SERIOUS POTATO PEST DISCOVERED AND ELIMINATED

Day's Ag, Finds Tobacco Worm in Shipments From Virginia

Leslie Maxwell, of the tobacco inspection service of the Department of Agriculture, made the discovery around Baltimore last week. The pest, which has not been found before in tobacco shipments, is a small white worm which feeds on the foliage of the plants. The worm is about one-eighth inch long and white. The worm was found in a shipment of tobacco leaves from Virginia. The pest is being studied by the entomology department of the University of Maryland.

TURKEY GROWERS HAVE BIG MEETING

950 From 41 Counties at Lake Macomber Industry

The Michigan Turkey Growers Association held its annual meeting at Lake Macomber yesterday. The meeting was attended by more than 950 growers from 41 counties. The association is working to improve the quality of the birds and to promote the sale of turkey products. The meeting included discussions on marketing, production, and industry trends.

KENNEDY PROPOSES TWIN BILL TO ELIMINATE NATIONAL POST OFFICE

Kennedy's proposal seeks to dissolve the National Post Office and replace it with a network of private postal companies. The new system would consist of 26 regional companies, each responsible for a specific area. The bill is intended to decrease the national deficit and provide a more efficient postal service. The proposal will be introduced during the next session of Congress.

WASHINGTON, D.C. - President Kennedy today introduced a twin bill to dissolve the National Post Office and replace it with a network of private postal companies. The new system would consist of 26 regional companies, each responsible for a specific area. The bill is intended to decrease the national deficit and provide a more efficient postal service. The proposal will be introduced during the next session of Congress.

INDIANA ENACTS 1 1/4 PCT. TAX LIMIT

Special Session Does What Michigan Has Not; Will Vote Upon

Hazelwells will be the Farm Secretary in Indiana, but he does not see a revival of farm prosperity. He predicts that the farm situation will remain critical for the next few years. The Indiana legislature has enacted a tax limit of 1 1/4 percent on all taxes. This limit is intended to prevent excessive taxation and to provide a more stable tax structure for the state.

SAFE FUMIGANT KILLS WEEVILS

Chemical Destroys Insects Without A Fire

Hazard

Roy L. Lamb says the chemical fumigant, which is used for killing weevils, is safe and effective. The chemical fumigant is non-flammable and does not require a fire to be effective. It is safe to use around livestock and other animals. Roy L. Lamb says the chemical fumigant, which is used for killing weevils, is safe and effective. The chemical fumigant is non-flammable and does not require a fire to be effective. It is safe to use around livestock and other animals.

STRAW-centralized and farm-controlled. It is the key in the complex system of wheat marketing. The Minneapolis Grain Exchange, the Chicago Board of Trade, and the Kansas City Board of Trade, among others, are involved in the system of wheat marketing.

THE NEW - The new centralized and farm-controlled system is the key in the complex system of wheat marketing. The Minneapolis Grain Exchange, the Chicago Board of Trade, and the Kansas City Board of Trade, among others, are involved in the system of wheat marketing.

HOMESTEADING LAW ENACTED

LAND IN STATE OF PAST

Available Tracks Are Used For Agricultural Purposes

Timber Grove - The change to state ownership of timber groves is expected to save the state's forests. The state has purchased several timber groves for agricultural purposes. The timber groves are being used for the cultivation of trees and for the production of timber.

BUSTED BY DEPRESSION, SOME BECOME SHACKERS

Many old widow farmers have been thrown out of work by the depression. They are now living in shacks and working for wages. The state has a program to assist these people, but many of them are still in poverty.

NEW LEAD PATTERN ON THE WAY

Oncie-lb lead patterns, which are used in the manufacture of ammunition, are expected to be marketed soon. The new patterns are expected to improve the performance of ammunition and to increase the effectiveness of hunters.

WOOL ENACTED

ASSN ADVANCE IS UP TO 8¢ PER LB.

Wood Prices Are Advancing: 7 Cents of 1932 Wool

Lonnie McMillan, California Wool Marketing Assn. has advanced the wool price to 8 cents per pound. This is the first price change in over a year. The advance is expected to encourage the wool industry and to increase the demand for wool products.

Wool Prices Move Up: National Leads Way

Bust in wool prices has occurred, with the National Wool Marketing Assn. leading the way. The prices have risen by 10 cents per pound. This is the first price change in over a year. The advance is expected to encourage the wool industry and to increase the demand for wool products.

CONSTRUCTION ON PATTERN IN FINISHING

The new pattern for fining is expected to improve the quality of wool products. The pattern is designed to remove impurities and to improve the appearance of wool. The pattern will be marketed soon.

SUGGESTIONS TO FARMERS

HORNET EXPLAINS WOOL GAINS

F. E. Jones, who has been investigating the wool industry, explains the gains in wool prices. He attributes the gains to the increased demand for wool products and to the improved quality of wool. He predicts that the gains will continue in the near future.

 replaced the crooked oriented fibers by a uniform, straight, parallel network of nearly monodispersed, high-modulus fibers. I. P. D. and J. G. B. have also shown that this fiber network is the key to the strength of the macrofibrillar structure.
Draw Your Own Conclusions

On the whole, however, the fruits of the Federal Farm Board appointment in terms of public information dollars has been a failure. So it would appear that the Board is paying the price of its failure in the public relations battle for control of public opinion.

To his credit, Chairman E. R. Clark, in his recent annual report, did disclose that the Board was spending $800,000 to $1,000,000 annually on public relations activities. This figure is lower than the $1.5 million he had previously estimated. But it is still a significant sum for a government agency.

In the past, the Board has been criticized for its inability to reach the general public with its message. The problem is that the Board's message is often too complex and technical for the average person to understand. It is also difficult to understand how the Board can justify spending so much money on public relations when there are so many other pressing needs in agriculture.

The Board has also been criticized for its reliance on traditional media such as newspapers and radio. This is an outdated approach to public relations in an era of digital communication. The Board should be using social media and other online platforms to reach a wider audience.

In conclusion, the Federal Farm Board's public relations efforts have failed to achieve their goals. The Board needs to reevaluate its strategy and invest more in public education and outreach programs.
We Can Fill September With Pleasant Work and Pay Days

Good Time To Apply Lime

For best results with lime, apply several months to a year in advance of the crop for which it is intended. It may be applied as a dry or to be turned under for a tillage crop. Lime needs time to re-enter soil. There need be no fear of using the value by applying it now. See your co-op or farm bureau dealer for information.

Farm Bureau Oil For Plowing

Farm Bureau Oil is paraffin base, designed and built to stand up under the hardest working conditions in your tractor, truck or automobile.
