that district. The Federal Reserve System is also responsible for the supervision and regulation of the credit system, and it works to maintain the stability of the financial system by preventing the occurrence of economic crises and financial panics.

The Federal Reserve System is an independent body and is not subject to the control of the federal government. It is governed by the Board of Governors of the Federal Reserve System, which is appointed by the President and approved by the Senate. The Board of Governors is composed of seven members, who are appointed for terms of fourteen years and are subject to removal only for cause.

When Our Backs Are To The Wall

By Mrs. E. M. Strobel

We lose a lot by not being prepared for the inevitable happenings in our daily lives. When we are caught unprepared, we often wonder why we didn’t do things differently. This is especially true when it comes to our pets. If we are not ready for a medical emergency, for example, we may end up spending more money and time than necessary. So, what can we do to prepare for these unexpected events?

First, we should have a good understanding of our pets’ health needs. This includes knowing their dietary requirements, their exercise needs, and their general health status. We should also be familiar with any medical conditions that our pets may have, as well as their treatment options.

Second, we should have a plan in place for handling medical emergencies. This might include having a list of emergency contacts, such as our veterinarian, as well as a plan for how to transport our pets to the hospital if necessary. We should also have a first aid kit for our pets, as well as a list of emergency resources that we can turn to if needed.

Finally, we should be prepared financially for unexpected medical costs. This might include setting aside money in a pet emergency fund, or considering pet insurance to help cover costs.

By being prepared, we can help ensure that our pets receive the best care possible, even in the midst of unexpected situations. This will help us avoid unnecessary stress and expense, and help ensure that our pets remain healthy and happy.
STATE'S LIVE STOCK VALUE DROPS 44 1 PCT. IN 2 YEARS
Number of Milk Cows Again At High Reached in 1925

Lansing—Michigan's rank among the dairy states has been retained, but the number of milk cows in the state has decreased 44.1 per cent in 1925, according to the federal crop report issued last week by W. S. Strobridge, U. S. Department of Agriculture, and the Michigan Farm Bureau.

The decrease in the number of milk cows is due to a decrease in the number of dairy farms. The number of dairy farms in 1925 was 136,800, compared with 202,600 in 1920. The number of milk cows on these farms was 2,078,500, compared with 3,542,900 in 1920.

The decrease in the number of dairy farms is due to a decrease in the number of farmers engaging in dairy farming. The number of farmers engaging in dairy farming in 1925 was 136,800, compared with 202,600 in 1920. The number of farmers engaging in dairy farming in these farms was 3,542,900, compared with 4,673,700 in 1920.
