Michigan Farm Bureau Services and Warehouse at Saginaw

Saginaw County Farm Bureau's annual meeting, Tuesday evening, Feb. 16, is the house warming for the 4,500 sq. ft. warehouse at 860 W. Washington to stock supplies for numerous Saginaw County eastern and thumb counties.

For ten years the Saginaw Farm Bureau Executive at 203rd St. Bldg. has been the center of organization activities. The elevator and other lines of work will continue to be handled by the Saginaw Farm Bureau, Inc.

Upon Having Convictions

Probably it is more important to know just how to use a good idea than it is to have the idea in the first place. If you have the idea, the next question is how to make it work. The most important thing is to know what the value of the idea is. If you have a good idea, it will be worth something even if it doesn't work out. The value of an idea is not in its immediate usefulness but in its potential for growth.

Two Young Men Abroad

Charles Purriss and John Van Zile are two young men from Barry county who are spending the winter abroad. They have been writing their reflections on life in Europe and its contrasts with life in the United States.

Young Mr. Purriss has found a job in the village of Wilnold, England. He describes the people as friendly and welcoming. The climate is mild, and he enjoys spending his evenings exploring the city's museums and art galleries.

John Van Zile observes that the people in Berlin are quite different. They are more direct and honest. He has been struck by the city's beauty and the cultural richness.

Legislative Session

The Michigan legislature is currently in session, and there are several key issues being debated. One proposal is to centralize the government, which would give Wayne county more power. Another proposal is to elect senators by county, which would give Barry county more representation.

Rural Electrification

A new program for rural electrification has been proposed, which would provide cheap electricity to rural areas. This would be a great benefit to the farmers in the area, who currently rely on expensive and inefficient methods of generating electricity.

Sound Protection

The most useful way to make life easier is to ensure that it is quiet. A quiet environment can have a positive impact on health and well-being. It is important to protect the environment and ensure that it is kept free of noise pollution.

FARM Extension Services

The Michigan Agricultural Extension Service and the Farm Bureau Supply Store are working together to provide farming resources to the local community. They offer a wide range of products, including seeds, fertilizer, and tools.

Cliff Dwelling

A cliff dwelling has been discovered in the woods near the village of Wilnold. It is a fascinating sight, and it is believed to be the home of an ancient tribe.

Shenhao's Language

The Chinese language is one of the most difficult languages to learn. It is a monosyllabic language and has only 414 characters. However, the Chinese people are hardworking and dedicated to learning the language.

American Farm Bureau

Washington Program

The American Farm Bureau has several programs designed to help farmers in Michigan. One of these programs is the Washington program, which provides resources and support for farmers in the nation's capital.

Long Distance Rate Cut Again

The state government has lowered the long distance rates again. This is a great benefit for the farmers, who rely on long distance telephone calls to keep in touch with their families and friends.

Expect Poor Results From Imported Seeds

There is concern about the impact of imported seeds on the local economy. It is important to support local farmers and ensure that they are able to compete with imported seeds.

Inventor Roller Shade

A local inventor has developed a new roller shade. It is a simple but effective device that can be used to keep out the sun and provide shade for the farm buildings.

Hedgerows and Fences

Hedgerows and fences are important for the health of the land and the safety of the animals. They also provide shelter for wildlife and help to maintain soil quality.

Rural Electric Cooperative

A rural electric cooperative has been established in the area. It is a nonprofit organization that provides electricity to rural areas.

Over a long term of years, poultrymen throughout the Nation have purchased PILOT BRAND Oyster Shell, because of its proven excellence in purity and ability to increase egg production.

PILOT OYSTER SHELL

A SANITARY CONCRETE MILK HOUSE

PILOTS FOR YOUR VEGETABLES

MICHIGAN FRUIT FUTURE SEEN IN FOREIGN MARKETS

From Walla Walla: Trade Lost by Wheat, Montage Interests

Mishawaka is developing a new vegetable-farm industry, views with keen interest the overseas trade in its products, even though this state does not produce fruit or vegetables. The industry is being promoted as an option for its marketable products, which are currently marketed through the growing and selling of vegetables.

In order that chicks may be raised to a point where the bird can be sold for more than the cost of raising the bird, the feed costs must be kept low. Artificial rearing has been made possible through the use of Manure for the Corn Products, Inc., New York, which has resulted in the production of more chicks than ever before.

A concrete milk house costs surprisingly little to build, and can be used by youth groups for their educational purposes. A concrete milk house is also recommended for use by schools to improve the health and nutrition of children.

PILOT BRAND Oyster Shell and Blue Spruce have proven their value in a concrete milk house.

Wool Marketing Ass'n Annual Meeting March 4

Future Policies of Wool Pacts To Be Decided

By FRANK M. PIERCE

The wool producing season rapidly approaches, and with it comes the need for continued attention to wool prices. The situation will be reviewed at the Future Policies of Wool Pacts meeting to be held on March 4 at the Hotel Statler, New York City.

One of the important events in the wool marketing field is the conference of the Eastern Regional Office of the National Wool Growers Association, which will be held on March 4 at the Hotel Statler, New York City.

The conference will bring together wool growers from all parts of the country to discuss the problems facing the wool industry and to develop plans for the future.

At the conference, wool growers will have the opportunity to hear from the representatives of the National Wool Growers Association, who will discuss the latest developments in the wool market and the steps that are being taken to improve the industry.

The conference will be held at the Hotel Statler, New York City, and is open to all wool growers.

The Future Policies of Wool Pacts meeting will be held on March 4 at the hotel.

The meeting is open to all wool growers and will provide an excellent opportunity to discuss the future of the wool industry.

The meeting will be held at the Hotel Statler, New York City, and is open to all wool growers.

SOIL CONSERVATION THEME OF FARM WEEK PROGRAM

Called a Genuine Effort to Rebuild Productivity of the Land

The Michigan State Farm Bureau and the Farm Bureau Foundation of Michigan have announced a soil conservation project program at Michigan State University, and the Michigan Farm Bureau Federation is sponsoring farm week in its various counties.

The plan of the Michigan State University Agricultural Experiment Station soil conservation project is a 10-year program to experiment with new agricultural methods. The project consists of 20 experimental farms, each 80 acres in size, and 20 farms of 1,000 acres each. The farms will be located in different parts of the state in an effort to determine the best soil conservation methods for each area.

The project will be supervised by a soils conservation committee, which will meet regularly to discuss the progress of the work. The committee will be composed of representatives from the state university, the Farm Bureau, and other interested groups.

The project will provide an opportunity for farmers to learn about the latest soil conservation practices and to compare the results of different methods. It will also provide a source of information for other farmers and for government officials.

Distinguished Service to Agriculture

W. H. B. GHODIN

"Michigan—where more than a million acres are farmed—has a soil conservation program and it is working. Farm and home owners can benefit from it. And, now that the soil conservation project is being done, the state farm bureau and its affiliated organizations can do something about it."

Around the main theme a well-rounded program is being planned throughout the state. In this way the project will be well-rounded. In other years the dairy herd, all through the year, has been a part of the program. This year the program will include a special focus on the dairy herd.

The 22nd annual Farmers Week program is being planned by the Farm Bureau Foundation of Michigan. The program will include a series of talks on the subject of the dairy herd, as well as a series of talks on other subjects that are important to farmers. The program will be broadcast over the radio and also be available in written form.

The program will be broadcast over the radio and also be available in written form.

MEATS IN STORAGE

Practically no beef or lamb is placed in cold storage; it is placed in "cold storage" to maintain its freshness for shipment to other parts of the country.

The main reason why fresh meats are placed in "cold storage" is that it is not profitable. Just as soon as beef and lamb are frozen, they lose their retail value, and the food manufacturers do not have to pay for them.

We present herewith the experience of the first 17 rural electrification cooperatives in building lines with the aid of T.V.A.

T.V.A. is the Tennessee Valley Authority, power made at Muscle Shoals Dam, Alabama.

The cost of building and operating a farm power line includes the cost of the powerhouse; also, necessary charges for retail rate for the first 100 kilowatt hours of current.

The table above illustrates the percentage of the meat that is stored in cold storage.
