FARM BUREAU LEADERS GENERALLY FAVORABLE TO 1938 FARM ACT AT MID-WEST CONFERENCE AT CHICAGO

Dairy States, Including Michigan, Wonder About Effect on Feed Prices; Principles of Act Explained in This Article

By R. WAYNE NEWTON

Lansing, Mich. — Michigan Farm Bureau leaders here are generally favorable to the 1938 Farm Act, which was signed by President Roosevelt earlier this week. The Act contains four dairy states, including Michigan, expressed misgivings as to the effect of the act on feed prices. There was also indication that corn growing areas may oppose the imposition of a 15 cent marketing quota, because wheat fed to livestock and poultry is not subject to quotas and many compete with corn.

There also was strong sentiment to the effect that genuine price protection is necessary if domestic prices are to be brought to a higher level.

President O'Neil stated that the Farm Bureau would stand firm on full tariff protection, up to the point necessary to maintain parity.

The Farm Act

The act contains four dairy states, including Michigan, expressing misgivings as to the effect of the act on feed prices. There were also a few objections to the imposition of a 15 cent marketing quota, because wheat fed to livestock and poultry is not subject to quotas and many compete with corn.

The sentiment to the effect that genuine price protection is necessary if domestic prices are to be brought to a higher level. President O'Neil stated that the Farm Bureau would stand firm on full tariff protection, up to the point necessary to maintain parity.

LIVE STOCK EXCHANGE IS 10 YEARS OLD

His Largest Annual Meeting In 25 Years

FEBRUARY 27

Davidson, Pete, and other men from the Chicago Board of Trade, held a meeting of the Board and decided to form the Livestock Exchange in February of 1920.

The first meeting was held in the 18th Floor of the Chicago Board of Trade Building.

The Livestock Exchange was opened on February 27, 1920.

The first day's trading was quite lively, with a total of 1,200 head of cattle being sold.

The Livestock Exchange quickly became a leading market for live cattle, hogs, and sheep.

The Livestock Exchange has seen many changes over the years, but has maintained its position as a leading market for the livestock industry.

The Livestock Exchange is now located at 212 North LaSalle Street, Chicago.

The Livestock Exchange has experienced many ups and downs over the years, but has continued to grow and expand.

The Livestock Exchange is still a vital part of the livestock industry today.

February meetings and progress
Significance of our Insurance Convention;
Strong Gains Being Made in Membership

By CLARK L. BRODY
Executive Secretary of the Michigan State Farm Bureau

I was fortunate to attend the annual meeting of the State Farm Mutual insurance agents at Chicago, February 28 and 29. Over 2,000 life, fire and insurance agents met in the regular annual sessions to review the year's activities and plan the work for the present year. Our auto insurance company has grown from being the largest in the world. The reports showed that it had enjoyed the most prosperous year in its existence. Simply because more financial resources are needed for the care of all possible contingencies which are beyond the policyholder's control, the company has found it necessary to apply for a number of additional insurance agents by written application, or by applying to the company's representative, or by applying at the company's representative's office. The company's financial condition is of the best.

While this is important the human side of the picture impressed me greatly. As I listened to the agents and officials of the company as they carried on the program I thought about the thousands of farm homes from Florida to Washington and Maryland in the Gulf that enjoy the protection of our great national program. Many a farm enterprise has been saved from being wiped out by our policies. Moreover, they are in connection with auto accidents. Many a widow and her family now have a new lease on life as a result of the life insurance brought to them by the company.

FARM BUREAU'S PART

In the program the Farm Bureau's part was not overlooked. In a majority of the states the Farm Bureau has been organized for the past seven years in the West and Midwest. The West and Midwest have always been the leader in the farm tradition of the states. In the farm tradition of the states the Farm Bureau's part has been effective for 75% of the farmers have been able to save their farms and the farmers have been able to save their farms. This has been the result of the farm bureau's activities.

In our own insurance program of the Michigan State Farm Bureau we have been able to provide adequate protection for a greater percentage of the farmers who have been unable to provide adequate protection for the farmers. In addition, the Farm Bureau has been able to save the farms of the farmers who have been unable to save their farms. This is due to the work of the Farm Bureau and the farmers who have been able to save their farms.

Another encouraging aspect of the coming year is the development of efficient trucking. The current trend of efficient trucking has been increasing steadily over the past ten years, and is expected to continue for some time to come.
**Farm Bureau HARNESS**

- **IONIA COUNTY**
  - The annual meeting of the Ionia County Farm Bureau was held on February 8. The meeting was well attended and the officers of the county were elected for the new term. The new officers included: President, William J. Brown; Vice President, John A. Johnson; Secretary, Harry B. Johnson; Treasurer, Charles H. Krueger.

**Farm Bill Aims to Make Farming a Better Business**

The Farm Bill proposes several key provisions aimed at improving the economic conditions of farmers and making farming a more profitable venture. These include increased support for agricultural research and development, improvements to the marketing of farm products, and measures to support the stability of farm income. The bill also seeks to provide greater assistance to farmers facing economic challenges and to improve the management of natural resources on farm lands.

**BEEF GROWERS MUST ACT TO HOLD ACREAGE**

- All sugar-producing areas are divided into sugar-producing and non-sugar-producing counties. The counties are further divided into sugar producing and non-sugar producing districts. The districts are further divided into sugar producing and non-sugar producing blocs.

**WHY RISK A LOSS?**

- The cost of raising all types of crops is higher than the cost of raising sugar beets. Sugar beets can provide a steady income for farmers and help to stabilize the farm economy.

WE RECOMMEND-

MERMAsh raises such good Chicks

MERMASH 10% PROTEIN is a starting, growing and laying dry mash. A lifetime mash, to be fed from the first feed the baby chick receives. Contains for the pullets and breeders. It is the best laying mash for the producing hen. Feed according to directions.

BETTER PULLETS!

MERMAsh raises healthy chicks, healthy hens and a minimum of chick losses. They expect heavy breeders and well developed pullets. They expect both the supplying producers and the laying egg counts for next.

SINCE WE HAVE so many veteran customers, it is reasonable to say that they are getting what they want. You can buy MERMASH from 300 farmers’ co-op associations and Farm Bureau dealers. Start with MERMASH this year.
