Saples Taxes Savings Under Flynn Act

The American Liberty League, headed by nationally prominent leaders, has succeeded in convincing the District of Columbia Circuit Court to reconsider the Constitutionality of the Agricultural Adjustment Act, as it applies to Michigan.

The attack by the American Liberty League on the Walsh Act has been successful. The Michigan Agricultural Wilson Act was passed by Congress and signed by President Wilson in 1912. It is the law of the land and the question is now whether the constitutional amendment, which it is claimed affects the states, can be studied by the courts.

FARM BUREAU PROPOSAL TO Promote Rural Electrification in Michigan

Farmers have been asking for power companies to supply electricity to their farms for many years, but the companies have not been willing to do so. The farmers' allotments are now around one fourth of a kilowatt hour per day, and this is not enough to supply the needs of a farm. The farmers want a reasonable increase in their allotments.

The Camp-Meeting Ground
by Z. S. Clark

Once a week we take a walk with our vacation, and only that any of our two children were interested. This will be a real vacation of our part. We used to take the walk for a week, or even longer, but now we only take a few days. We are one of the many who take such a vacation, but there are others who do not. Our vacation is a real one, and we enjoy it.

The automobile, the truck and the improved road have made great changes in the character of the farm. The automobile has made the road a more important factor in transportation than ever before. The truck has made it possible to transport goods more easily and quickly than ever before. The improved road has made it easier to travel on the road than ever before.

We have been able to transport goods more easily and quickly than ever before, and we have been able to travel on the road more easily and quickly than ever before.

Farm Bureau Presents Electric Power Plan

The Farm Bureau has presented a plan for the establishment of electric power plants in the United States. The plan is designed to provide an adequate supply of electric power for the rural areas of the country.

The plan is based on the following principles:

1. The establishment of electric power plants in the rural areas of the country.
2. The use of electric power for the operation of farm buildings.
3. The use of electric power for the operation of farm machinery.
4. The use of electric power for the operation of farm equipment.

Going Abroad In Michigan

If you had unlimited choice in picking a site for your  vacation, if you were allowed to choose among the world’s finest playgrounds, you would not find anywhere a greater variety, or site more favored by Nature, than those that Michigan  offers.

Within the borders of your native state are fishing streams that rival the angler’s paradise; uncordubled highways for motor touring; the finest of golf courses; camping sites to suit any preference; five thousand lakes which range in size from a swimming pool to a sparkling inland sea.

Michigan, in short, offers nearly all those beauties and advantages for which, you choose, many people will travel to foreign lands.

To enjoy what Michigan offers, you can, if you wish, travel on luxurious liners. But for these liners you need not bother with passports or visas. You can ride comfortably, speedily, and safely, to your Michigan destination on up-the-stairs trains. Well-dressed, efficient service and our modern facilities will make your trip a delightful one.

Lays Rotten Eggs

do you ever come across anyone who lays rotten eggs. If you do, you lay one yourself.

Talking Drums

Travelers in Africa have been known to speak of the traditional communication between Negroes and the British. The years of colonial service, the Great War, and the peace that followed have brought about the formation of a new language and social changes. Among the British, the traditional communication between Negroes and the British is now largely replaced by a system of letter writing. This change has been brought about by the development of a new language that is spoken by the British and the Negroes. The new language has been called “the language of the drums” because it is spoken in the traditional manner. It is a language that is spoken by the Negroes and the British in a traditional way that is known as the “talking drums.”

MICHIGAN BELL TELEPHONE CO.
OUR CO-OP SPREADER IS NEW
Large Capacity, Low Down, Pulls Easily

TwO-HORSE SPREADER
Here is a real two-horse spreader—light is draft. You can move it with one hand with the beater in action. The light, strong steel construction and the wide, continuous tread of wheels which make it lighter draft. The frame is in steel angle construction, with all-alignment bearings and Aluminite-Zerk lubrication. 4½" front wheel tires, 6½" rear. Two edges rolled.

LIGHT DRAFT. Spreader weighs 1,200 lbs.—350 to 500 lbs. lighter than others. You can pull this lighter spreader easily. You need only 20% more horses to pull this spreader than draft truck. For this reason we recommend this spreader to farmers that keep 15% more horses for plowing, feeding and other work than at present.

STRENGTH BEATS TEETH COLD. Riveted beds—You can safely operate this spreader without breaking or losing the teeth. If for some reason the teeth should break, it would be a most unusual occurrence. The Co-op Spreader has the teeth riveted.

MAIN CHAIN DRIVE is extra heavy and driven both ways. Chain guard keeps the chain from coming in the way of a person using the spreader or passing over the spreader.
