90 Cents Bushel Is The Passing Point On Next Crop

No Matter What Happens, We Will Control Production

Conditions Show It's Control or Chaos For U. S. Farmers, Davis Says

By Chester Davis

**Adjustment Programs Have Paid Out**, settlement of the Farm Bureau farm families, has been published in the form of a book by the National Farmers Union and Cooperative Union of America. This book, entitled "The Advocate of Small Farmers," contains a history of the AAA and its activities, including its methods of payment to farmers. The book also includes a discussion of the various adjustment programs that have been implemented and their effectiveness in helping farmers. It is a valuable resource for anyone interested in the history of the farm movement and the role of the AAA in helping farmers during the Great Depression.

Farmers Union and the AAA

In this article, the Michigan Farmer's Union voices their concern over the effects of the AAA on the agricultural community. They express their desire to free the country from the burden of the AAA and its programs, which they see as unconstitutional and counterproductive to the interests of farmers.

Genuine Fire Insurance Protection

In today's world, where fires are a common occurrence, having the right insurance protection is crucial. A steer made up only of porthouse steaks and rib roasts would be as much of an oddity as a ten-legged horse or a tree that produced nuts, but not apples. It is because there is little of a steer can be cut into rib roasts and porthouse steaks (an average of 20%), and they are lined in such a manner, that they cost considerably more than the less demanded cuts. Only about 53 percent of the average live steer sent to market is meat. Only about 20 percent of the dressed carcass consists of the rib and loin—the parts most in demand. Less than half of this loin is made up of porthouse and club steaks—the choicest parts of all. The choice cuts of beef are in ways to greater demand, while some others move slowly. In order to get rid of all cuts of beef equally well, retailers necessarily maintain a wide range of prices on the various cuts and sell them at prices which will dispose of them promptly. Thus, porthouse steaks may be selling for several times the price per pound of the less demanded portions, which must be priced at a great deal less. Fresh beef is highly perishable, and must be disposed of at once. Consumer buying habits do not permit any other course and, therefore, fresh beef can not be held for "a price." Swift & Company's average net profit is only a fraction of a cent per pound from all sources. Such has been true for a long period of years. This profit is so small as to have no appreciable effect upon meat or livestock prices.

FARM BUREAU FERTILIZERS

Will Pay Profits on Fall Grain and Following Crop Yields

The Harvest Tells the Story

20 to 50 Pounds of fertilizer per acre for wheat not only increases the yield and quality of the wheat to pay the cost of the fertilizer and a nice profit, but the extra yields of alfalfa or clover or other following crop will pay another substantial profit on the fertilizer investment.

FERTILIZER FOR WHEAT TO BE SEEDED in alfalfa or clover should be high in phosphate, fairly high in potash, and have enough nitrogen to help the wheat to a strong start. It is probable to keep up on the State College's Fertilizer Recommendations for wheat and rye for Michigan's various soils and crop conditions. Your county agricultural agent and your Farm Bureau fertilizer dealer have this information.

You'll Like Farm Bureau Fertilizers

Farm Bureau Fertilizers are built of the best materials recommended for producing top yields of high quality crops on Michigan soils. These materials are mixed and thoroughly cured in one of the largest and best equipped fertilizer plants in the country. The Michigan, Ohio and Indiana Farm Bureaus take the entire output of the plant.

Nitrogen in Farm Bureau Fertilizers is guaranteed to be not less than 90% soluble in water. That means it practically all available to the seedlings when you need it most for a vigorous start. Fertilizer nitrogen that's 70% water soluble satisfies State law. Our phosphorus and potash sources are the best. Farm Bureau fertilizers are extra dry, granular and easy to regulate in the drill. They drill perfectly and with even distribution. Ask your Co-op for a Farm Bureau Fertilizer.

Ask Co-ops for Information About the CO-OP SPREADER

The farmlands of America are constantly being expanded. The machinery used in this expansion is continuously being improved. Farmers are demanding bigger, better and still more efficient machinery. The Farm Bureau's Co-op Spreader is the result of this demand.

A First Class Job—That's What You Get. A spreader is only as good as the material it spreads. We believe the Farm Bureau's Co-op Spreader is the best material you can buy.
