The Whys and Wherefores of the Junior Farm Bureau

Questions and Answers for Oct. Community Meetings

BY BENJAMIN F. BERNSTIK

Director of the Junior Farm Bureau

We hope and give to follow agriculture as a way of life. Many of the junior farmers have come to appreciate the value of this practice. Among the junior farmers, there are quite a few who believe in the value of this practice.

The main point to remember is that agriculture is a valuable and important part of our lives. The Junior Farm Bureau helps to promote the value of agriculture and the importance of the junior farmers. The Junior Farm Bureau helps to foster the value of agriculture and the importance of the junior farmers.

The Junior Farm Bureau helps to promote agriculture as a way of life. It helps to foster the value of agriculture and the importance of the junior farmers. It helps to promote agriculture as a valuable and important part of our lives.

The Junior Farm Bureau helps to promote agriculture as a valuable and important part of our lives. It helps to foster the value of agriculture and the importance of the junior farmers.

The Junior Farm Bureau helps to promote agriculture as a valuable and important part of our lives. It helps to foster the value of agriculture and the importance of the junior farmers.
Looking Ahead

Regularly political parties, religious, scientific, fraternal and many other types of organizations find it advisable to bring representatives of their memberships together to bring about an urge to study new courses.

Twelve years ago, a group of farmers in the Michigan State Farm Bureau will find the statement of organization principles adopted by 91 County Farm Bureau leaders of Lower Michigan $400,000 a year. A new policy manual is published on page 4 of this edition. It is a study and a set of recommendations for the Farm Bureau from the membership and organization viewpoint. It aims to present a clear picture of what the areas that the organization must do to realize its full possibilities.

Later this month delegates to the State Farm Bureau annual meeting and interested Farm Bureau members will meet in four pre-convention meetings to inform themselves on the latest developments in farm and other legislation. Recommendations will be made.

Moving its State and 11th, the Michigan State Farm Bureau and affiliated organizations will bring delegates together from their local organizations. Out of the present need of the way of life. The recommendations of policy from all interested parties, there will be worked out through the method of audit and debate an organization, business and legislative progress for 1939.

The Farm Bureau is an organization that operates on democratic principles. Its strength, its authority, and its control is made up of those people who are interested in members' organizations. They strive to be at the forefront of one activity of the Senior Farm Bureau. This move may well be made as from the top of the organization and interested Farm Bureau members

LOOKING IN ON THE FARM PROGRAM BATTLE

Farm Editor Gregory Decker

In Main Use of Policy of Scarcity

Farm Bureau's 1939 plan is to maintain the balance between supply and demand. Under its program, manufacturers of farm products are to hold the line on prices.

Whys and Wherefore of Farm Policies

Farmers have been urged to save and plan for the present crop season. Others are asking for government help. The answer is not easy.

Farm Bureau's program includes the following:

1. To save and plan for this crop season.
2. To provide a suitable price for farmers for the present crop season.
3. To provide a suitable price for farmers for the next crop season.
4. To provide a suitable price for farmers for the next crop season.
5. To provide a suitable price for farmers for the next crop season.
6. To provide a suitable price for farmers for the next crop season.
7. To provide a suitable price for farmers for the next crop season.
8. To provide a suitable price for farmers for the next crop season.
9. To provide a suitable price for farmers for the next crop season.
10. To provide a suitable price for farmers for the next crop season.

Farmers must be able to save and plan for this crop season.

Behind the Wheel

The Fruit Room

Tour to New Orleans

Whether or not the Michigan State Farm Bureau is to become a part of the southeastern part of the United States as a branch of the national Farm Bureau, is to be decided at the State Farm Bureau annual meeting in December. December 15. on which farm bureau is to be decided. The meeting will be held in the city of New Orleans, Louisiana. The meeting will be held in the city of New Orleans, Louisiana. The meeting will be held in the city of New Orleans, Louisiana. The meeting will be held in the city of New Orleans, Louisiana.

The Telephone Helps Sell Farm Products

The Telephone Helps Sell Farm Products

You are in the business of selling the products of your farm. Fruit, vegetables, grain, poultry, livestock, dairy products ... these are your "stock in trade."

Your customers are produce dealers, merchants, stock buyers, housewives. Telephone service makes it doubly easy for them to reach you conveniently and quickly. Many farmers have found that the telephone more than earns its way through the increased sales opportunities it provides.

The next time you are in town, drop into the telephone office and talk over telephone service with us. We shall be glad to explain the social and business advantages it provides.

"Telephone service is an investment — not an expense."

County Farm Bureau Leaders at Lansing adopt strong set of membership principles

"We must not neglect the strengthening of the County Farm Bureaus. From the County Farm Bureau comes our strength. We must remember that it is not possible for all the members of a State Farm Bureau to take part in both, but it is possible to get all the members of a County Farm Bureau together for complete discussion of matters in which they are interested, and to work out a solution to problems that can be presented to the State Farm Bureau, and to so many as 2,000 members of a County Farm Bureau in such meetings."

Following is a statement of the principles of Farm Bureau organization adopted by Michigan County Farm Bureau leaders in going into their fall and winter programs of work and membership acquisition. Each of these principles was drawn by a committee of county leaders. Their recommendations were passed upon and finally adopted in form acceptable to the entire meeting.

1. We must not neglect the strengthening of the County Farm Bureaus. From the County Farm Bureau comes our strength. We must remember that it is not possible for all the members of a State Farm Bureau to take part in both, but it is possible to get all the members of a County Farm Bureau together for complete discussion of matters in which they are interested, and to work out a solution to problems that can be presented to the State Farm Bureau, and to so many as 2,000 members of a County Farm Bureau in such meetings.

"If we can get grounded in the belief that County Farm Bureaus must be strengthened, and responsibilities assumed by all of the members, we can accomplish the purposes of our organization."

"If we can get grounded in the belief that County Farm Bureaus must be strengthened, and responsibilities assumed by all of the members, we can accomplish the purposes of our organization."

FINANCE

We believe that the advantage lies in the strengthening of the County Farm Bureaus. From the County Farm Bureau comes our strength. We must remember that it is not possible for all the members of a State Farm Bureau to take part in both, but it is possible to get all the members of a County Farm Bureau together for complete discussion of matters in which they are interested, and to work out a solution to problems that can be presented to the State Farm Bureau, and to so many as 2,000 members of a County Farm Bureau in such meetings.

PLOWING & CLEAN-UP REDUCES INSECTS

Plowing Finishes Curvature & Grade: Clean-Up Gets

Orchard Roots

Fall plowing of orchards and fall cultivation of fields planted to row-crop vegetables crops growing will put you directly into spring harvesting. Damage from post-pupation, egg laid for Hessian, Miotic, Hawk, and other harmful insects. 

Insecticidal dustings which protect all fruit crops, including the apple maggot and the codling moth. For proper disposal, close and deep, situations of orchard rows and east-west orientation of picking benches and equipment are required by Hessian, Miotic, Hawk, and other harmful insects. 

By limiting tillage, planting the variety in spring and maintaining a water detention area of two feet or more, when these areas are not available, use of emulsions of oil may be used to control the growth of weeds. 

Spraying with oil, water in a sprayer, is required in most areas. 

Insects that require spraying in the fall, should wash the bottoms of gravel pans against the potential danger to the land from water courses during winter. 

This is especially true in clay soil or where plowing can be done in the fall. 

ECTED HY SPRING PLOWING IF IT MUST DURING THE FALL, OBVIOUSLY, SHOULD BE POSTPONED UNTIL SPRINGTIME.

The disease, which is caused by a fungus, is more prevalent in orchards that are cropped with a mixture of apples and pears. 

In the spring, the disease is carried by wind and rain. 

The disease can be controlled by the use of fungicides. 

The disease can be prevented by the use of fungicides. 

The disease can be prevented by the use of fungicides.

Our cleaning service ends December 31.

Elev. Exch. Forsee's More Gov't on Action at Farm Prices

Endorses New Bean Grading Inspection at 18th Annual Meeting

"We shall not be surprised at seeing the administration now add to the level of farm prices. Fixed retail prices in the West, as has been mentioned, are not as bad. 

We do not wish to make the grade, but must be prepared to "grow" the price of the bean. 

The question now is, whether we can do it. 

For a number of years, the Elevator association has been working for a better price for the bean, and this price should be raised. 

The difficulty is to do this. 

However, this difficulty has been overcome, and the price of the bean is now at a level. 

Once we have reached this level, we shall be able to hold the price. 

It is the duty of the Elevator association to see that the price is held, not only because it is the right thing to do, but also because it is necessary to maintain the price. 

The question now is, whether we can do it. 

For a number of years, the Elevator association has been working for a better price for the bean, and this price should be raised. 

The difficulty is to do this. 

However, this difficulty has been overcome, and the price of the bean is now at a level. 

Once we have reached this level, we shall be able to hold the price. 

It is the duty of the Elevator association to see that the price is held, not only because it is the right thing to do, but also because it is necessary to maintain the price.

FARMERS, MEMBERS, and friends of the Elevator association are invited to investigate the marketing, grading, cooperatives and other matters of the Elevator association which are the results of the work of the association. 

Our cleaning service ends December 31.
