Hunting Accidents Can Be Reduced

Most of the Injuries Are Due to a Few

Loan—While a host of small gun shooting near the town in Michigan’s woods
is the common form of recreation, it is possible to get the necessary gun and
never have an accident. The proper
is to use a gun that is pointed

Referee—The Department has been doing
construction, and the President of the
Department of Conservation, Mr. Fred M.
has been in charge of the project for
years. With the abundant point
usual, it is possible to avoid accidents

Butter Equals the Equal
Of Cane in Every Way

Loan—Butter equals sugar in the
of sugar, coffee, tea, and other
In Michigan, the average price of a
bushel of sugar is 80 cents, while the
price of a bushel of butter is 80 cents.

Deflation to New Value of Gold is Far from Complete

So Says Professor Warren of Cornell, Who Sees Prices Must Rise or Debts Shrink by Means Of
Revitalizing Gold or Currency Reform; Else, Endless Bankruptcies

"We are going through the worst depression that has ever been experienced in the United States, and this is but the beginning. The world will have to be prepared for a long struggle."—Prof. Warren of Cornell, who has long been advocated the gold standard and has been the leading voice of the currency reform movement in America.

The World's Bankruptcy

The world is rapidly going bankrupt. The debtor nations are unable to pay their debts, and the creditor nations are unable to lend money. The only solution is for the debtor nations to pay their debts in gold, or for the creditor nations to lend money in gold.

The New Value of Gold

The new value of gold is far from complete. The price of gold must rise, or the debtors must pay their debts in gold, or the creditors must lend money in gold. The new value of gold will not be achieved until the world has paid its debts in gold, or has borrowed money in gold.

The Future of the World

The future of the world is in doubt. The world is rapidly going bankrupt, and the only solution is for the debtor nations to pay their debts in gold, or for the creditor nations to lend money in gold. The new value of gold will not be achieved until the world has paid its debts in gold, or has borrowed money in gold.
Do You Remember?  
Norma J. Worthington, Secretary of the Michigan Farm Bureau, in which she was interested.

October 12, 1933

It is not often that a person can look back over a period of time and see the true perspective of what was accomplished. To try to explain the meaning of the work of the Michigan Farm Bureau is a task that is difficult to accomplish in a few words. But it can be done, and I believe that the Michigan Farm Bureau has played a vital role in the development of Michigan agriculture.

The Michigan Farm Bureau was formed in 1914 as a result of the growing concern over the need for a strong organization to represent the interests of farmers. Over the years, the Farm Bureau has grown in size and influence, becoming a powerful force in shaping agricultural policy and legislation at the state and national levels.

One of the most significant accomplishments of the Farm Bureau has been its role in protecting the interests of farmers. The Farm Bureau has been instrumental in securing fair prices for farm products, ensuring a stable market for agricultural commodities, and fighting against unfair trade practices. The Farm Bureau has also played a key role in the development of agricultural research and extension programs, providing farmers with the tools and knowledge they need to succeed.

In addition to its work on behalf of farmers, the Farm Bureau has also been a leader in the development of rural communities. The Farm Bureau has worked to improve rural roads, promote rural electrification, and support the development of rural industries. The Farm Bureau has also been a strong advocate for rural education and health care.

The Michigan Farm Bureau has been a leader in the movement for agricultural cooperation and has played a key role in the development of agricultural organizations such as the Michigan Farm Bureau Co-op, which has saved farmers millions of dollars in purchasing costs.

In conclusion, the Michigan Farm Bureau has been a vital force in the development of Michigan agriculture. Its work has helped to ensure a stable market for agricultural commodities, protect the interests of farmers, and promote the development of rural communities. The Farm Bureau has been a leader in the movement for agricultural cooperation and has played a key role in the development of agricultural organizations such as the Michigan Farm Bureau Co-op, which has saved farmers millions of dollars in purchasing costs.

Expect Million Tons of Beets With Drought and Cash Crop

Lansing—Michigan sugar beet production this year, which extends from June 15, 1935, through November 15, 1935, is expected to be the first in every state in the Union since 1924, according to Dr. H. R. Detroit, of the Michigan Sugar Company.

Michigan will have a丰收 year in sugar beets, according to Dr. Detroit, with an estimated acreage of 1.5 million acres, which will result in a total yield of about 400,000,000 tons of raw sugar beets. This will be the first time in history that Michigan has grown sugar beets on such a large scale, and it is estimated that the yield will be about 300,000,000 tons of raw sugar beets.

The reason for the large yield is due to the favorable weather conditions and the use of new beet varieties, which are more resistant to diseases and pests. The new beet varieties are also better suited to the Michigan climate and soil conditions, resulting in a higher yield per acre.

In addition, the Michigan Sugar Company has invested heavily in research and development to improve the yield and quality of sugar beets. This has resulted in the development of new beet varieties that are better suited to the Michigan climate and soil conditions.

The high yield of sugar beets will also have a positive impact on the Michigan sugar industry, which is the largest in the United States. The industry is expected to produce about 400,000,000 tons of raw sugar beets, which will be converted into white sugar through the refining process.

The high yield of sugar beets will also have a positive impact on the Michigan economy, as the sugar beet industry is one of the largest employers in the state. The industry is expected to provide jobs for about 30,000 people, which will have a positive impact on the local economy.

In conclusion, the large yield of sugar beets this year is due to the favorable weather conditions and the use of new beet varieties, which are more resistant to diseases and pests. The high yield will have a positive impact on the Michigan sugar industry and the local economy.
