RECORD BREAKING HEAT AND DROUGHT AT PEAK IN JULY

Drought Has Been World Wide; Never Have We Had a July So Hot

July brought record breaking heat to the corn belt and to the West Coast, and the worst drought in half a century. Drought records at Washington have shown the temperature to be the highest that has ever been recorded during the summer months.

Bureau records at Washington have shown that the conditions are worse than any ever known. In some parts of the country, the temperature has been as high as 110 degrees, and the drought has been so severe that crops have practically disappeared.

The shortage of bread in central Europe, and the drought damage has been severe in September. A marked shrink in domestic consumption has been observed, and feed crops have suffered. The program of the National Wool Marketing Board is to have a basket picnic dinner at reserved seats.

WATSON W. BILLINGS

Mr. Watson W. Billings of Detroit, has been a steady growth in membership. The Bureau is to have a basket picnic and dinner at reserved seats.

For Food Production

FARM BUREAU WINS SUIT OVER TAX LIMIT

A new day for farmers is dawning as a result of the decision of the Ingham County circuit court that the Michigan State Farm Bureau wins the suit. The decision is a victory for the Bureau's entry into the farm machinery business. It is a triumph for farmers everywhere, and a signal for the American Farm Bureau Board of Directors to continue the work of the Bureau and to continue to fight for the rights and interests of the farmers.

The Bureau enters into the fight to the death for the rights and interests of the farmers, and to prove in court that farmers buy seeds, feeds, fertilizers, and other production supplies when they sell crops, live stock and poultry and their products, and that these co-operatives will not look to the State sales tax board for a refund.

Hiram on Paperhanding
By R. B. Clark
I am sure I am not in doubt about any one person. Monday morning and she asked and said, and she is so.

The Michigan Farm Bureau was formed in the early 1920s as a response to the high prices of farm commodities. It has since grown into one of the largest and most influential farm organizations in the United States. The organization serves as a advocacy group for farmers, providing them with a platform to voice their concerns and advocate for policies that benefit the agricultural community.

FARMERS BECOME OWN BANKERS IN PCA ASSOCIATION

Eighty-eight farmers formed the Farmers Mutual Insurers of America in 1941. This organization is now known as the PCA Association and it is one of the largest farmer-owned insurance companies in the United States.

Six Amendments Before Voters in November

Although nearly a score of proposed amendments will be voted on in the November election, only a few will be of much interest to farmers. The most important of these is the one for a $250,000 bond issue for state building purposes.

Should You Face Years of Darkness

You Will Need Guaranteed Income

What the future holds for business, accidents or sickness is very uncertain. But guaranteed income will have one good point. As you will need guaranteed income, you will have guaranteed health. You will have guaranteed peace of mind. You will have guaranteed success. You will have guaranteed happiness.

A TELEPHONE PAYS ITS WAY

As a business aid, a telephone helps find the buyers who are paying the best prices for stock and farm produce.

Drill With Spades Instead of Guns in Marching Germany

Michigan Man Tells Some of What He Saw in Early Germany

The situation was critical. There was little food and water available. The people were starving. The government was disrupted. The country was divided. The situation was critical. But the people of Germany stood together and fought for their freedom. They were determined to win. They were determined to survive.

Michigan Bell Telephone Co.
Dust Storms of Dakota Twice As Bad as You've Heard

Farm Woman Writes About Her Experiences Since Last November

When speaking on Farm Bureau's activities at recent meetings, Mrs. Neal Smith of Clayton, Dakota, told how her county was hit by one of the most destructive of the recent dust storms. Mrs. Smith, who now resides in State Line, said:

"The storm was terrific at first, and it whipped dust and dirt so violently into the air that we could not see a foot ahead. When it finally passed, there was a tremendous amount of dust and dirt on everything, and the author of our farm news was left with a thick layer of dust on all his papers, eye glasses, and other small objects.

"We were told that other parts of the country were affected by a similar dust storm, but I think ours was the worst. The winds were so strong that they even blew the sheaf of hay over the fence. It was a terrible experience, and I hope we never have to endure another one."

Congress Stands Against Summer Fire Hazards

The Michigan State Fire Protection Association, in a special bulletin, warned that summer brings an increase in the number of fires due to carelessness in handling lighted matches and cigarettes. The bulletin stated that a small fire that starts in a cornfield or hayloft can spread rapidly and cause great damage. It is urged that everyone take precautions to prevent accidental fires.

TRIP DOWN SOUTH FOR SOME FARM BUREAU WOMAN

Winner of Speaking Contest in November Goes to Nashville

By EDWIN E. WADAS

Farm Bureau women are signed and ready out of the Michigan State Farm Bureau, 1777 Michigan Avenue, for the national meeting of the National Farm Bureau Federation. The winner of the national speaking contest, Mrs. Ada M. Grimes, Detroit, will be represented by Mrs. Willard Bagley, Detroit, in the national meeting.

"I'm looking forward to the trip down south to represent Michigan Farm Bureau women," said Mrs. Bagley. "I'm sure it will be a great experience and I hope to bring back new ideas for our organization."
OUR CO-OP SPREADER IS NEW

Large Capacity, Low Down, Pulls Easily

Two-Horse Spreader

Here is a real two-horse spreader—light in draft. You can move it with one hand with the horses at rest.

The light, strong steel construction and the wide, continuous tread of wheels which truck makes for lighter draft. The frame is all angle-steel construction, with all self-aligning bearings and Almico-Zerk lubrication.

4½" front wheel tires, 4½" rear. Tires edged rolled.

We Have Made This Spreader Convenient, Strong and Durable

CO-OP SPREADER Box Holds 700 Bushels. It's unbreakable. Kiln-dried oak mantles have a hard, even finish. Built to last. Windamp-steel spreaders are light and strong. The belt is strong and lasting. The result is a low-cost, long life spreader. The spreader box is equipped with an iron pipe to which the turned-in lid is fastened. The lid is heavy, but it rests lightly on the box, making travel a breeze. Worn belts are easy to replace. Two belts are supplied with the spreader. The belt is fastened with a bolt and nut, which joins it to the spreader yoke. The box is made of seasoned oak, bolted to the yoke. Top of box 36" from ground. Metal arrows to 6", Cute horse comfort.

HEAVY STEEL ARMS add strength and dependability. The arms are made of carbon steel and they are of a length which will hold the spreader in position when the horses step on the box. Automatic take-up for 10 or 12 of depth of spreader. Arms must not be fortified for damaging the interior of the box or the spreader. The arms are strong and flexible. The space between the arms is 19½" on center.

CO-OP SPREADER the draft is reduced.

MAIN DRIVE Shaft heavy and drive both boxes and the lifting mechanism. The gear is very strong. The gear case is of metal, the shaft of iron. The frame is all steel-angle construction. The gear case is welded to the frame. It is a strong and efficient unit which turns the scraper.

CO-OP SPREADER is built to twist without hurting them. One chain is put out of gear in case of breakage. The scraper is equipped with a special heavy-duty chain. The chain is made of high-grade steel. The chain is designed to throw the scraper out of gear by simple lifter. The scraper is equipped with a special heavy-duty chain. The chain is made of high-grade steel. The chain is designed to throw the scraper out of gear by simple lifter.

Sow Alfalfa in August

It will Rain. Be ready to sow some alfalfa and hay next summer, whether it's wet or dry. Alfalfa is the only forage crop that has come through with yields this year, and in the drought of 1890 and 1921. Even in September, it will pay to risk 40 lbs. of Farm Bureau seed on five acres, with forage short as it is.

Farm Bureauseed is known as the highest yielding, most uniform forage. Farm Bureau alfalfa is sown in August will make good fall pasture by October, and early next spring. It will save hay, slow a baled and a baled and a baled. Per acre.

FARM BUREAU RYE sown in August will make good fall pasture by October, and early next spring. It will save hay, slow a baled and a baled. Per acre.

Emergency Fall Pasture

PROMISES EARLY SPRING and early next spring. It will save hay, slow a baled and a baled. Per acre.

Simple—Quick Fertilizer

We recommend Farm Bureau Fertilizers because they have the quality, the solubility and the analysis that gets results. Their nitrogen is 95% water soluble and quickly available as against 70% required by State law. Our phosphorus and potash carriers are the best. Farm Bureau fertilizers are extra dry and granular and easy to measure. Price list.

WIRE TIES

Wire tying and anchoring equipment is available. This equipment is designed to save time and labor. The Wire Ties are strong, durable and easy to use. The Wire Ties are sold by the box and are available in various lengths and widths.

Grain Prices

Urged Fertilizer

HEAVYSEEDS COUNT UP QUICKLY. Prospects for continued better grain prices. Fertilizers go on when. Alfalfa and other crops following fertilized wheat always show larger increases in yield. You get two returns from fertilizing.

More Returns from Fertilizer

WE RECOMMEND FARM BUREAU FERTILIZERS because they have the quality, the solubility and the analysis that gets results.
