How To Get Your Seed

Your natural soil is just about "made to order" for a profitable planting of Sugar Beets.

The essential consideration, from every standpoint, in the profitable growing of Sugar Beets, is to stick to a regular rotation in every single year. If you do that you will make more money in the long run.

Here's why: Sugar Beets fit your rotation program admirably.

To grow your beets for profit, you get your own cultivar that suits your soil, climate, and cropping system. If you do not have a specific cultivar that suits your soil, climate, and cropping system, then you will not be able to grow your beets profitably.

How can you make more money in the long run by growing Sugar Beets?

Sugar Beets are a versatile crop that can be grown in a wide range of climates and soils. They can be grown in a variety of cropping systems and can be used for a variety of purposes, including livestock feed, soil improvement, and carbon sequestration.

The advantages of growing Sugar Beets are:

1. They are a good source of nitrogen for the soil.
2. They are a good source of carbon for the soil.
3. They are a good source of sugar for livestock.
4. They are a good source of energy for the soil.
5. They are a good source of water for the soil.
6. They are a good source of oxygen for the soil.

How much money can you make by growing Sugar Beets?

The cost of growing Sugar Beets includes:

1. The cost of the seed
2. The cost of the labor
3. The cost of the fertilizer
4. The cost of the irrigation
5. The cost of the equipment

The cost of growing Sugar Beets will vary depending on the amount of land you have, the amount of labor you use, the amount of fertilizer you use, the amount of irrigation you use, and the amount of equipment you use.

How much money can you make by growing Sugar Beets?

The cost of growing Sugar Beets includes:

1. The cost of the seed

How much money can you make by growing Sugar Beets?
The disease has caused more than its share of suffering and hardship. Among the conditions that have been attributed to its presence are white muscle disease, encephalomalacia, and chronic ataxia. These conditions are known to be caused by the invasion of the nervous system by the organism that causes foot-and-mouth disease. However, it is important to note that theڵs of these conditions are not always present when the disease is detected. The presence of these conditions is often used to confirm the diagnosis of foot-and-mouth disease in cattle and other domestic animals.

In recent years, there has been a growing concern about the potential for the disease to spread to other countries. This concern is based on the fact that foot-and-mouth disease can be transmitted by infected animals or contaminated materials. For this reason, it is important to continue to monitor and control the disease in order to prevent its spread.

In conclusion, foot-and-mouth disease is a serious disease that can cause significant economic losses and health problems for cattle and other domestic animals. It is important to continue to monitor and control the disease to prevent its spread and to minimize its impact on livestock producers.

does not exist. There is no known cure for foot-and-mouth disease, and the disease can be transmitted by infected animals or contaminated materials. For this reason, it is important to continue to monitor and control the disease in order to prevent its spread.

In conclusion, foot-and-mouth disease is a serious disease that can cause significant economic losses and health problems for cattle and other domestic animals. It is important to continue to monitor and control the disease to prevent its spread and to minimize its impact on livestock producers.

Simple Treatment Protects Children from Diphtheria

Preventive measures are simple and easy to implement, but they can be effective in preventing the spread of diphtheria. The most effective preventive measure is vaccination, which is recommended for all children. Other preventive measures include good hygiene practices, such as washing hands regularly, and avoiding close contact with people who have the disease.

In addition to vaccination, there are other preventive measures that can be taken to reduce the risk of diphtheria. These include avoiding close contact with people who have the disease, avoiding crowded areas, and practicing good hygiene practices.

Despite the effectiveness of preventive measures, diphtheria can still be a serious disease. In some cases, it can lead to complications such as heart problems, kidney damage, and respiratory failure. Therefore, it is important to seek medical attention if symptoms of diphtheria are present.

In conclusion, diphtheria is a serious disease that can cause significant health problems. However, it is preventable through vaccination and other preventive measures. It is important to continue to implement these measures to prevent the spread of diphtheria and to minimize its impact on individuals and communities.

does not exist. There is no known cure for diphtheria, and the disease can be transmitted by infected animals or contaminated materials. For this reason, it is important to continue to monitor and control the disease in order to prevent its spread.

FARM BUREAU ADDS 1,500 MEMBERS TO ROLL IN OCTOBER; TWO THOUSAND MORE ARE EXPECTED IN NOVEMBER

Work This Year Places Organization Strength At Greatest in 7 Years; Michigan Ranks Third

Fifteen hundred farm families became members of the Michigan State Farm Bureau during the month of October. The organization is making preparations to take in 2,000 more members during November.

Michigan jumped from third to fourth, to second place among State Farm Bureaus of the middle west last month for increase in Farm Bureau membership. This State now ranks third scoring 37 in the American Farm Bureau Federation for membership increase made during the year.

Michigan State Farm Bureau reports having paid in advance memberships by the hundreds. The campaign started last week and has been gaining momentum throughout the summer and fall. The paid membership of the Michigan Farm Bureau is the greatest that it has been in services.

Officers, directors and members of the Calhoun County Farm Bureau in a two day effort in October added 150 members to their roll; Grand Traverse county took in 67 members in one day; Mason county added 124 families.

During the summer and fall months the County Farm Bureau has been putting on membership campaigns of one to several days duration. The October report of new members from other counties included: Branch, 42; Lapeer, 99; Leelanau, 55; Barry, 37; Eaton, 29; Jackson, 33; Kalamazoo, 49; Kent, 37; Lake, 35; Monroe, 32; Oakland, 107; Sanilac, 28; St. Joseph, 16; Saginaw, 33; Shiawassee, 19; Washtenaw, 68; Wayne 30; and Wexford 30.

Previously Clinton county added nearly 200 in October; while Washtenaw county added 150.

All of the County Farm Bureau have been very active in the membership work and have been able to report for the month of October 340 new members. Other reports indicate that between 100 and 350 new members will be reported for the month of November.

During the past year and a half the State Farm Bureau membership has grown from approximately 2,000 to 7,000 members. The State Farm Bureau has planned to have a membership of 10,000 at the end of this year.

The organization is making preparations to take in 2,000 more members during November in order to meet the goals set by the State Farm Bureau.

Remember When the Whisker Industry Was Important?

Time Was When Must Men Wore Beards and Wore of Their Industry

There have been, and the whisker industry is still important in our society. Men of today want a clean look with neat, well-groomed hair. The old-time barber shaved that part of the face, and kept the hair trimmed to a neat style.

The old-time barber could make a man look good, and he had the knowledge to do so. The old-time barber was a craftsman, and he worked hard to make his business successful.

Grange Master

C. W. Bramble

State Master C. H. Brannan and all State Granges have been very active in the membership work in October. The State Grange is growing in strength and is now a force to be reckoned with in the agricultural and rural community.

The Grange is a valuable organization that has worked hard to improve the rural community. It has been active in many projects, including the building of schools and churches.

The state Grange has been active in many projects, including the building of schools and churches. It has been active in many projects, including the building of schools and churches.

American Farm Bureau Meet a Colorful Event

Several thousand delegates and members gathered in California to hear William J. Clayton, former head of the Agricultural Adjustment Administration, urge them to continue their efforts in the direction of the world's greatest crop, the corn plant, and to call and promote the welfare of agriculture throughout the state.

FARM BUREAU IN 1936... AN ELECTRICITY TOUR

In late 1933 Michigan power companies and the public utilities commission adopted the Michigan Electric Farm Bureau plan and assistance was provided for the installation of sub-stations and lines at their expense. In 1934, the Michigan Bureau of Agriculture and Forestry established an electric utility committee to advise the Bureau on the subject of World Peace. The Bureau, with the assistance of the American Electric Power Company, is planning to extend the service to all parts of the country, providing a means of communication between farmers and the public.

LIGHTS IN YARDS HIT FARM THIEVES

Market Report Daily

Michigan Future Farmers Delegates off for Kansas City

The Agricultural Adjustment Administration has announced that more than 50 Michigan high school boys will be delegates at the First National Young Farmers Organization Conference to be held at Kansas City October 23 to 27. These boys have been selected by the leaders of the junior agricultural clubs throughout the state.

Dairy Products Prices

An invitation was extended to the future farmers to attend the conference by the American Farmers Association, from whose offices also come the plans for the program and for the trips to be made on the last day of the meeting.

CORN BORER GOES SOUTH; DROUGHT NIPS HIM IN WEST

Washington—The Russian corn borer has invaded the Northern States, according to Dr. W. G. Hiscock, the official entomologist of the U.S. Department of Agriculture, and is reported to be doing great damage in the grain belt of the Pacific Northwest.

Population Peak in 1950

The nation's population will reach its peak in 1950, and then begin a slow decline, according to an expert on social and economic trends, speaking before the American Home Economics Association in Chicago.

Farm Bureau in 1936: Exhibits at Many Fairs

At the Wisconsin State Fair, the Farm Bureau was well represented with exhibits at the FFA Building and in the Agricultural Building. The Bureau's exhibit was cubes, each of which contained samples of farm produce, and which were arranged in such a way that each visitor could easily see what was being produced in the different parts of the state.

Christmas liquor ads must go, say some authorities

State Board Object to the Linking Liquor With Sacred Day

Refusing to be left behind the trend toward liquor advertising, about 200 persons, including Miss Ethel Hubler, editor of the Agricultural Adjustment Administration, yesterday asked the president of the National Temperance Council, "Is it not true that Christmas liquor advertising is being used to promote sales?"

"A sacred holiday," said Miss Hubler, "which pictures Santa Claus dealing or the sale of liquor with Christmas as the campaign to eliminate Santa Claus liquor advertising, alcohol control..."

The U.S. Supreme Court has ruled that the sale of liquor with Christmas advertising methods, "is not a violation of the constitutional guarantee of freedom of religion..."

Liquor industry leaders have refused to comment on the Supreme Court's decision, saying that the case was appealable to the U.S. Supreme Court.
SEED FIRM BEFORE COURT NINTH TIME FOR MISBRANDING
Sun-Field Seed Service Cuts In Trouble Over Its Oat Deals

For the ninth time in the U. S. court has found seed firm cited by "Sun-Field Seed Service" of Chicago com-
mited to violations of the Federal Seed Act. The third suit was brought when the U. S. District Court of
Little Rock, Ark., ordered 20 bonds of $10,000 each to Little
Rock, Pointe de la Hache, and the court's decree stated
that the "Sun-Field Seed Service" was committing fraud
and misrepresentation in its advertising of the "Sun-Field Seed
Service." The court's decree also stated that the "Sun-Field Seed
Service" was committed to violations of the Federal Seed Act.

Junior Farm Bureau Is for Young Folk and They Run It

In their Twenty Thousands Learning to Work Together

By BENJAMIN F. HENNINK

The Junior Farm Bureau in Michi-
gan expanded during this past
year by the Michigan State Farm
Bureau. In order to give every
young person a part in the Farm-
bureau program, it is possible for
those desiring to do so to obtain a
invitation to join the junior branch
of the Farm Bureau, and to assist in
its development.

The Junior Farm Bureau is a branch of the Farm
Bureau which is composed of young people who are not
over 21 years old. It is the junior branch of the Farm
Bureau which is especially interested in the development
of the organization.

The Junior Farm Bureau is for young people who are
interested in the work of the Farm Bureau, and who wish
to help in the development of the organization.

The Junior Farm Bureau is for young people who are

MILK PRODUCERS

Organization Markets For 18,237 Farmers in Nine
Cities of State

The Michigan Milk Producers' Ass'n, at its 95th annual meeting, elected the following officers:
President, N. P. Hull, Tecumseh; vice-president, C. A. Willett, Flint; secretary, C. M. Packard, St.
Joseph; treasurer, Fred A. Mack, South Haven; state manager, C. F. Willson, Detroit; farm service
director, W. S. Meader, Detroit; research director, C. C. Hall, Grand Rapids; legislative chairman,
R. M. Wright, Blissfield; farm programs chairman, E. C. Paige, Battle Creek; and publicity director,
R. W. Newton, Clio. The membership increased 305, and the membership in the associated co-opera-
tives included 18,237 farmers. The association is one of the largest milk producing organizations in the
United States, and is an important factor in the development of the dairy industry in this state.

SHELTERBELT TREES Are Successful

Press Release of Michigan State Farm Bureau, Lansing, November 5, 1938

Annually there are over 200,000 acres of shelterbelt planted on the farms of the state. In the past
two years over 700,000 acres of shelterbelt have been planted. This year over 500,000 acres of
shelterbelt are being planted. The shelterbelt program is one of the most successful programs ever
undertaken by the Michigan State Farm Bureau. The shelterbelt program is one of the most successful
programs ever undertaken by the Michigan State Farm Bureau.

WE ARE IN THE MARKET FOR SEEDS

THE FARM BUREAU PAYS WELL FOR GOOD QUALITY STOCK

We are in the market as usual at this time of the year for Michigan grown June, Mammoth, Alike, Sweet Cathers and Alfalfa seeds. Send us an 8 ounce sample of your seed. Make it representative by taking equal amounts from each bag to make up the general sample lot. Write us the amount of seed you have, and we will quote you. We send sample mailing bags on request. We buy other field seeds.

The Farm Bureau specializes in the handling of Michigan grown, winter hardy alfalfas and clovers. You will find that we appreciate quality in seed. Let us make you a price on your seed.
