AUGUST 10, 1934

EMERGENCY Drought Rulings

Hunting season will be 100 days instead of the usual 4 months. Hunters will be allowed a 10 day limit for each

AUGUST 20, 1934

LONG IS CREDITED WITH PASSAGE OF LEMKE BILL

For more information about FARM BUREAU, visit www.farm.com.
The attack has started. The Michigan State Farmers' Institute has taken 350 associated newspapers and announced that for the same tax law as the Michigan Farmers' Outlook, the attack will be brought to the fair. The Michigan State Farmers' Institute is being managed directly by the Institute of Agricultural Economics, which has been appointed to manage the attack.

Two that shall be defeated. Two proposed constitutional amendments, B and C, passed with the approval of the voters, and both are being vigorously opposed. The Institute of Agricultural Economics has opposed both amendments. The Institute of Agricultural Economics has been appointed to manage the attack.

The tax paid on a telephone. This bill is to be paid by every person who has a telephone. The bill will be the same for all persons, regardless of the number of telephones they have. The bill will be paid annually, on the first day of January.

Pulverized limestone spraying lime. This method of applying lime is being used by many farmers. It is very effective in neutralizing the acidity of the soil. It is also very economical, as the lime is applied in powdered form and does not require the use of labor.

Some Observations from the Farm on Public Questions

Mrs. Wagner Writes on Sales and Cash Tax Questions

By MONROE W. WAGNER

All I know about that farm is what my grandpa told me. He was a farmer and he always said that when you own a farm, you owe a lot to the community that supports you. My grandpa was a good man and he always tried to help others in need. He said that if you don't do your part in helping others, then you're not really a farmer. I think that's true.

I've heard that some people say that farms should be taxed like any other business. I don't think that's fair. Farms are different from businesses. They are part of the community and they provide food for the people. If you tax farms like businesses, then the prices of food will go up. That's not fair to the people.

I think that the government should give farms a break. They should be able to keep their land and their animals without having to pay too much in taxes. That way, farmers can stay in business and keep providing food for the people.

I'm not sure what the government should do about the other problems, like the national debt or the environment. But I do know that we should do what we can to help the people who work on farms. They are the backbone of our country and we need them.

For more information on farming and rural life, please see my book "The Farmer's Handbook." It's available at your local bookstore or online.

Yours sincerely,

MONROE W. WAGNER

P.S. I hope you all enjoy my column. I'll be back next month with more observations from the farm.

SATURDAY, JULY 21

Final Date for Delivery of Wool

1934 Wool Pool

Students to close the West Post on July 30 for the delivery of wool. Arrangements were made in the Board of Directors of the Michigan Cooperative Wool Marketing Association to keep a record held in Lansing, only to be delivered for wool until late in August.

Delivery by July 1 is considered necessary in order to get the wool graded in the eastern market. By July 1, all wool should be in the eastern market. This is the time when the wool is being graded and ready for sale. The wool should be delivered as soon as possible after grading.

For further information regarding the delivery of wool or other wool matters, contact the Michigan Cooperative Wool Marketing Association at 512 N. Michigan Ave., Lansing, or your local wool marketing service.

MAIL THIS COUPON NOW

Michigan Wool Marketing Ass'n, 512 N. Cedar St., Lansing. No stamp.

☐ I desire to have my wool marketed. Please send me wool marketing agreement for 1934 and shipping tags and wool sacks for free.

Fly Spray

Farm Bureau Fly Spray for cattle is money in the bank. With the heat of the season, insects become a problem. Fly Spray is a great help in controlling flies.

Farm Bureau Fly Spray contains DDT and Lindane, which are highly effective in killing flies. The spray also contains a repellent that keeps flies away from the animals.

Paymats and Dung Materials

A fancy word for fruit. Quality fruit is the only kind that sells at a profit. When fruit is scarce, there may be more money in a high quality product. Grow "Fancy" fruit! Spray thoroughly, time your applications when they will do the most good and USE DEPENDABLE SPRAY MATERIALS. Quality spray material is as important as Quality in fruit. You will protect your crop profits by standardizing on Farm Bureau or Orchard Brand Sprays and Dusts. Ask your local Farm Bureau Distributor for prices on your requirements.

FARM BUREAU SERVICES, Inc.

Lansing, Michigan

See your Farm Bureau Distributor

"Will you buy my chicken, mister?"

Yes, Swift & Company buys poultry, eggs and butterfat every business day. And pays cash! Swift & Company ships Swift's Premium Meats and Chickens, and Swift's Brookfield Butter, Cheese and Eggs in the same refrigerated cars with meats... The same salesmen sell all of these products to retail dealers... Instead of delivering each product in a different truck, Swift & Company delivers all of them to stores in the same trucks. A most efficient distribution system is the result. For years, Swift & Company's profits from all sources have been only a fraction of a cent per pound.

Swift & Company

In daily touch with more than 25,000 customers everywhere, from coast to coast. Swift & Company is the largest processor of meats, poultry and dairy products in the U.S. Swift & Company is the largest processor of meats, poultry and dairy products in the U.S.

GOOD TIME TO SOW ALFALFA

Has Made Good in Three Droughts

Summer Seeding Now Will Prevent Forage Shortage in 1935

FARM BUREAU ALFALFA MAKER YIELDS LIKE THIS

THREE DROUGHT YEARS in Michigan have proved the superiority of alfalfa as a pasture and hay producer under such conditions. This year after field of alfalfa did well (probably 70% or better of normal) while many clover and timothy fields were not
worth cutting.

JULY SEEDING'S OF ALFALFA is in the summer droughts of 1933 and 1934 for first seed
sow got good starts and came through the winter well, despite little snow. Conditions are
improving for July 1934 summer seedings. Have a good firm seed bed. Lime if needed.
