BEHIND THE WHEEL
with J. F. Vossler, Organization Editor

Activities of Farm-co-operators Shown at State College

A display of products planned or manufactured by tens of thousands of Michigan farmers was the main feature of the annual meeting of the Michigan Farm Bureau, held at the State Teachers College, East Lansing, Feb. 4-6. 

Michigan's cooperative organization, with its many members of various sizes and types, is a large concern, with hundreds of members and thousands of active farmers. 

Migrant's cooperative organization, too, is large and active, with thousands of farmers involved in many different types of business, from milk marketing to meat packing.

The State Teachers College, East Lansing, recently was visited by Dr. Harry A. Lansing, noted philosopher, psychologist, and former president of the University of Michigan, and was given a tour of the college by Mr. Cooper, who is the head of the department of educational research and extension. 

The tour of the campus included a visit to the science building, the university library, the medical school, and other educational facilities. 

The highlight of the tour was a visit to the university's dairy farm, where Dr. Lansing was given a detailed tour of the facilities and operations. 

The tour concluded with a visit to the university's farm store, where Dr. Lansing was given a tour of the store's facilities and operations.

The visit was an excellent opportunity for Dr. Lansing to see the university's research and extension programs in action, and to learn more about the university's role in improving the quality of life for Michigan farmers and their families.
Meetings will some day appreciate the story told on the men of Harvard: county wide meetings do face this difficulty. Smart are the program and come we.

... except under direction. But we do know what such extra ed Henry Hendrickson to speak for the Farm Bureau, and R. G. Waite of came, one hundred of them ... to enjoy a fine setting for a meeting and ... after. It ha le s ar flung responsibilities and fewer responsibilities then such a man as this I think it is only right that we should have one more.

A tree is like a farmer, Clem, deep rooted to the land and proudly steadfast in its place, determined in its stand. And this one's been standing here as long as I been 'round.

Was all the shade one pa ure had,—or shelter from a rain, and in need it was. A few days easy, a few days hard, and one piece at a time. And a tree can stand more than a man.

The group of 25 Farm Bureau families that met at the home of Mr. and Mrs. Floyd Huff. The group included members of the Marion FFA Chapter and leaders from the St. Joseph County FFA Chapter. The meeting was held in the home of Mr. and Mrs. Floyd Huff. The group included members of the Marion FFA Chapter and leaders from the St. Joseph County FFA Chapter.

MICHIGAN FARM BUREAU

Mc Cormick President Saginaw Farm Bureau Surface Three hundred Saginaw County Farm Bureau members and their families attended the annual meeting Feb. 18 at the Farm Bureau building here. Many members of the Michigan Executive Council attended the meeting. Clarence Z. Field, State Farm Bureau president, was on hand. Carl Minster, president of the Northern Lower Peninsula Farm Bureau, traveled down to represent the northern members of the state Farm Bureau. Mrs. Marion Jackson, State Farm Bureau executive secretary, and her assistants, were also in attendance.

Junior Aid Red Cross Evelyn E. and Leo K. Heiden of the Junior Women's Institute of Grand Traverse County Junior Farm Bureau collected clothing, food and money for the Red Cross to be sent to our GIs in Vietnam.

For Reliable Year in and Year out Profits
YOU CAN'T BEAT SUGAR BEETS

What Other Crop Has Such Definite Advantages?

When you get down to brass tacks here is what you find:

What's the best money crop the farmer can produce?

SUGAR BEETS!

What major cultivated crop has made farmers the most money during the last 5 years?

SUGAR BEETS!

What crop helps most to destroy weeds and pests?

SUGAR BEETS!

What fits into a well balanced rotation program?

SUGAR BEETS!

What is the toughest—can better stand all kinds of bad weather?

SUGAR BEETS!

Why?

SUGAR BEETS are the only crop that

- Has a high profit return on so little to do.

- Is grown under good conditions all over the state.

- Has a definite demand that gets higher each year.

- Pays the highest money return on the dollar's worth you put into it.

- Is the only crop that earns from 1 to 10% on your investment.

- Is a food crop that is a necessity of life.

- Is a crop that will give you cash immediately.

- Is a crop that uses up weeds.

- Has the most research and educational help from Farm and Food agencies.

You can't go wrong with SUGAR BEETS. They are the only crop that has definite advantages.

Valued most when needed most

Telephone Service has become so efficient, so easily used that it draws no particular attention to itself. But its value is substantially emphasized when ever a home is threatened by one of the three great domestic enemies—fire, flood and disease.

Call the police! No home is safe from the low grade prowler, intent on theft or violence. But the telephone is his enemy; its mere presence in the house makes it difficult for him to approach your dwelling without giving an alarm. It gives you protection, and hastens the welcome arrival of the police.

Call the doctor! Amid the panic caused by sudden illness, the telephone can shorten waiting—a dread period which the telephone can prevent. Get the doctor! Amid the panic caused by sudden illness, the telephone can shorten waiting—a dread period which the telephone can prevent.

Coldarea Cooperative Creamery

C. A. Brody, Confectioner, Marshfield, has been general manager of the Illinois Cooperative Creameries, Inc. at 100 S. Dearborn St., Chicago, 5, Ill., since the organization was chartered in 1918. Mr. Brody is a native of Michigan and has been associated with creamery interests for many years. He served as secretary-treasurer of the creamery association for ten years, and has been active in the cooperative movement.

Milk Minerals Plus...

Milk minerals plus the best known source of Vitamin D* and the highest quality protein known, with an abundance of lactose obtained in the lactose content. Lots of protein. Minerals plus the best known source of Vitamin D and a high production of profit—offering a wide range of high production and profit-making feeds.

NOPOXX “Profit-Production” turns losses into profits

1. NOPOXX is included at “Production” levels in Farm Bureau Masks.

2. Years of successful use have thoroughly justified your Feed Committee’s original approval of NOPOXX in Farm Bureau Masks. Tested by time, NOPOXX now has the hearty endorsement of thousands of Farm Bureau members as well.

3. NOPOXX is available in convenience-sized, sealed packages at your own local Farm Bureau store.
Detroit Edison Co.

The Detroit Edison Company will be making a thorough study of the entire city of Detroit and including the following city suburbs: Commerce Village, Livonia, Farmington Hills, Dearborn, and Ypsilanti and will make a complete map of all land under cultivation within and outside of the above-mentioned areas. This map will be made available to any farmer who requests it.

Electric Rates

The residential service is based upon a monthly rate of 8 cents per kilowatt hour for the first 100 kilowatt hours of electricity used each month. This rate applies to all customers, regardless of location in the city or suburbs.

Michigan Farmers' Extension Plan

The Michigan Public Service Commission has approved a plan for the extension of electric service to rural areas of the state. Under this plan, the Edison Company will construct rural lines without cash contribution by the customers. The electric company will provide the necessary funds for constructing the lines from its own resources. The customers will be required to pay a monthly minimum guarantee of $1.00 per customer, regardless of usage. The minimum guarantee is designed to ensure a steady flow of revenue to the company to cover the cost of operation and maintenance of the rural service.

Cable Machines

The Edison Company is also planning to extend cable service to rural areas. This service will be available to any customer who requests it. The monthly charge for cable service is 50 cents.

michigan farm news

michigan looks good when one travels around

lack of trees the desert and westwind make their impression

it has been some time since we have turned our attention to the subject of planting red clover. our readers have, i hope, been in the habit of planting red clover this fall and have been watching its progress with interest. red clover is a hardy plant which can withstand extremes of climate and soil conditions. it is an excellent cover crop for the fall and winter months.

for planting red clover, it is best to plant it in the fall, before the first frost. this allows the plant to grow and develop its roots before the winter sets in. red clover will also help to improve the quality of the soil, as it is a good source of nitrogen. it is also an excellent source of food for wildlife and will attract many beneficial insects.

we hope that our readers will take the opportunity to plant red clover this fall, and enjoy the benefits it brings to their farms.

BE SURE WITH FARM BUREAU SEEDS

PRICE AND SCARCITY OF JUNE CLOVER MAKES OUR MICHIGAN VARIEGATED ALFAFRA THE BUY

Michigan Variegated is from fields of Hardigan, Grimm, etc. It's a great hay producer

Buy Cert. Hardigan & Grimm early. Stocks limited. Eligible for certified seed production

Farm Bureau Fertilizers

The most profitable item in crop production this year will be fertilizer. Crop prices are strongly up, but fertilizer costs very little more.

WE HAVE RECOMMENDED fertilizers for every Michigan crop and soil condition. Our plant food materials and analysis follow the recommendations of the agricultural colleges.

IF IN DOUBT about the proper analysis for your conditions, use Michigan State College Fertilizer Recommendations for 1937. Your county agricultural agent and co-op association manager will have a copy.

Extra Values
- Nitrogen is 95% water soluble. Available immediately.
- Superphosphates are kiln dried for certain perfect draining.
- All plant food sources are materials recommended by our agricultural colleges.

Farm Bureau Seed Guarantee

The Farm Bureau Services, Inc., of Lansing, guarantees to the farmer to the full purchase price of its seed the vitality, description, origin and purity to be as described on the analysis tag on sealed Farm Bureau bag.

Cert. Wolverine oats, light soils; Worthy for heavy soils.
Barley: Spartan & Wis. No. 38

MERMAHSH for Laying Hens

Up to 70 EGGS PER DAY per 100 hens throughout the winter is reported for hens on Mer mash.

COLD WEATHER, lack of sunshine lowers vitality and egg production. Mer mash has what it takes for peak production.

SEE THE FORMULA ABOVE for the superior ingredients that make Mer mash the profit making ration.

Mer mash Raises Such Good Chicks

Mer mash 16% protein is a starting, growing and laying dry mash. A life time mash to be fed from the first feed the baby chick receives and continuing as the egg laying mash for the producing hen. No supplement is needed. You can buy Mer mash at 300 farmers' co-op barns and from Farm Bureau dealers.

Mer mash feeders expect fast growing, healthy chicks and a minimum of chick losses.

They expect heavy breeders and well developed pullets. They expect hens that are steady producers and laying when eggs are sold for most. Since we have so many veteran customers, it is reasonable to say that they are getting what they want from Mer mash. Start with Mer mash this spring.
