FARM POWER LINES NOW AVAILABLE TO WESTERN MICHIGAN

Most of the State is Served by Firms Agreeing to Build

Farms in this section of Michigan own several small electric generating plants, some of them apparently abandoned. Many others have been turned into small power plants. As far as can be learned, there are only a few of these small power plants still in operation, but they are expected to be abandoned in the near future. The main difficulty is that they do not have sufficient power to operate the large electric motors required for the farms.

Practically all local power plants have been equipped with the latest type of automatic generators, and several of these are now equipped with large automatic switches. The rural electric companies are doing all they can to make the power available to the farmers.

Recovery of the Farm Bureau program is being made to the taxpayers of the state. The Farm Bureau has agreed to pay $1,000,000 for the year 1935, of which $500,000 is to be paid in cash and the other $500,000 is to be paid in stock. The Farm Bureau has also agreed to pay $500,000 to the state government for the year 1936, of which $250,000 is to be paid in cash and the other $250,000 is to be paid in stock.

ANNUAL MEETING OF FARM BUREAU NOVEMBER 12-13

Will Cross Arizona and New Mexico to Texas in New Orleans

The Grand Canyon of the Colorado river, Arizona. The Missouri and eastern states party will meet on a day of sightseeing preceding to Houston, Texas.

TWO TAX AMENDMENTS ON BALLOT NOVEMBER 3 ARE NOT IN THE PUBLIC INTEREST AND SHOULD BE DEFENDED

Farmer Can Lose Much of New State Aid for Schools If No. 3 Is Adopted; Under No. 4 He Can Lose Financial and Personal Liberty

No one is anxious to pay taxes.

Still less does he care about having any tax reduction taken away from him, or about having others' tax burdens shifted to his back.

Upon the ballot November 3 you will find two proposed constitutional amendments that will bring about a situation that will ultimately result in the elimination of state aid for schools. No. 4 will eliminate all property and personal taxes for local government and school purposes and substitute for them a state income tax. No. 3 will eliminate all property, personal, and corporate taxes for local government and school purposes and substitute for them a state income tax.

The first has support from the food trade. If adopted it will enable the food stores and their patrons to pocket the amount of all Michigan corporations and individuals paid in federal income tax in 1935. The amendment will also provide for a sales tax of 1 cent on all consumption of goods, groceries and文章中的三个人名分别是：Henry Oosterhuis，Jan Brookhuis 和 Ben Brookhuis。
**The Stolen Nest**

For some months, the local farmer has been watching for signs of a hidden nest of the European goldfinch. This bird is a pest because of the quantity of its eggs. The farmer has been cultivating the region carefully in an attempt to destroy the nest and to eliminate the problem. The farmer recently discovered a nest in a abandoned building, and he immediately took action to prevent further damage.

**Behind the Wheel**

The story of the man who drove the automobile was told on the nightly news last week. It is a remarkable tale of an ordinary man who became a great driver. The man was born in a small town and his family was poor. He worked hard to make a living and to support his family. One day, he decided to enter the automobile race and to prove his skills. He trained hard and practiced for months. Eventually, he won the race and became a famous driver.

**Amendments No. 3 and 4 Should Be Defeated**

Dear Editor,

I am writing to express my support for the defense of the amendment. The amendment, which seeks to reduce the wealth of the state, is unnecessary and will only harm the economy. I urge everyone to vote against the amendment.

Sincerely,

[Signature]
Mr. and Mrs. Farmer...

One Man Alone, Did Not—

1. Save you 3% of the cost of all Farm Machinery, Livestock, Fertilizer, etc., by securing the Sales Tax Exemption for farmers. A saving to Michigan farmers of a million and one-half dollars annually.

2. Reduce the original 5% rate on Federal Farm Loans down to 3½% and 4%.

3. Originate a plan for Rural Electrification that will extend rural lines without cost to the customer, and make available electrical equipment at reasonable prices and easy terms.

4. Slash $12 a ton off the price of fertilizers, introduce open formula feeds, and seeds of known origin, purity, adaptability and germination... A saving to farmers of one million dollars annually.

5. Secure $65 State tuition for each rural high school student and State aid for rural schools... A saving in rural school taxes of over $2,000,000 annually.

6. Win the fight for removal of tax on farm property for township, county and state roads... A property tax saving of over $21,000,000 annually.

7. Secure the correction of farm property valuations to lower farm taxes to compare properly with those on city property.

8. Win the lower freight rate case of 1923-24 which saves farmers of Michigan a half million dollars annually...

The Farm Bureau Made These Things Possible

One Man Alone Will Not—

1. Be able to increase tariffs against foreign vegetable and other cheap substitutes that now compete with American farm products.

2. Be able to secure farm-to-market roads that will bring farmers living off the main highways "out of the mud." For this purpose we support the use of federal money allocated for the relief of the unemployed.

3. Be able to hold the present low interest rate on Federal Farm Loans or secure further reductions in keeping with the times.

4. Be able to secure "parity of farm income" and a more equitable price for farm produce.

5. Be able to assure the operation of the Soil Conservation program so as to make it most beneficial to farmers in this State.

6. Be able to continue the rural electrification program so that details can be "ironed out" which will make power available to every area in Michigan, under fair and co-operative conditions.

7. Be able to increase farmer patronage and co-operative business so as to continue to make quality merchandise available at economical prices.

8. Be able to work effectively for a happier and more prosperous farm life for you and your children.

This Is But Part of Your Farm Bureau's Program

Consider Some Facts—

The Michigan State Farm Bureau is expending much effort each year to promote farmers' interests through co-operation. It built the seed, feed, fertilizers and other work of the Farm Bureau Services, Inc. Our long-time program to refinance highways and schools has lowered your taxes. We have provided a rural youth program. We provide automobile, life and fire insurance for farmers. We promote an education program! We have a continuous farm legislation program under way.

What Can You Do in Return?

Back up your sympathy with this work with a membership! Don't let it be said of the Farm Bureau as is said of an aged mother who brought up nine children, but the nine children couldn't support one mother.

Your opportunity will come during October and November! A membership campaign is under way. Won't you join up? Come in with thousands of others! It's a time for solidarity and growth! JOIN NOW!

The Michigan State Farm Bureau

LANSING, MICHIGAN
Ohio Farm Bureau Acquires Eight Story Building

Toledo Quarterm, With Paul Oil Co., Bureau Began In One Room

Established in the Northwest in 1913, the Toledo Quarterm With Paul Oil Co. began operations in a one-room office. By 1920, the company had grown to a quarter-room office, and by 1925, they were providing service to four states. In 1930, the company expanded to a six-room office, and by 1935, they were providing service to ten states. In 1940, the company moved to a ten-room office, and by 1945, they were providing service to twelve states. In 1950, the company moved to a twenty-room office, and by 1955, they were providing service to fifteen states. In 1960, the company moved to a forty-room office, and by 1965, they were providing service to twenty states. In 1970, the company moved to a one-hundred-room office, and by 1975, they were providing service to thirty states. In 1980, the company moved to a one-hundred-and-fifty-room office, and by 1985, they were providing service to forty states. In 1990, the company moved to a two-hundred-room office, and by 1995, they were providing service to fifty states. In 2000, the company moved to a one-hundred-and-fifty-room office, and by 2005, they were providing service to sixty states. In 2010, the company moved to a two-hundred-room office, and by 2015, they were providing service to seventy states. In 2020, the company moved to a one-hundred-and-fifty-room office, and by 2025, they were providing service to eighty states.

Ohio Farm Bureau Buildings

Ohio Farm Bureau has acquired eight story buildings for its headquarters, located in Columbus, Ohio. The buildings are located on the corners of Main Street and Ohio Avenue, and they were previously occupied by the State of Ohio. The buildings were acquired in collaboration with the State of Ohio, and they will be used as headquarters for the Ohio Farm Bureau. The buildings will be renovated to provide office space, conference rooms, and other facilities for the Ohio Farm Bureau.

Michigan Live Stock Exchange

Michigan Live Stock Exchange is a stock exchange for live stock, located in Detroit, Michigan. The exchange was founded in 1872, and it is the oldest stock exchange in Michigan. The exchange is owned and operated by the Detroit Board of Trade, and it is the largest and most active live stock exchange in the country. The exchange is open to members of the Detroit Board of Trade, and it is the primary market for live stock in the country. The exchange is open from Monday through Friday, and it is closed on Saturdays and Sundays. The exchange is located at 1010 Woodward Avenue, in Detroit, Michigan. The exchange is open to members of the Detroit Board of Trade, and it is the largest and most active live stock exchange in the country. The exchange is open from Monday through Friday, and it is closed on Saturdays and Sundays. The exchange is located at 1010 Woodward Avenue, in Detroit, Michigan. Drought, worst nation has had in forty years.

Ford supplies cut for Ford land in national review.

Washington—The drought this fall in Michigan is the worst in many years, and the extent of its damage is so great that it may be the most serious economic event in the state's history. The drought has lasted for four months, and more than 80 percent of the state's farmland has been affected.

The drought has caused a sharp decline in crop yields, and many farmers are facing financial difficulties. The state's Department of Agriculture estimates that the drought has reduced crop yields by 30 percent, and that the cost of production has increased by 20 percent.

The drought has also affected the livestock industry. Many farmers are feeding their livestock on a diet of hay and straw, and the price of feed has increased sharply.

The state's Department of Agriculture is working with federal agencies to provide relief to affected farmers. The state has already received $10 million in federal aid, and additional funds are expected to be available in the future.

The drought is expected to continue into the winter, and the state's Department of Agriculture is advising farmers to prepare for the worst.

Drought worst nation has had in forty years.

Facts about stripping crops come out in complete check.

Animal Fly Sprays Help
But Uses Are Limited

Fly sprays are in their era now when they are useful into fields despite the some flies can get off of them. It seems that some flies are not as common as they used to be, and even when they are, they are not as harmful. Fly sprays are effective in controlling flies, but they should not be used excessively. Overuse can lead to the development of resistant fly populations, making control more difficult in the future. Fly sprays are designed to be used as a natural part of a fly management program, not as a sole solution. The key is to use them in combination with other methods such as fly苍蝇排斥, good hygiene practices, and environmental modifications.
