FARM BUREAU INVITES MEMBERS TO ANNUAL MEETINGS

FARM BUREAU ANNUAL MEETING AT STATE COLLEGE, Nov. 11-12

In December, the Michigan Farm Bureau invites its members to attend its annual meeting at State College. This event brings together farmers from across the state to discuss important issues and make decisions that will shape the future of agriculture. The meeting typically includes presentations, discussions, and networking opportunities with fellow farmers and industry leaders.

COMPUTER KEEPS TRACK OF COUNTIES WHERE FARMERS HAVE NOT PREVIOUSLY EXAMINED THEIR LAND

The Michigan Farm Bureau has implemented a computer system to keep track of counties where farmers have not previously examined their land. This system helps the organization identify areas that may be in need of more attention and resources.

President

J. A. JANNEY

J. A. JANNEY is president of the Michigan Farm Bureau, a position he has held since 1992. Under his leadership, the organization has focused on addressing the needs of farmers and promoting agriculture in the state.

FARM BUREAU SERVICES AT LANSING NOV. 10TH: MICHIGAN STATE FARM BUREAU AT COLLEGE NOV. 11 AND 12

Three Days Program of Business and Entertainment

Includes Addresses by Nationality

Auditors' Reports, Annual Dinner

And Other Events

The Michigan State Farm Bureau is preparing to entertain one of its annual meetings, featuring a variety of speakers, entertainment, and networking opportunities. These events are an opportunity for members to connect with each other and learn about the latest developments in the agricultural industry.

The Four Meetings

About 400 voting delegates from 55 county Farm Bureau and 130 associated farmers' elevators, canners and manufacturers are to assemble for the State Farm Bureau meeting at State College, November 11 and 12. Farm Bureau Services, Inc., which publishes the state Farm Bureau magazine, will host the gatherings.

On Friday morning, November 12, the Junior Farm Bureau meeting will open at the State College, while the women's meeting will open at the College in the closing hours of the State Farm Bureau session, and will continue through Friday evening.

At the Farm Bureau Services meeting stockholders will review the financial statement of the corporation and discuss the fiscal policies of the Farm Bureau and associated organizations.

For the first time, the annual meetings of the Michigan State Farm Bureau board of directors, of the Farm Bureau Services, Inc., stockholders, of the State Farm Mutual Insurance Company agents, and the annual meeting of the Junior Farm Bureau directors will come in the same week.

From These Things We Learn

Book in the hands of a distinguished scholar. It was known that writing of a scholar of his standing was often beneficial to those seeking good advice from great men. The work, ‘Meditations’ by Marcus Aurelius, was all that was known about this subject.

The conclusion was that the student could not even begin to use the book in the manner of a scholar, because it was not a guide to scholarship.

The book of the Sphinx, however, contained much more valuable material. It was the work of a wise and learned man, known as a sage. Written in ancient Greek, it was a treatise on the nature of the universe, the mind, and the soul.

The text was written in classical Greek, a language not spoken or understood by the students. When translated, it became known as the ‘Sphinx of Greek letters’ for its difficulty.

In addition to its intellectual value, the book was also a source of inspiration and guidance. It was a source of comfort and hope for those who sought to understand the mysteries of life.

Our Greatest Advant

The greatest achievement in Michigan agriculture is the past two years of the development of rail electrification. Thousands of Michigan farms have been electrified, providing new opportunities for increased productivity. These advancements have brought many changes to the state of Michigan.

In the past, Michigan had been a leader in agriculture. However, with the introduction of rail electrification, the state has found itself at the forefront of technological innovation.

The future of Michigan agriculture looks bright. With the continued development of rail electrification, the state is poised to be a leader in the future of agriculture.

Editor and Business Manager

Railroad News, November 6, 1937, Vol. X, No. 11

Comment

It is pleasant to have the opportunity to discuss the latest developments in the rail industry. The industry is undergoing significant changes, and there are many exciting new technologies on the horizon.

One of the most promising areas of development is in rail electrification. The use of electricity in rail transportation offers many benefits, including reduced emissions and increased efficiency.

Another area of interest is the continued development of rail freight. The rail industry is a critical part of the economy, providing goods and services to many different industries.

In conclusion, the rail industry is an important part of our economy, and its continued development is essential to our future.

Letter from Horatio Earle

Dear Mr. H. E. Wally,

I was reading your article about the rail electrification in Michigan and was impressed by the changes that have taken place. The electrification of the rail system has brought many benefits to the state.

The letter from Horatio Earle is a reminder of the importance of rail electrification and the impact it has had on the state. It is a testament to the progress that has been made.

Prophet

Always looking ahead, the Prophet of State Farm Bureau reminded us of the importance of rail electrification. The Prophet emphasized the need for continued development and improvement of the rail system.

The Prophet’s message is a reminder of the importance of rail electrification and the need for continued progress.

What makes this make sense?

Westward was this year’s annual conference, attended by thousands of rail enthusiasts. The conference was held in cooperation with the American Railway Association and the American Association of Railroaders.

The conference was a success, with many highlights of interest to attendees. It was a time to celebrate the history and future of railroading.

We at the American Railway Association are committed to the continued progress of railroading. We are dedicated to providing resources and opportunities for railroaders to learn and grow.

Dairy Profits
with good feeding

Planned Use of Home Grown Feeds, Roughage & Supplements Will Do It

By ROBERT H. ADVO
Feed Specialist, Farm Bureau Services

Dairy profits are much more probable this winter than for many a year. Consequently, if you are planning to feed hay, silage, oats, barley and peas this fall, you will do well to see that the available feed is in such a manner that the best changes may be necessary.

Here's a program that can be modified to most unusual conditions, and should help make cattle

Roughage Supply

Figures your roughage supply of hay, silage, oats, barley, peas, and wheat can be used to determine if you have enough available.

You should have at least the following quantity of roughage available:

- Early corn silage: 60 tons
- Late corn silage: 40 tons
- Oats: 40 tons
- Barley: 25 tons
- Peas: 10 tons

This is a general guide and should be modified to suit your specific needs.

Protein Supplements

Plan and secure your protein supplements in amounts necessary to balance your roughage supply.

SPECIAL FEED SERVICES: If you will state the kind and amount of feed you have available, we will gladly give five plans that will balance your feeds.

JURIES ARE GENTLE WITH OTHER PEOPLE'S MONEY

For more than 100 years, the jury system has been a cornerstone of American democracy, providing a means for impartial decision-making in the judicial process. Over time, however, the system has faced challenges that have threatened its integrity and effectiveness.

The jury is an important part of the American legal system, representing the citizenry in the decision-making process. It serves as a check on governmental power and ensures that justice is served fairly and impartially.

However, the current system faces several challenges. Jury nullification, where juries reject the law as applied to the defendant or the case, has become a concern. Juries are also sometimes influenced by outside factors, such as media coverage or public opinion.

Furthermore, the cost of jury trials can be high, leading to delays and inefficiencies in the legal system.

In response to these challenges, there have been various proposals to reform the jury system. These include changes to the qualifications and selection process for jurors, as well as the use of alternative dispute resolution methods.

Despite these challenges, the jury system remains a fundamental and essential part of our legal system, ensuring the protection of individual rights and the integrity of the judicial process.

Made in 1, 2 or 3 & 4 Plow Sizes

The CO-OP TRACTOR

- STANDARD EQUIPMENT
  - SELF-STARTER
  - ELECTRIC HEADLIGHTS
  - BATTERY & GENERATOR IGNITION
  - FULL & HAND BRAKES
  - REAR VERS.
  - TRUCK-TYPE STEERING GEARS

- FINANCE PLAN
  We believe we have the best finance plan for business ever offered to farmers. Co-operative service all the way through. Many other advantages. Ask your Farm Bureau dealer.

CO-OP MANURE SPREADER

LOADS EASY
Top of box 26 in. from ground, 60 lb. capacity. Sels for 6, 12, 18, 24 loads per acre. Max 24" read. clearance. Will turn short.

LIGHT DRAFT
Weight 1,000 lbs. or 110 to 200 less than usual. Wide tread wheels, self-aligning, closed bearings with all bushings.

BUILT RIGHT
Sturdy angle frame, heavy steel axles, carbonite levers, spooling teeth, Brades, bearing, pulley,?vane, nes in wide, even blanket of fertility.

Dairyman Reports
MILKMAKER WORTH

$3 to $4 MORE
Per Ton Than Other Feeds
Made in 6, 12, 24 and 34 lb. Protena

Charlie Turner, manager of the Rockford Co-op Co. in Kent county, quotes one of his best dairymen as saying that Milkmaker is worth $3 to $4 per ton more to him than any other commercial dairy feed he has used.

7 of the 10 High Herds
Among 1,200 herds in Michigan now testing milk, seven herds fed Milkmaker. This has happened twice in recent years. Our leading herds averaged more than 800 lbs. of butterfat. The seven Milkmaker herds get ordinary good farm care. Their business is to make money for their owners.

Increases Production
Milkmaker dairy feeds are barn tested combinations of selected feeds that do well with home grown grains and roughages. Make home grown grains go farther. Build up milk production. Buy Milkmaker at Farm Bureau stores and co-op in use.
