Bank Deposits Guaranteed Soon

Effective Aug. 1, the Federal Reserve will guarantee all bank deposits of $5,000 or less, in accordance with the
recommendations made by the committee of the Joint Session of Congress.

The agreement provides that the new system will start with a 25 per cent risk, and that the guarantees will be raised
to full, if necessary, in the event of a depression. The banks will be able to get it started.

Farmers Must Pay

For the first month of the calendar period, the Department of Agriculture will allow the new farmers to
sell their crops in the year and pay 1 per cent of the value of their
produce. The present tax might be called a "tax on crops," but it is really a tax on labor, as the farmer
must pay for the labor of working on his farm.

Salvaging Gold from

By using up the surplus rubber used to wipe the excess gold from the gold bullion, we are able to
salvage the gold from the gold bullion. The process of salvaging gold from the gold bullion is as follows:

1. The gold bullion is melted down to a fine powder.
2. The gold powder is washed and filtered to remove the impurities.
3. The gold is then treated with a solution of sodium hypochlorite to remove the impurities.

New Food and Drugs

Bill to Protect Public

Washington—A new federal law that will give the Food and Drug Administration new powers to regulate
the manufacture of drugs, food, and cosmetics was passed by Congress. The law will take effect in
August and will become effective in October.

Horses of Leadership

Winston Wilson said, "The right hand from the horse's position, is the hand that
will save its life in battle. It is the hand that will hold its head high in battle."

H. E. U. U. S. "This is the right hand of the

Lack of Ordinary Fault in Home Folks a Costly Fault

We View With Suspicion Too Common Sense

By MRS. EDITH M. WAGAR

I.

This is the second part of a three-part series about the need to develop common sense.

As a product of the Industrial Agricultural School, I have been trained to look for the worst in people and to assume that they will not cooperate. This attitude has carried me through the years, and I have found that it is necessary to be on guard at all times.

II.

Recently, I was invited to join the military forces of a neighboring country. The offer was tempting, but I hesitated to accept it. I remembered the stories I had heard about the treatment of American soldiers in that country.

I asked a few questions, and then the captain said, "If you join our forces, you will be guaranteed a safe and comfortable life." I thought about this for a moment, and then I decided to join.

III.

The training was rigorous, and I was assigned to a difficult task. I was responsible for the safety of a group of soldiers, and I had to ensure that they were not harmed.

One day, a soldier came to me and said, "I don't like this place. It's too cold and wet. I want to go home." I told him that he had to stay, and that he would be taken care of.

The next day, the soldier was found dead in his tent. I was shocked and saddened by his death, and I realized that I had not given enough thought to the situation before accepting the offer.

IV.

In conclusion, I urge everyone to be cautious and to think before taking any action. Common sense is a valuable asset, and it can save lives. I have learned this lesson the hard way, and I hope that others will learn from my experience.
