Farm Bureau in Illinois Uses Alcohol-Cassette

A Quartz Laboratory is used for the production of alcohol by fermentation of the carbohydrates. These laboratories are located in every county of the State. Each laboratory is equipped with modern machinery and staffed by well-trained chemists. The laboratories are operated by the Illinois State Board of Health, which is responsible for the quality and purity of the alcohol produced.

The laboratory processes the alcohol into a form that can be easily transported to the various locations where it is needed. The alcohol is then distributed to the various farms, where it is used to make various products, such as wine, whiskey, and other beverages.

The laboratory is also responsible for the quality control of the alcohol produced. This includes testing the alcohol for purity and potency, as well as ensuring that it meets all federal and state regulations.

The laboratory is staffed by experienced chemists and technicians who have been trained in the latest methods and techniques for the production of alcohol. They work closely with the farmers and other users of the alcohol to ensure that it meets their needs and expectations.

In conclusion, the Illinois State Board of Health’s laboratory is an essential part of the alcohol production process in the State. It is responsible for the quality and purity of the alcohol produced, and works closely with farmers and other users to ensure that it meets their needs and expectations.

**Mortgage Payments Now Three Times Greater in Farm Produce**

A farmer who serviced a mortgage on his farm to the tune of $10,000 three years ago, now finds that the mortgage payments are three times greater than before. This is due to the high cost of living and the increased interest rates.

**DEMAND FOR GOLD INCREASED MORTGAGE DEBTS**

The demand for gold to meet the increased mortgage debts is growing. Farmers are finding it increasingly difficult to meet their mortgage payments due to the high cost of living and the increased interest rates. The result is a growing demand for gold to meet these debts.

**SALES TAX HURDLES EARMARKED**

The Michigan Legislature has earmarked sales tax funds for the construction of schools. This is a significant step towards ensuring that all children have access to quality education.

**FARM CONFERENCE MAKES SALE OF FUSILIER FUND**

The Michigan Farm Bureau has sold 15,000 acres of land to raise funds for the construction of schools. This is a significant step towards ensuring that all children have access to quality education.

Sec'y Wallace and the Farm Bill

"Whether Maine or Michigan can buy a system of agriculture attractive to the Department of Agriculture and the three experiment stations in support of the state and national plans of agriculture is something I cannot say. I am always ready to say that the Secretary of the Interior is a Secretary of Agriculture." Mrs. Wallace, Secretary, said in the conference of the Department of Agriculture and the state and national plans of agriculture.

Pyramids and the Sphinx Are Disappearing Sight

So Says E. W. How, Kansas Editor, Combating Them

Although some friends of the Sphinx would not have been greatly impressed, Mr. E. W. How, Kansas editor, in a recent article in his newspaper, Combating Them, states that the Sphinx is slowly being destroyed by the action of the wind and that it is likely to disappear in the near future.

Mr. How says that every year the Sphinx loses a considerable amount of its surface area, and that if this continues the monument will soon be completely destroyed.

He further states that the Sphinx is not the only ancient monument that is in danger of disappearing. He says that the Great Pyramid of Cheops, which is said to be the largest in the world, is also in danger of being destroyed by the action of the wind.

Mr. How suggests that something should be done to save these ancient monuments before it is too late. He says that there is a great deal of scientific interest in these monuments and that they should be preserved for future generations.

The Sphinx and the Pyramids are two of the most famous ancient monuments in the world. They are both located in Egypt and are said to be over 4,500 years old.

Mr. How suggests that the Sphinx could be saved by building a protective structure around it. He says that this would help to keep the sand away from the monument and would also protect it from other forms of destruction.

He also suggests that the Great Pyramid of Cheops could be saved by building a protective structure around it as well.

Mr. How's article has caused a great deal of interest and has been widely discussed in scientific circles. Many scientists believe that he is right and that something should be done to save these ancient monuments before it is too late.
MILK PRICES MUST MOVE UP!

And When They Do

FARM BUREAUS HIGH YIELD ALFALFAS WILL KEEP FEED COSTS DOWN

MICHIGAN VARIEGATED

A Great Low Cost Livestock Producer

Michigan Varyigated comes from fields grown to genuine Hardigan, Grimm, Ontario Variegated, Leberechts, or Comox varieties, which are our hardest, longest lived and heartiest yielding varieties. These seeds were not registered for certified seed production, but they have produced seed, which is known as Michigan Varyigated.

THE BUREAU'S MICHIGAN VARIEGATED is guaranteed in most State College Farm Crops Day requirements as to origin, ancestry and the variegated bloom characteristic of this hardy grown Michigan alfalfa. Varyigated is an excellent hay yielder. Naturalness as from such parents. The seed is selected, high test, thoroughbred ground. It's the best inalfalfa at a price that is a money saver. For several years it has been in great demand.

OTHER FARM BUREAU SEEDS

All Farm Bureau seeds are variation selected for their excellence as crop producers. They are hardy, Michigan adapted, tested for high germination and purity. They are priced right by your own or Farm Bureau dealer.

CLOVERS!

June

Althiek Mammoth Sweet Clover

All Are Very High Germinating Stock

JUNE, the best suitable for hay and a cash seed crop. Mammoth cheap and abundant kurns in plow-under—improves heavy soils.

SWEET CLOVERS for low cost pastures, for hogpphay, for hay grain, for green manure and for seed.

HUSKING and ENSILING CORN

Ensilage Corn: Farm Bureau Yellow Husking, White Gal, Red Ohu, Luminous, Barcza, Bepromelian.

These varieties will grow and produce in much the same manner as Michigan Husking. Fodder without, ensiled, ensiled and ground as feed application.

CERTIFIED ROBUST BEANS

All light and dark Red Boundary Bean.

TIMOTHY

SUDAN GRASS

FIELD PEAS

SOY BEANS

VETCH

FARM BUREAU GUARARANTEE

The Farm Bureau Service, Inc., of Lansing guarantee, less than the difference in the full retail price of the seed, the vitality, description, origin and purity as to be described on the analysis tag on each Farm Bureau bag.

Why Farm Bureau Oils Go So Far

You can't get as much oil or gain more service than its quality will give. That's why Farm Bureau oils and greases are paraffin base. Refined and compounded by the long, quality building process rather than short methods which ignore some impurities harmful to motors. Good oil costs less than repairs.

Any general and sustained improvement in price is bound to be shared by egg and poultry prices. Purifiers, health clubs and public de-lets do best in poor times, but if prices get much better, sales that are not balanced by increased production, will mean less to the farm man.

Egg Prices Will Climb Too

Any general and sustained improvement in price is bound to be shared by egg and poultry prices. Purifiers, health clubs and public de-lets do best in poor times, but if prices get much better, sales that are not balanced by increased production, will mean less to the farm man.

KENTUCKY BLUE GRASS

Our cheapest permanent pastures. More now than ever under President Roosevelt's farm prices legislation. You'll find that it's good-pastures. We offer 19, 21 and 23 lb. stock, priced right.

MILCO RECONSTITUTED OIL

1 lb. $1.10

15 lb. $12.50

FARM BUREAU OILS

FARM BUREAU'S ALFALFA IS THE CHEAPEST PROTEIN

Both guests and budget conscious will find the benefits of alfalfa in their herd and in their farm finances. Alfalfa is the cheapest protein.

COMMON ALFALFA

Lot 1713

This limited quantity of MONTANA GRIMM is a bargain because it contains 200 sweet clover, which will be eliminated in the first hay cutting. Ask your dealer about it.

MONTANA GRIMM

A Bargain for Seeding This Summer

For many years Michigan has grown much of its supply of certified GRIMM, the old standard of perfection for winter-hardiness, long standing stands, and high annual yields from Montana and the northwest. Much of the best Michigan grown GRIMM comes originally from Montana. Farm Bureau's MONTANA GRIMM for 1933 is harder, highly productive. You can have the best of both worlds at near common alfalfa prices while our present stocks last. New 9-10 lbs. per acre. See your Farm Bureau seed dealer at once.

ALFALFA IS THE CHEAPEST PROTEIN

Home grown alfalfa is the best and cheapest protein available for dairy cattle, sheep and hogs. Two acres of alfalfa per cow keeps many feed costs dollars at home. Nothing better than alfalfa pastures for sheep and hogs when managed correctly.

CERTIFIED HARDIGAN and GRIMM

Michigan's highest yielding and highest quality hay. New 7 to 8 lbs. per acre. It's better for certified seed production.

FARM BUREAUS FERTILIZERS FOR YIELD

CORN

POTATOES BEANS BEETS

CORN needs Farm Bureau Fertilizer's water soluble NITROGEN for a quick start, to insure heavy yield and early maturity before frost.

POTATOES usually pay back from extra yield twice the cost of 200 to 300 lbs. or more per acre. The earlier crops pay with a higher per cent of marketable stock.

BEANS respond to a Farm Bureau fertilizer with extra dollars from the extra yield. They mature earlier.

BEETS respond to the 95% water soluble nitrogen in all Farm Bureau fertilizers. We use the highest grade sources of nitrogen, phosphorus and potash.

Farm Bureau Fertilizers are extra dry, free from dusting and easy to regulate in the drill.

LIME

Sure by buying Lime through your Co-op.

FARM BUREAU SUPPLIES SEE YOUR CO-OP OR FARM BUREAU DEALER

KILLS FLIES:

Farm Bureau Fly Spray has the power for indoors and outdoors use. The price is right. The "MILCO" label has become a assurance of quality, and the sales standpoint. Will not affect livestock or fowl. See your dealer.

KILLS WEEDS:

ATLACIDE, the chemical weed killer, kills all winter weeds, clover, quack, poison ivy, thistle*, all weeds, 1 lb. per 100 square feet. ALAKIDE, for low cost hay and seed crops. MAMMOTH cheap and abundant kurns in plow-under—improves heavy soils.
