Adoption of Compromise in Kansas

Kansas farmers have rejected the proposal to give up the Kansas State Fair and to have the State Fair in Kansas City. The proposal was made by Senator H. M. McMillan, who represents Kansas in the United States Senate. He said that the Kansas State Fair is too small and that the farmers in Kansas are not interested in it.

The Kansas State Fair is the largest fair in the United States, and is held every year in the city of Sedalia. The fair is a great success, and is attended by thousands of people from all parts of the state.

The Kansas State Fair is now in its forty-eighth year, and is one of the largest fairs in the world. The fair is open to the public every day from 9 a.m. to 5 p.m., and is closed on Sundays.

The fair is held on the fairgrounds in Sedalia, Missouri. The fairgrounds are located on a large tract of land, and are surrounded by a beautiful park.

The fair is sponsored by the Kansas State Fair Association, which is a non-profit organization. The association consists of farmers, merchants, and other citizens of Sedalia, who are interested in the fair.

The fair is a great success, and is attended by thousands of people from all parts of the state. The fair is open to the public every day from 9 a.m. to 5 p.m., and is closed on Sundays.

22,000,000 Bq. Annual Budweiser Make hand-ins to the Combination

Saturday—Sixteen Michigan farmers report at the State Bank in Lansing to make hand-ins of 22,000,000 bbl. of Budweiser for the coming season. This is the highest amount ever made in Michigan. Budweiser is currently being sold at $1.50 per barrel.

State Bank officials reported that the hand-ins were rebuked February 1 by the State Supreme Court. The court ruled that the sales tax to supplies bought for manufacturing and agricultural purposes is not payable. The court also declared that the sales tax is only payable on supplies sold to persons for household use.

Co-operative creameries of the Midwest

The Michigan cooperative creameries are joining the Midwest cooperative creameries to promote the sale of butter and cheese. A co-operative board was appointed to handle the business of the creameries.

FARMERS CLAIM SERVICE

Let Them Have the Service Available to All Farmers and Co-op Operators

The Michigan co-operative creameries are also joining the State Farm Mutual in offering farmers a service available to all farmers and co-op operators.

The theory is that cutting almost in half the cost of operation is a price breaker which will break the ice for general discussion and contribute to the co-operative movement.

A TELEPHONE IS ALWAYS ON THE JOB

The telephone on the farm brings stock, grain, poultry and produce buyers in surrounding towns within easy reach, making it possible to "stop around" and obtain the best prices for your products.

It enables you to summon the doctor or other help instantly, should emergencies occur. And you can keep in close touch with friends and relatives by telephone, and protection it provides.

Wherever your telephone may be, you can always depend upon its service. That's why so many farmers like you are satisfied with this excellent service.
What Will You Do About Seed!

Prices on all seeds are still near bottom. Early buys of seed should be good buys. We expect the money program and shortness of some seed crops to raise prices.

We're buying seed again but can't say for how long. We want Michigan grown Alfalfa, Sweet Clover, Hubam and Timothy. Send 8 ounce representative sample for bid, or bring seed to our warehouse, 221 No. Cedar Street, Lansing.

**Hardigrain or Grimm**

Stocks are limited. Our advice is to order early if you want certified Grimm or Hardigrain alfalfa seed. Order while the price is where it is. No varieties better for hay, forage, or seed production than Farm Bureau's certified Hardigrain or Grimm.

**Michigan Variegated Alfalfa**

Farm Bureau's Michigan Variegated will be in great demand again this year. Michigan Variegated is a great, low cost, long-lived, heavy yielding alfalfa. Our Michigan Variegated is select, high-test, thoroughly cleaned seed. An excellent hay yielder.

Michigan Variegated comes from fields sown to genuine Hardigrain, Grimm, Ontario Variegated, Lebeau, or Cossack varieties, which are our hardest, longest lived, heaviest yielding alfalfas. These fields were not registered for certified seed production, but they have produced seed, which is not certified. Seed assembled from such fields has been named Michigan Variegated. Farm Bureau's Michigan Variegated is guaranteed to meet the State College Farm Crops Dept's requirements as to origin, ancestry, and variegated bloom characteristic of this hardy, Michigan grown alfalfa.

**Farm Bureau Clover**

Mammoth Clover produces a tremendous crop of cheap humus to plow under. Farm Bureau's Michigan grown Mammoth is top quality seed.

June Clover. Farm Bureau's Michigan grown seed produces thrifty stands that won't winter-kill. High purity and germination always. This seed will go farther per acre.

Sweet Clover. A great soil builder. Has high carrying capacity per acre as pasture. We offer top quality, high germinating seed. While blossom, yellow blossom, Dwarf Essex.

**Farm Bureau Guarantees**

During the present economic depression, Farm Bureau will not go bankrupt, at least not financially. Farm Bureau's Michigan grown seeds are the most productive varieties for Michigan. Heavy yielders and free from crop and weed seeds. This is the year to order Farm Bureau Brand seeds early. See your co-op association about it. Early buys should save money!

**MARINE FOODS IN MERMASH**

Mermash raises better chicks

Mermash, 16% protein dry mash, supplies chicks, hens with indole and other minerals in food form. They are lacking in Michigan soils and crops.

Mermash supplies such minerals from Pacific Ocean kelp (a plant) and fish meal. Farmers note that chicks raised on Mermash are strong, grow fast and feather soon. Pullets come low and lay early.

Mermash contains the best: Ground yellow corn, pure wheat bran, corn middles, maize and bone scraps, alfalfa leaf meal, bully fish meal. To low price please. Ask your coop.

**These Things Make the Best Fertilizer**

1. Nitrogen which is quickly soluble in water and is thus quickly available to the tiny plant when needed most. Nitrogen in Farm Bureau fertilizer is 99% water soluble. 99% water soluble, State law. A vigorous start for the plant is the mission of nitrogen in fertilizer.

2. Phosphate made from Florida rock and potash from the world famous Vermont mines. None better than these.

3. Fertilizer that is extra dry, easily ground and easy to regulate in the drill.
