To about 14 millions, acceptance of the primary school fund, amounts collected to equalize the local property tax for the benefits of the Farm Bureau and the other school revenues.

WALDO E. PHILLIPS

Missouri State Farm Bureau President

It is the mandate of the State Farm Bureau to make known the opinions and problems of the farmers throughout the State, to work for the betterment of their conditions, and to encourage and assist them in their efforts to improve the conditions of the rural districts.

The GRAIN MARKET

The Grain Market is in a bad way. There is a shortage of grain which is causing prices to rise. The farmers are being forced to sell their grain at a loss, and the prices are not likely to improve until the supply of grain is increased.

Gray GRAMMARIZES AGR' 1 ADJUSTMENT FIGHT IN CONGRESS

Processors Can't Refuse to Help II Amendments

WASHINGTON.—Gray, light, and interested in the financial question of the farmer, President of the Michigan Farm Bureau, said in the House of Representatives, Washington D.C., that the farmer's problem is a financial one, and that the processors should cooperate in finding a solution.

Bill Stalled; Motion to Proceed

Motion to proceed to the consideration of the Phillips farm bill was defeated in the Senate. The bill was introduced by Senator Flynn, and is entitled to the support of the farmers.

The bill would provide for a tax on the processors, with the proceeds going to the farmer. The processors would be required to pay the tax, and the farmer would be entitled to receive the proceeds.

The bill was defeated, and the motion to proceed was defeated. The farmers are urged to continue their efforts to have the bill passed.

Watson W. Billings

The dairies at Bronson and nearby areas are in need of good men to replace those who have left for other positions. The Farm Bureau movement is in its young stages, and the demand is for interested, enterprising men of the kind mentioned. The position is well paid, and the work is varied and interesting. The man must be willing to travel, and to be away from home much of the time. Large orders can be obtained, and the man can make a good salary. The Farm Bureau is planning to have a large canvass this fall, and the man can help in this work.

The man must be a good organizer, and have a knowledge of dairy farming. He must be able to speak the language of the dairyman, and be able to understand his problems. The Farm Bureau movement is growing rapidly, and the man must be able to keep up with the times.

The man must be a good public speaker, and have a good voice. He must be able to speak in public, and to hold an audience. The Farm Bureau movement is gaining ground, and the man must be able to help in this work.

The man must be a good writer, and have a good pen. He must be able to write letters, and to keep the books. The Farm Bureau movement is growing rapidly, and the man must be able to keep up with the times.

**FARMERS' ABILITY TO BUY MEASURES INDUSTRIAL PROFIT**

Industry Told to Forget Foreign Markets and Consider Farmer

When America's industrialists have watched with shame and concern their nation's overseas trade rival, they presumably should have heeded a warning given many years ago by Dr. Spencer Tracy—America's only True Chemist and Authority on Corn.

Dr. Tracy's message is that prosperity in the United States must be measured by the prosperity of its farmers. This is the interdependence of farms and factories—industry and science—which will be among the first delegates to arrive at a conference of agricultural gentlemen and industrialists at Washington in May.

Dr. Tracy's message is that prosperity in the United States will have declared economic independence.

The farmer does not go to the government as America needs him. He goes to the government as a producer, a manufacturer, and as a consumer. Whether he is a wholesale producer, a retail producer, a wholesale consumer, or a retail consumer, he is important to the gross farm income, the production of corn, and the price of corn.

The farmer is a producer of corn, and the corn is a raw material for the industrialist. In the production of corn, the farmer is the most important factor. The farmer's ability to produce corn is the measure of his ability to interdict his economic independence.

Industry is told to forget foreign markets and consider the farmer.

The figures follow: (000,000 omitted)

<table>
<thead>
<tr>
<th>Wage</th>
<th>$11,099</th>
<th>$10,902</th>
<th>$11,621</th>
<th>$10,849</th>
</tr>
</thead>
<tbody>
<tr>
<td>1929</td>
<td>8,414</td>
<td>7,411</td>
<td>11,337</td>
<td>10,849</td>
</tr>
<tr>
<td>1927</td>
<td>6,911</td>
<td>7,411</td>
<td>11,337</td>
<td>10,849</td>
</tr>
<tr>
<td>1921</td>
<td>7,411</td>
<td>11,337</td>
<td>11,337</td>
<td>10,849</td>
</tr>
</tbody>
</table>

The figures represent gross farm income, the production of corn, and the price of corn.

Finally the lawyer said: "He claims that prosperity in the United States is being affected by the price of corn. When American industry has to sell its products at less than the raw material cost, the whole economy will be affected."
CONCRETE fix up your farm - once and for all

FARM LOANS WILL COST LESS

Federal Land Banks Reduce Rates 1 to 3/4 Per Cent

Effective April 16, the Federal land banks reduced their rates of 1 to 3/4 per cent on loans made directly to agricultural producers. It makes a big difference.
Wooll Producers slow to sell at Dealers' Prices

Wool Marketing Ass'n thinks Stage Set for提高了To Benefit

By FRANKLIN R. POWELL

Wool dealers are slow to sell, according to the general conclusion drawn by the Wool Marketing Association, which has just issued the following statement:

The wool market did not show any significant movement above current levels during the week. In fact, it appears that there was some realization of the fact that wool is a commodity that is not readily available in great quantities, and that the demand for it is relatively slow.

The wool market is characterized by a high degree of uncertainty, and the dealers are reluctant to offer much wool for sale at prices that are below the current levels. They are waiting for a movement in the market that will indicate a trend in the right direction, and they are not willing to sell wool at prices that are lower than the current levels.

The Wool Marketing Association is hoping that the wool market will improve during the next few weeks, and that the dealers will be willing to sell wool at prices that are above the current levels. They are hoping that the wool market will show a movement in the right direction, and that the dealers will be willing to offer wool for sale at prices that are above the current levels.

The Wool Marketing Association is advising wool dealers to be patient, and to wait for a movement in the market that will indicate a trend in the right direction. They are hoping that the wool market will improve during the next few weeks, and that the dealers will be willing to sell wool at prices that are above the current levels.

Extra Yields Alone Pay Seed Cost

Certified Seeds Are Good Buys

R. W. Bennett, Manager of Farm Bureau's Seed Service Says

WITH PAM PIEGE COMING BACK as they are, I believe that this is a wonderfully good spring to put in certified corn, beans, and other field seeds. The extra yield per acre from certified seed is usually more than enough to pay the entire cost of the seed, which is not expensive.

ANOTHER EXTRA RETURN from certified seed is in the uniform high quality of the entire crop. In the likely case of grade A or B or C, you get a lot of first class corn. You can pay again by being able to sell all of that 100 percent certified seed, or sell your C grade or B grade or A grade corn and have higher prices for each grade of corn. The second grade, usually 90 percent certified and 10 percent other corn, makes your corn of such high quality that buyers will pay a little more for your corn, or will sell at a higher price. If your corn is a little less than 90 percent certified, some buyers will not buy it.

WHEN YOU HAVE FITTED LAND why take a chance on seed that may not be adapted to Michigan? Only Farm Bureau guarantees to the farmer to the full purchase price of the seed the vitality, description, origin and purity as described on the analysis bag. Farm Bureau alfalfa and clover seeds come to you in sealed Farm Bureau Brand bags. Certified grains are shipped in Michigan Farm Bureau bags. Certified grains are shipped in the public's memory is responsible for your success and your profit, and if you want to continue to be successful and profitable, you must do more than pay for the certified seed you buy. You must get all you can out of that certified seed.

If a majority of the producers deliver the Farm Bureau guaranteed seed, the profit is yours.

If the agreement becomes effective, the board by A. J. Rogers, Beulah, or Rapid City, and II. K. Royal, Shelby, Michigan, will consist of representatives of the Sec'y ('. L. Brody was asked to constitute a committee made up of representatives of the west central, southwest, and Grand Traverse, and southwest Michigan districts and the Mason, Oceana, and Manistee counties. The producers' representative will be Howard C. Morgan, Traverse City, and H. S. Newton, Manistee, with Alfred C. Bener, Traverse City, and J. E. Dewey, Hart, with Howard C. Morgan, Traverse City, and Al Bemer, Traverse City, for carrots, and Al Bemer, Grand Traverse, for asparagus.

In making decisions affecting marketing districts, the chairman will be the certified grains commission representing the second district, Grand Traverse, Manistee, Mason, Oceana, and Benzie counties. The second and third districts are Howard C. Morgan, Traverse City, and A. C. Bemer, Hart; A. C. Bemer, Hart, with Howard C. Morgan, Traverse City, and R. W. Bennett, Farm Bureau district representative of the northwestern district, and Parrett Surtex, Red Cliffs, as alternates.

The men who will compose the committee will also be appointed to the Michigan State Farm Bureau board by the same method. There will be a majority of the public's memory is responsible for your success and your profit, and if you want to continue to be successful and profitable, you must do more than pay for the certified seed you buy. You must get all you can out of that certified seed. The certified grains commission representing the second district, Grand Traverse, Manistee, Mason, Oceana, and Benzie counties.
