Farm Bureau Reports **On Success of Legislative Program** Prior to the Opening of the 1933 Legislative, the Michigan State Farm Bureau

and Associated Farmers Legislative Clubs, organized largely around farmers co-operative ass'ns, drafted a 9 point legislative program. The program and the final action from our viewpoint follows:

D

OUR PROGRAM	PROGRESS IN THE LEGISLATURE
1. Promote government economies.	1. We supported 97 Hartman-Brown economy bills. 73 enacted.
2. Application of the 15 mill law,	2. Allocation Bill, H. B. 184 was re-written in farmers' interest.
3. If any new-taxes, we favor an income tax we oppose a sales tax.	, 3. We couldn't stop the sales tax, but we helped eliminate some bad features.
	Our proposal to earmark sales tax money 10-10-15 millions for State, Welfare and local schools lost in House, but Senate accepted principles on 12-19-15 basis, which became law.
	We supported graduated income tax. It lost in Senate 16 to 15.
4. Limit road expense to auto and tax revenues.	
5. Cut school costs and tuition charges.	5. Cared for in several bills having our sup- port. We supported writing \$15,000,000 school aid into sales tax and supported House Bill 500 as plan to distribute it to give aid to schools whose taxpayers need it most.
6. Cut telephone rates.	6. Supported bill to shake up utilities commis- sion which has power to act.
 Lower 7% charged farmers for Federa money to 35% or less given other groups (Nat'l Legisation). 	
 Long time redemption for delinquent taxés installment privileges; reduce penalties. 	* Supported Bellows Act which drops all in- terest, penalties on any back tax paid by July 1, 1933. Legislative Resolution of last day of session extends this to Nov. 1, 1933, on 1932 tax only.
	Our suggestions embodied in Moore-Holbeck compromise bill suspending all delinquent taxes back of 1932 to Sept. 1, 1935 without interest. Payable in 10 annual installments, with 4% interest.
	1932-33-34 taxes follow regular tax laws.
 Limit any county to 25% of Senate or House in any reapportionment of legislature. 	9. No reapportionment bill considered by Leg- islature. Majority of House Committee on Reapportionment favored 25% limitation.

FARMER MUST PAY 3 PCT. SALES TAX **ON RETAIL SALES REGULARLY MADE FARM NEWS LEARNS IN INTERVIEW**

Produce Sold at Roadside Stands, City Markets, House to House Taxable; News Interviews Sales Tax Board's Legal Advisor For Farmers and Co-ops

Farmers who sell produce at retail from roadside stands, at city markets, or from house to house, or otherwise as a regular business, part or all of the year, must pay the 3% retail sales tax effective July 1, and have a \$1 State license to conduct such business. They must make regular monthly reports to the Sales Tax Board at Lansing, the Michigan Farm News learned today in an interview with Ass't Attorney General Ward, legal advisor to the Board.

When a farmer sells his neighbor or some one else seed, a brood sow or other commodity NOT as a regular means of disposing of his produce, the sale is not taxable because it does not come under the definition of the term "sale at retail" which is quoted from the law:

'Sect. 1 (b.1) The term 'sale at retail' means any transaction by which is transferred for consideration the ownership of TANGIBLE PERSONAL PROPERTY, when such transfer is made in the ORDINARY COURSE of the transferor's business and is made to the transferee FOR CONSUMPTION, OR USE OR FOR ANY OTHER PURPOSE THAN FOR RESALE in the form of tangible personal property

"The term 'sale at retail' includes conditional sales, installment lease sales and any other transfer of such property when the title is retained as security for the purchase price, but is intended to be transferred later.

"The term 'sale at retail' shall NOT include an ISOLATED transaction in which any tangible personal property is sold. transferred, offered for sale, or delivered by the owner thereof, or by his representative for the owner's account, such sale, transfer, offer for sale, or delivery NOT being made in the ORDINARY COURSE of REPEATED AND SUCCESSIVE TRANSACTIONS of a like character by such owner or on his account by such representative." (The capitalization is ours .- Editor.)

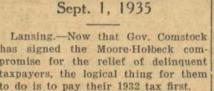

Therefore, the farmer or any one else may sell an occasional lot of seed or live stock, or tools, or furniture, etc., at retail and not be taxed, but if he makes a practice of selling seed, brood sows, potatoes or any other product direct to other producers or consumers "for use, consumption or any other purpose except for resale" he qualifies as a retailer and must get a license and pay 3% tax on the gross proceeds of such sales.

The term gross proceeds means the total proceeds of the

sale. No deductions for cost of materials, labor, interest or uct ten years ago, it is now being put Wool Has the Most Promising any expenses whatsoever are allowed. Credit may be taken or goods returned. Sales to State or local governments and

third after the 1934 harvest.

Michigan farmers may elect not to reduce the acreage of their soft red winter wheat, since it draws a premium price. If wheat brings a good price, they may want to let well due Sept. 1, 1935, and thereafter must enough alone.

With dairy products sugar beets and beans it is different in Michigan. Most of the condensaries in Michigan have subscribed to a marketing agreement which has gone to Washington for approval. The condensaries would up their price, refrain from underselling and raise the price to the farmer. Should a condensary undersell, the Secretary of Agriculture could withdraw its license to operate. The Michigan Milk Producers and distributors of the Detroit and other areas served by that co-op have sent their plans to Washington for ap-proval. They plan to start paying the determined and entered separately and the master roll probably will refarmer not less than \$1.85 for fluid quire 3,000,000 such entries. milk.

Bank Deposits Guaranteed Soon

Effective January 1, 1934, the Federal government will guarantee all bank deposits of \$2,500 and less 100%, in accordance with the Glass-Steagall Act, one of the last pieces of legislation enacted by the special session of Congress.

After July 1, 1934, the Act provides that all deposits below \$10,000 shall be guaranteed 100%; those between \$10,000 and \$50,000 shall be guaranteed 75%, and those above \$50,000 shall be guaranteed 50%.

The guarantee is to be accomplished from a fund to be created by the banks contributing one-half of 1% of their demand deposits annually. The Federal government will loan the guarantee fund a considerable sum to get it started.

This is deposit insurance for bank depositors. Some months ago when the Farm News supported editorially the plan of Congressman Woodruff of Michigan for guaranteeing bank deposits by an insurance fund created by the banks, the enactment of the principle seemed far distant. Banking opposition was powerful, particularly in New York. But even New York banking interests counted for little as against the flood of public opinion that has flowed in on Congress these past few months. The peole demanded that bank deposits be guaranteed in the future.

It develops that New York City banks hold 25% of the total deposits of member banks of the Federal Reserve system and will contribute 25% of the nation's bank guarantee fund. The Chase, National City and First National Banks will contribute 10% of the total. They have been harnessed for the common good, despite their powerful lobby against the bank deposit guarantee bill.

The guarantee fund will be contributed by all member banks of the Federal Reserve system and paid into the Federal Deposit Insurance Corporation. State banks may have the deposit guarantee extended to them providing they subscribe to the stock of the Deposit Insurance Corporation, and providing their solvency is approved by their State Banking authorities and the Deposit Insurance Corporation. To retain the guarantee, they must join the Federal Reserve system by July, 1936. It is quite possible that some State banks can't make the grade; that others will deflate further to make certain of passing the examination, and that depositors will go from uninsured banks to insured banks, thus forcing all banks in the direction of the Federal Reserve system.

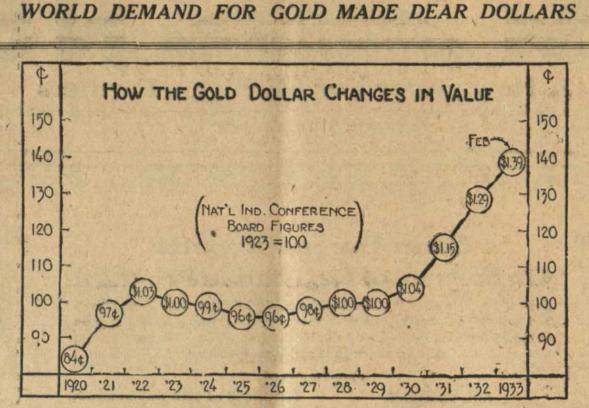

When Prices Are High

Congress adjourned in June with the national debt standing at 22 billions of dollars. In 1929 it had been reduced to slightly under 17 billions, a nine billion shrink from the high point of nearly 251/2 billions in 1919.

We are also advised by the U. S. Treasury that we will have a three billion deficit July 1, representing the money poured out by the Reconstruction Finance Corporation and the difference between the dally income and outgo of the Federal government for the past year. Sometimes that difference has been several million dollars per day on the wrong side of the books.

Notwithstanding that State and local governments, businesses and individuals increased their debts in many instances during the period of 1919-29, the people were prosperous enough at those price levels to live well and pay their taxes at least. The Federal government paid its way and reduced the national debt nearly one billion dollars a year for each of nine years.

In 1919 the farmer was prosperous and business hummed. If the administration at Washington can so manage its price improvement program for agriculture and industry so that the farmer's products will ell for dollars as big as those he needs when he buys, as they did after MICHIGAN FARM NEWS

WANTED-WORK ON DAIRY OR The domestic wheat carryover in 1927 was 71,000,000 bushels. In 1930 it had mounted to 215,000,000 bushels and in 1932 it was 277,000,000 bushels. Joseph St., Lansing, Michfgan, 1927 was 71,000,000 bushels. In 1930 it had mounted to 215,000,000 bushels

LET THE TELEPHONE **HELP YOU OBTAIN GREATER PROFITS**

Almost every day new prices for farm products are quoted, differing in various towns and cities.

Because of such variations in prices, the farmer who has a telephone enjoys a distinct advantage. Before selling, he can call various buyers, determine the best prices, and then sell when and where they are highest.

Such use of the telephone often brings enough additional profits to more than pay for the service for months.

A telephone on the farm "pays its way."

MICHIGAN FARM NEWS

SATURDAY, JULY 1, 1933

LEGISLATURE GAVE COMSTOCK 25 PCT.

FOUR

The State Journal Scores 17 Promises by Governor And His Party

Lansing-The 57th legislature, dominated by democrats, was about 25.4 per cent efficient, so far as carrying out the promises of Gov. William A. Comstock and the democratic state platform are concerned. There were 10 chief points in the address of Governor Comstock to the legislature, January 5; there are seven others in the state platform. On a basis of 100 per cent for complete realization of all pledges, each point is worth 5.8 per cent, if they be valued equally, according to the State Journal, Lansing's daily newspaper.

The points, and the score:

Welfare relief-Met by passage of the Kulp bill and appropriation of | \$12,000,000 from sales tax, which permit further R. F. C. loans. This scored 5.8 per cent.

Unemployment aid - Bill providing for commission of inquiry died, 0 per cent.

Old age pension-Republicans forced real bill through over meaningless democratic bill, but democrats voted for it, so credit is given for 5.8 per cent.

Primary school fund supplemental aid-An appropriation of \$15,000,000 from excess of sales tax and from general fund means little, save, on paper. Thus, 0 per cent for this one. Delinquent tax aid-Moore-Holbeck

(republicans) law for 10-year moratorium brings 5.8 per cent.

Pre-primary convention system -Bill failed 0 per cent.

Workmen's compensation extension to cover occupational diseases - bill failed 0 per cent.

General revision of constitution-0. Repeal of 18th amendment and kindred wet laws-almost a bull's eye here, but the beer costs twice what Governor Comstock promised. The thirsty are not getting "nickel beer,"

thus, 5.0 per cent, Revision of the corrupt practices act: "publicity for campaign expenses and receipts" - Governor Comstock was the first to refuse to file a statement of expenses, therefore, another

The state platform:

Co-operation-The governor and the legislature, and latterly even several democratic leaders, have been at cross purposes all session. Another zero.

Reduction of small loan rates-New law reduced it from 31/2 to 13/4 per cent a month; slash of one-half, thus, 3 per cent.

Abolition of tax-exempt bonds-Legislature can't do anything about this; resolution seeking reform from congress turned down on day of adjournment. Another 0.

Establishment of a fair trade commission-Bill died in committee, 0. Centralization of authority-Legislature passed two score bills taking

OF HIS PROGRAM SOW ALFALFA THIS SUMMER Farm Bureau Seeds at Today's Prices

Save Again by Sowing Less of These Certain Seeds Per Acre

Farm Bureau alfalfa on Fred Curtis Farm, Lake Odessa

ALFALFA IS THE CHEAPEST PROTEIN

Michigan dairy herd improvement ass'n records show that in 1932-33 grade and pure-bred cows on test, depending on HOME GROWN ALFALFA for the BULK of their protein feed paid the best returns over the cost of feed. They paid a profit even at the low prices paid for milk.

Alfalfa sown this summer will pay handso mely on better prices for milk, which we regard as certain to come in keeping with price advances already made in other farm products and other lines. Prices are advancing. Two acres of alfalfa per cow for pasture and hay purposes is recommended.

Farm Bureau alfalfa seeds are the standard of perfection for Michigan farmers. They are selected stocks of the heavy-yielding, northern grown, winter-hardy varieties recommended by the Michigan State College. Undoubtedly, alfalfa seed prices will advance soon. Farm Bureau seed is sure and goes furthest. Prepare seed bed thoroughly. If soil is acid, lime as far ahead of seeding as possible. Seed before September 15.

KENTUCKY BLUE GRASS

Our cheapest permanent pasture! Now's the time to make the cheapest possible good permanent pasture out of fields that may be idle under President Roosevelt's farm prices legislation. You'll find it's good pasture. We offer 19, 21 and 23 lb. stock, priced right.

Certified HARDIGAN and GRIMM

Michigan's highest yielding and highest quality hay. Sow 7 to 8 lbs. per acre. It's eligible for certified seed production.

MONTANA GRIMM

A Bargain for Seeding This Summer

For many years Michigan has drawn much of its supply of certified GRIMM, the old standard of perfection for winter-hardiness, long enduring stands, and high annual yields from Montana and the northwest. Much of the best Michigan grown Grimm came originally from Montana. Farm Bureau's MONTANA GRIMM for 1933 is choice, hardy, highly productive. You can have the best in Grimm alfalfa at near common alfalfa prices while our present stocks last. Sow 9 to 10 lbs. per acre. See your Farm Bureau seed dealer at once.

MICHIGAN VARIEGATED

A Great, Low Cost, Long Lived Hay Producer

Michigan Variegated comes from fields sown to genuine Hardigan, Grimm, Ontario Variegated, Lebeau, or Cossack varieties, which are our hardiest, longest lived and heaviest yielding varieties. These fields were not registered for certified seed production, but they have produced seed, which is known as Michigan Variegated.

Farm Bureau's Michigan Variegated is guaranteed to meet State College Farm Crops Dep't requirements as to origin, ancestry and the variegated bloom characteristic of this hardy grown Michigan alfalfa. Variegated is an excellent hay yielder. Naturally so, from such parents. The seed is selected, high test, thoroughly cleaned. It's the best in alfalfa at a price that is a money saver. For several years it has been in great demand. Sow 9 to 10 lbs. per acre.

Common Alfalfa

This hardy, western grown common alfalfa is growing on thousands of Michigan farms. It gives very good results. Priced low. Sow 10 to 12 pounds per acre.

Lot 1711

This limited quantity of MONTANA GRIMM is a bargain because it contains 3% sweet clover, which will be eliminated in the first hay cutting. Ask your dealer about it.

LIME

FOR

ALFALFA

Good Binder Twine News

Michigan, Ohio and Indiana Farm Bureaus have arranged for the manufacture of Farm Bureau Binder Twine by one of the largest and best equipped manufacturers in the United States.

FARM BUREAU TWINE is made of the highest quality materials by skilled workmen. It must pass many factory inspections and our inspector. WE COMBINED our purchasing power for your advantage. We offer:

FARM BUREAU TWINE 500 ft. per lb. in 5 or 8 lb.

authority from administrative board and tried to abolish the board itself, 0. Uniform text books for public schools-Bill failed 0.

Economy in government-\$23,000,000 property tax abandoned, governor asked for \$46,000,000 tax program and got one of about \$40,000,000; a bill to reduce number of employes of legislature went into icebox early in session; special licenses and privilege fees enacted, 0.

Total score: 25.4 per cent.

Strange Seeds in U.S. **Collection from Abroad**

Strange seeds from many lands ranging from orchid seed which is a dust so fine it can scarcely be felt, to the double coconut which is a foot in diameter and weighs up to 50 pounds, are found in the collection of foreign seeds of the Division of Foreign Plant Introduction of the United States Department of Agriculture in Washington. Of the 289 different seed families in the world 219 are represented in the collection.

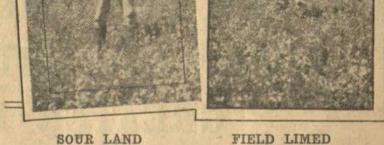

Among the seeds is that of the traveler's tree of Madagascar. These seeds are about the size of a coffee kernel and are covered with a silkyfringed coat of bright green. The seed of the bird of paradise flower is black. but half of it is covered with a brilliant scarlet plume.

The Australian eucalyptus has small brown seeds, shaped like tiny boomerangs. Watermelon seeds from Russia have a broken pattern on the outside which often resembles the face of a monkey. A queer tree seed from China has five wings on the body and three shall wings and two large ones growing from the top.

One of the most interesting of the seeds is from Java. It is the seed of a sort of squash which climbs to the top of the tallest trees. The fruits open and scatter seeds an inch in diameter with a crescent shaped wing 6 inches long and 2 inches wide. The seeds are so shaped that when released they sail down to the ground in a spiral about 20 feet in diameter, resembling tiny airplanes.

LESPEDEZA NOT SATISFACTORY

Lespedeza, a crop which has been widely advertised throughout the nation during the past few years, has given unsatisfactory results in this territory and agronomists are urging farmers to rely upon crops with which they are more familiar.

SOUR LAND

Alfalfa does not grow well on lime deficient soil. LEFT, alfalfa on sour land. RIGHT, alfalfa on a portion of the same field which was limed.

> Alfalfa MUST have a sweet soil. It will NOT make a profitable stand on soil deficient in lime, says the State College Soils Dep't.

ALFALFA NEEDS LIME. Alfalfa planted on lime deficient soil may start off well, but comes through the winter poorly for lack of vigor. The nitrogen fixing bacteria in the alfalfa root nodules will not grow in a soil greatly deficient in lime.

Lime applied for summer seedings should be applied as far in advance. of seeding as possible. Lime applied now should be worked into the soil thoroughly. If in doubt, test your soil with a SOILTEX outfit from State College, East Lansing. See your Farm Bureau dealer for these superior, low priced limes:

KILLS FLIES!

Farm Bureau Fly Spray has no superior for cattle and other out door uses. The price is right. Our KILL-FLY for household use kills flies, mosquitoes, moths, ants, other Insect pests. Will not stain curtains or furniture. See your co-op.

Solvay Limestone from the Farm Bureau, France Agstone Meal. Bulk only. Farm Bureau Hydrated Lime. Bulk and 80 lbs. bags.

They Do Best on Mermash

Pen against pen tests between Mermash 16% and other poultry rations prove that Mermash has "something" the others haven't. Allen G. Cummins of Calhoun county compared chicks raised on Mermash with a pen raised on another ration:

AGE	MERMASH 16%	"" RATION
	CHICKS	CHICKS
2 wks.	3.40 oz. 6.05 oz.	3.15 oz.
3 wks. 4 wks.	10.15 oz.	5.17 oz. 7.02 oz.
minet () Clam	athing !! in Manual in Man	annan a mar di

That "Something" in Mermash is Manamar, a product made from a Pacific Ocean plant called kelp, and ocean fish meal. Manamar supplies poultry with iodine and other essential minerals from the sea in food form. Michigan soils lack iodine. Chicks and pullets respond with cheap, thrifty growth and early maturity. Hens main-tain steady production of better eggs. Mermash is low cost feed for chicks, pullets, laying hens.

balls. Av. tensile strength not less than 85 lbs. FARM BUREAU TWINE 600 ft. per lb. in 5 or 8 lb. balls. Longer Manila fibre. Av. tensile strength not less than 100 lbs.

NOTE-the 600 ft. twine gives you 20% more footage and costs only about 13% more per pound. We recommend it.

- 500 or 600 ft. per lb. · Criss-cross winding. No snarls or breaks.
- Insect treated.
- · Strong, uniform.
- · Thoroughly tested.

MIDCONTINENT OIL 5 gal. Cans or in Drums

Farm Bureau Dealer

100% PURE

PENNSYLVANIA

OIL

BUREAU PENN

PENNSYLVANIA OIL

This has been an ideal breeding season for flies, mosquitoes, moths and other insect pests. Ask your Farm Bureau dealer for Farm Bureau Fly Sprays. They're quick, effective, stainless, harmless to man or animals, and are low priced for the quality. We use 1 lb. of pyrethrum per gallon. Sprays of simiar effectiveness sell for at least 15% more.

FOR CATTLE Farm Bureau Fly Spray (gallon, 5 gal. & drums.)

FOR HOUSEHOLD USE Farm Bureau "Kill-Fly" (pints, quarts, gallons)

You Can Pay More But **Get No Better Oil**

You can't get out of oil or grease more service than its quality will give. That's why Farm Bureau oils and greases are paraffin base. Refined and compounded by the long, quality building process rather than short methods which ignore some impurities harmful to motors. Good oil costs less than repairs.

We offer a complete line of automobile, truck and tractor oils, greases and other lubricants. 50,000 farmers in Michigan, Ohio and Indiana use Farm Bureau oils.

Farm Bureau oils and their 30 to 35c per qt. brothers, owned by the great oil firms, come from the same fields. Farm Bureau oils cost you less because Michigan, Ohio and Indiana Farm Bureaus own a co-operative blending and distributing plant. The saving is worthwhile.
