BEHIND THE WHEEL

March 1, 1935

ORGANIZATIONAL DIRECTOR

The Michigan Farm Bureau has a new "Wheatlin" in the city of Lansing. Mrs. Ida May Davis, former president of the Michigan County Farm Bureau at Clinton County, has been elected as the new director of the farm bureau in the city. Mrs. Davis is the first woman to hold the post of "Wheatlin" in the history of the organization. She has been active in the work of the farm bureau for many years and was a member of the board of directors of the Michigan Farm Bureau for several years. She is the third Michigan Farm Bureau representative who has served as Wheatlin, and she will be in charge of the farm bureau for the next year.

KANSAS CITY SHOW

An all-day meeting of the State Farm Bureau was held in Kansas City on Saturday, November 2, 1935. The meeting was attended by members from all parts of the state, including representatives from the various county Farm Bureaus. The meeting was held at the Hotel Board of Trade in the city, and was attended by a large number of members from all parts of the state. The agenda included discussions on various topics, including the future of agriculture and the need for cooperation among farmers. The meeting was well attended and was considered a success.
Electrification—Within the Next Few Years

The trend toward electrification has been rapid in recent years. Within the last few years the transformation of Michigan farm homes has been due to electrification. Today, thousands of farmers have received electric service from the rural electric companies, and many are dependent. One can hardly see the way home from town now without passing a number of farm homes and operations, and it is even cheaper and better than other forms of energy.

The trend to electrification will be even more rapid in the future. In 1936, thousands of Michigan farmers will be electrified, and thousands more will have an opportunity to receive electric service. The rural electric companies have plans for electrifying many more farmers in the near future.

The trend toward electrification is due to the fact that electric service is cheaper and better than other forms of energy. Electric service is more convenient and more dependable than other forms of energy.

First Stamps in France

First stamps were used in Paris in 1849. The first stamp was a ten-centime stamp of King Louis Philippe, and was sold for 11 francs. The stamp was rectangular in shape, and featured a portrait of the king. The stamp was used to pay for the franking of letters, and was similar to the modern postage stamp. The stamp was printed in black ink on white paper, and had a value of 10 centimes. The stamp was initially used to frank letters, and was later used to frank small packages and other items. The stamp was replaced by a new design in 1851, and the new design featured a portrait of the king in profile. The new design was used until 1876, and was replaced by a new design in that year. The new design featured a portrait of the king in full face, and was used until 1884. The stamp was replaced by a new design in 1884, and the new design featured a portrait of the king in profile. The new design was used until 1894, and was replaced by a new design in that year. The new design featured a portrait of the king in full face, and was used until 1898. The stamp was replaced by a new design in 1898, and the new design featured a portrait of the king in profile. The new design was used until 1901, and was replaced by a new design in that year. The new design featured a portrait of the king in full face, and was used until 1909. The stamp was replaced by a new design in 1909, and the new design featured a portrait of the king in profile. The new design was used until 1918, and was replaced by a new design in that year. The new design featured a portrait of the king in full face, and was used until 1934. The stamp was replaced by a new design in 1934, and the new design featured a portrait of the king in profile. The new design was used until 1950, and was replaced by a new design in that year. The new design featured a portrait of the king in full face, and was used until 1970. The stamp was replaced by a new design in 1970, and the new design featured a portrait of the king in profile. The new design was used until 1994, and was replaced by a new design in that year. The new design featured a portrait of the king in full face, and was used until 2000.
Mrs. Sewell Compares Views of Farm and City Women

How Little or How Much Do They Know About Farm Work

By Mrs. Grace A. H. Hillyer

Yesterday I received a letter from a friend who is now a rural girl. She writes:

"Dear Miss Hillyer,

I was interested in your article about farm work in The Chicago Tribune. As a rural girl I can contrast my experiences with those of city girls. In the city, the girl has to work harder to make ends meet. In the country, the girl has a chance to make more money. In the city, the girl has to worry about finding a job. In the country, the girl has a chance to find a husband. In the city, the girl has to worry about finding a place to live. In the country, the girl has a chance to live in a beautiful countryside. In the city, the girl has to worry about finding a school. In the country, the girl has a chance to enjoy the simple life. In the city, the girl has to worry about finding a church. In the country, the girl has a chance to live in a peaceful community."

I hope you will publish my letter in your newspaper. It gives a true picture of rural life.

Sincerely yours,

[Signature]

Livestock Feuders!

Big crops of deep rough feed, an abundance of grasses, unreachable small grains, and the prospect of a better crop next season all demand all channel of feeds for cattle and hogs.

I DOBUT that this hogs will be fed the way you want them to be fed.

It is a well-known fact that hogs, when fed on deep rough feed, will produce more pork per head, and also that they will do so at a lower cost per head than when fed on short, shallow rations.

Michigan Live Stock Exchange

Every letter CHRISTMAS SEASLED!

The editor of the "Los Angeles Times" has been kind enough to publish this appeal for funds to the National Live Stock and Meat Association.

"The demand for live stock products is great, but the supply is small. The farmers are in need of money to purchase feed and other supplies. The workers in the live stock industry are in need of assistance. The Live Stock Exchange and the Farmers' Credit Union are working to help these farmers.

Let us all do our part to help these farmers. Let us give generously of our time, our money, and our effort.

Sincerely yours,

[Signature]

A STEER GOES TO MARKET

Over a period of years, Swift & Company's representative sold to theCattle man his cattle at a higher price. Thus, in the interests of producers and consumers, he desires to have a higher price. Finally, a "price" is a term that is used to express the value of a product. In this case, the "price" is the money that the cattle man receives for his cattle. Thus, Swift & Company's representative desires to have the cattle man receive a higher price for his cattle.

WE'RE BUYING SEED FOR 1936

Unless inspected, Insurance Void on Fire from Wiring

After July 1, 1936

Two State laws now in effect require that every mutual electrical service in Michigan, new or old, must be approved before December 1, 1936. The insurance companies must have unified standards for all wiring, the Board has ruled that this clause (No. 16) in the by-laws of the various mutual companies, which when completed must pass the inspection of the State electrical inspector, an agreement has been signed by the State Electrical Board. The law also requires that every electrical service in Michigan, new or old, must be approved before December 1, 1936. The insurance companies must have unified standards for all wiring, the Board has ruled that this clause (No. 16) in the by-laws of the various mutual companies, which when completed must pass the inspection of the State electrical inspector, will be enforced until July 1, 1936.

New Electrical Installations

For the coming year the State has provided for local authorities to approve all electrical installations, which when completed must pass the inspection of the local boards to pass the State Electrical Board. The law also requires that every electrical service in Michigan, new or old, must be approved before December 1, 1936. The insurance companies must have unified standards for all wiring, the Board has ruled that this clause (No. 16) in the by-laws of the various mutual companies, which when completed must pass the inspection of the State electrical inspector, will be enforced until July 1, 1936.

Use Our Seed Cleaning Service

We clean seed! Deliver your seed, or you may ship it by freight to Farm Bureau Supply, Lansing, Mich., or to our Farm Bureau Supply store at 220 Bristol St., Saginaw. Ship seed prepaid freight if possible. Tag each bag with name and address of shipper. Write us a letter stating total number of bags and give full instructions on cleaning your seed. Advise if you want seed cleaned and returned to you, or do you want a price quoted on the cleaned seed?

Seed Cleaning Charges at Lansing plant: Based on weight of seed as received at our cleaning plant. 20c per bu. for one run over mill; 35c for 2 runs. We advise 2 if seed is very dirty. $1.00 per bu. for seed charged over $6.00. Includes above mill runs. $1.25 per hr. for hauling sweet clover, mill runs additional as above. We don't do custom cleaning after January 1. Send seed now!

Farm Bureau's Seed Guarantee

Farm Bureau has guaranteed Michigan farmers northern origin, winter hardy alfalfas and clovers since 1920. They don't winter-kill. We select strong, A-1 quality seed of the best varieties. Farm Bureau seed for 1936 is now passing our requirements for quality, germination and purity. Farm Bureau seeds are packed in sealed bushel and half bushel bags and are guaranteed to be as represented on the analysis tag.

We Will Record Your 1930 Seeds

Every sealed bag of Farm Bureau alfalfa or clover seed contains an envelope with the request that the farmer save a sample of the seed, and note the lot number and other information from the seed tag. We provide a postcard and ask the farmer to register his crop of Farm Bureau alfalfa or clover at our office in our Record of Performance book. You'd be surprised at the number of references to that book that farmers who decide to take a seed crop and want to prove the variety and quality of their seed. You'd enjoy reading the yield reports recorded in the book.

FARM BUREAU SEED GUARANTEE

The Farm Bureau Service, Inc., of Lansing, guarantees to the farmer to the full purchase price of $2 seed the visibility, description, origin and purity to be as described on the analysis tag on sealed Farm Bureau bag.

For Farm Bureau ALFALFA SEED—see your local distributor of Farm Bureau Seeds.
