LET'S GO TO THE WORLD'S FAIR AT NEW YORK
Farm Bureau and Michigan Farmer Plan June and August Trips.

"Let's all go to the World's Fair," Farm Bureau leaders have told farmers in homes in Michigan this month. And they have determined to make sure that as many of them as possible will be represented in June and August at the fair. The trip will be under the sponsorship of the State organization and the Grand Traverse Farm Bureau Discussion Group.

The trip will start from Detroit on June 15th and return on the 23rd. A group of Michigan farmers will be accompanied by I. W. Vagner, director of family life of the National Farm Bureau Federation, and W. E. Atkins, M.D., of Kalamazoo.

Schedule for Five Days

1. Detroit to Chicago, June 15th
2. Chicago to New York, June 16th
3. New York to Philadelphia, June 17th
4. Philadelphia to New York, June 18th
5. New York to Jersey City, June 19th
6. Jersey City to New York, June 20th
7. New York to Rochester, June 21st
8. Rochester to Buffalo, June 22nd
9. Buffalo to New York, June 23rd

If you plan to go it would be a good idea to reserve your place now. The cost of the trip will be approximately $200.00 for each person. This includes round trip transportation, meals, and lodging.

County Farm Bureau Conduct Spring Campaigns

Can Farmers Protect Themselves From Interests Without Opposition?

A large number of Michigan counties are conducting spring campaigns to protect farmers' interests. The goal is to get a membership quota of 50% of all farmers in the county. The campaign is being carried out by the Michigan County Farm Bureau associations. The campaign is expected to bring a large increase in membership. The goal is to have 50% of all farmers in the county join the county Farm Bureau associations.

Michigan Gets Mid-West Farm Bureau Meet

Delegates From Eleven States At State Convention

July 16-20

Michigan Farm Bureau has the honor of hosting the 11th annual Mid-West Farm Bureau convention in Detroit. The convention will be held at the Capitol Hotel and will feature sessions on important topics such as legislation, economics, and politics. The convention is expected to bring a large increase in membership. The goal is to have 50% of all farmers in the county join the county Farm Bureau associations.

Advisers Michigan agricultural production. Mr. and Mrs. Charles E. S. Krueger and family were on hand to welcome the guests. Mr. Krueger is a well-known agricultural economist and has been a leader in the development of agricultural education in Michigan. He is a former member of the State Farm Bureau and has served as a director of the State Farm Bureau for many years.

LEGISLATURE AT STAGE
Where Things Happen

House to Debate on April 4 Bill No. 116 for a Milk Marketing Board; Creamery Tests, Warehouse, School Aid Bills In

By STANLEY M. POWELL

Legislative Counsellor

Daily the legislative situation grows more tense and complicated. In the past few days, there have been a number of private discussions taking place among the members of the legislature. The usual procedure is to meet on a specific topic in order to decide what course of action to take. The topics under discussion have been the order of the day, both at the capitol and at Lansing homes. The bills that have been introduced, and the interest that they have generated, are exercising every possible pressure for or against some of the approximately 800 bills and resolutions now pending in the legislature. The shape in which it was reported by the house committee on agriculture, and the influence of the many groups that have been recommended by the milk marketing boards of the State Association of Supervisors and representatives of various producers organizations, have held many members' interest on the subject since this legislation was introduced early in the session. The situation is being reported daily, and will be up for general consideration by the house committee at the regular session, April 4.

Milk Control Bill Reported

After considering the subject matter for several weeks, the house committee on agriculture reported favorably an amended form of House Bill No. 116, which would provide for the establishment of a state milk marketing board. It would permit the buying of minimum prices to producers in any area, and make possible the establishment of regulations so that all dealers in a certain market would have to buy on the same basis and present "checking" by dealers. In the form in which it was reported by the house committee on agriculture, and the influence of the many groups that have been recommended by the milk marketing boards of the State Association of Supervisors and representatives of various producers organizations, have held many members' interest on the subject since this legislation was introduced early in the session. The situation is being reported daily, and will be up for general consideration by the house committee at the regular session, April 4.
Farm and the Cat

Hiram and the Cat

The Seattle Times, March 1, 1930

Hiram and the Cat

By IRMA COOPER

When you read this story, you'll see that the cat's name is "Hiram," and the cat is a large, black, and very friendly feline. The story takes place in the city of Seattle, Washington, and involves a group of friends who are trying to solve a mystery surrounding a lost treasure. The story is entertaining and filled with unexpected twists and turns.

The Associated Women of the American Farm Bureau Federation

MATTHEW ARMOUR (closed caption)

The world was a time when women were more active in politics and helped to make the world a better place. The Associated Women of the American Farm Bureau Federation was founded in 1940, and by 1946, there were 5,000 chapters across the country. The organization's mission was to promote the interests of women in agriculture and to provide leadership opportunities for women in the field.

Planning to Quit

Ray Coats, manager of the Rapa Milk Producers Association, is quoted as saying that large numbers of dairy cows are being sold every year, and farmers are being encouraged to quit farming. The reason given is that it is uneconomical to continue to farm when the prices are so low. Coats believes that the farmers should sell their cows and go into other occupations.

WOMEN FARMERS WHO STORE PRODUCE WANT HR. BILL 298

The National Women's Farm Organization is urging the passage of the Women's Farm Bill, which would provide a national policy for American agriculture that would help to ensure the health and well-being of all farmers.

FARM BUREAU PORKMEAT

Farm Bureau Porkmeat is a popular brand of pork that is sold in various forms, including bone-in and boneless cuts. It is known for its high quality and delicious flavor.

State Mutual Fire Insurance Co. of Michigan

State Mutual Fire Insurance Co. of Michigan is a well-known insurance company that offers a variety of services, including farm insurance, auto insurance, and home insurance. The company has a long history of providing quality insurance products to customers in Michigan and across the United States.

AGTON A. STONE, Sr.

AGTON A. STONE, Sr.

This is a brief introduction to the history of the Stone family, who have been involved in the agriculture industry for many generations. The family has a long history of farming and has been involved in the business of agriculture for many years.

A PIG’S IDEA OF HEAVEN

One of the ideas of telephone employees is expressed in their slogan: "The Message Must Go Through." Stated otherwise, it means that telephone people recognize that every call you place is important. It may be a rash call to the doctor or veterinarian, or a call for help when fire threatens house or barns. It may be a call to town to find who is paying the best prices for cattle or produce. Or it may be a call to the neighbors a mile up the road to find out about the church social.

Michigan Bell & Telephone Co.

Michigan Bell & Telephone Co. is a well-known telecommunications company that provides a wide range of services, including phone service, internet service, and television service. The company has a long history of serving the needs of Michigan residents and businesses.

HAVE YOU CONSIDERED?

One of the questions being asked is whether to grow sunflowers for the production of oil or for the production of seed. The suggestion is that sunflowers are a good crop to grow because they are tolerant of drought and can be grown in a variety of soils. The oil from sunflower seeds is high in linoleic acid, which is important for human health.

Looking Back from Our 48th Wedding Anniversary

Changes Have Been Great But None Greater Than In The People.

By Mrs. Ethel W. Logan

This is the story of 48 years of togetherness, love and care for each other. It all began at the age of 16 when we were engaged and 17 when we were married. The years have been filled with happiness, joy, and satisfaction, but also with trials and tribulations.

We had no luxuries from the start. We were poor but happy. We built our home from scratch. It was a small, one-room cottage with a dirt floor and a thatched roof. We were young and hardworking, and we built the house ourselves.

We had no electricity or running water. We had to draw water from a well and cook our meals over an open fire. But we were young and full of energy, and we were happy.

As the years went by, we had children, and they brought joy and happiness into our lives. We worked hard to provide for them, and we were proud of our children. They were our pride and joy.

As we grew older, we had more luxuries. We had electricity and running water. We had a car, and we could travel. We had more freedom, and we could do more things.

But even as we grew older, we remained close. We were always there for each other. We were always there to help.

And now, 48 years later, we are still together. We are still happy. We are still in love. We are still each other's best friend.

The Family Doctor

The story of our 48th wedding anniversary is about the love and commitment we have for each other. It is about the happiness we have found in each other. It is about the love we have for each other.

In the summer of 1933, the Watzke family, including my husband and his family, were guests at our home in the country. They were there to celebrate the 40th wedding anniversary of my husband's parents.

On that day, my husband's parents, who were in their 70s, were the center of attention. They were the focus of everyone's attention. They were the ones who were celebrated. They were the ones who were honored.

And so, on that day, we celebrated the love and commitment of my husband's parents. We celebrated their love for each other. We celebrated their commitment to each other.

And so, on that day, we celebrated the love and commitment of my husband's parents. We celebrated their love for each other. We celebrated their commitment to each other.

The Wise Hen

laying hens know when they need oyster shell and just how much they need. The simplest way to use the oyster shell and egg yolks is to put them in a pie and bake them. This makes a great dish that can be eaten by itself or served with other foods.

A Sulfur Fungicide of TRUE Micro-Spray Measurability

MICRO-SPRAY SULFUR

Sulfur is a very effective fungicide and is used to control various diseases in vegetables, fruits, and ornamental plants. It is a broad-spectrum fungicide that can be used on a wide range of crops, including tomatoes, peppers, cucumbers, and strawberries.

MAGNIFICENT ECONOMY

The Micro-Spray applications of sulfur use a very small amount of sulfur, typically in the range of 0.5 to 1.0 pounds per acre. This results in significant savings in both labor and materials, as well as in reduced environmental impact.

THESE ARE THE ADVANTAGES OF MICRO-SPRAY:

1. Micro-Spray sulfur is an economical application method. The cost of sulfur is relatively low, and the labor required to apply it is minimal.

2. Micro-Spray applications are highly efficient. The sulfur is applied to the foliage of the plants in a fine mist, which ensures uniform coverage and reduces the risk of drift.

3. Micro-Spray applications are environmentally friendly. The sulfur is applied in a water-based solution, which reduces the risk of runoff and leaching.

4. Micro-Spray applications are easy to implement. The sulfur is applied using a simple and reliable equipment, such as a knapsack sprayer or a backpack sprayer.

5. Micro-Spray applications are versatile. The sulfur can be applied to a wide range of crops and can be used for a variety of purposes, such as disease control, pest management, and soil amendment.

THESE ARE THE BENEFITS OF MICRO-SPRAY:

1. Micro-Spray sulfur applications are effective in controlling a wide range of diseases, including fungal diseases such as blight, rot, and leaf spot.

2. Micro-Spray sulfur applications are flexible and can be adapted to different growing conditions and crop needs.

3. Micro-Spray sulfur applications are safe for both the environment and the health of the workers.

4. Micro-Spray sulfur applications are cost-effective and can provide significant economic benefits to growers.

5. Micro-Spray sulfur applications are simple and easy to implement, making them accessible to a wide range of growers.

MICRO-SPRAY SULFUR bas set a new standard in some of America's largest and best orchards.

Orchard Brand Micro-Spray Sulfur, used in the pre-bloom sprays, effectively prevents early scab infection. In the cover applications it protects against late scab, without interfering with foliage development or finish or color of fruit, a hazard always associated with the use of lime sulfur.

Micro-Spray Sulfur bas set a new standard in some of America's largest and best orchards.
Questions and Answers for April Community Meetings

By J. F. YERDE
Director of Journalism

"We believe that the present program of national trade agreements which forms the basis for our participation in this group of nations, which includes all nations which have signed or are about to sign the agreement, is not likely to result in the establishment of permanent competitive conditions in any of the participating countries. It is not likely that these agreements will be continued or that they will be renewed. It is not likely that the American farmers will be able to compete effectively with the farmers of any of the participating countries. It is not likely that the United States will be able to maintain or increase its exports to any of the participating countries. It is not likely that the United States will be able to maintain or increase its exports to any of the participating countries. It is not likely that the United States will be able to maintain or increase its exports to any of the participating countries."
**Big Job Before Farmers Is to Learn How to Buy, Sell and Work Co-operatively**

Address by Clark L. Brody before the Annual Meeting of the Indiana Farm Bureau Federation at Indianapolis

**MARCH 7, 1939**

Clark L. Brody is the President of the Indiana Farm Bureau. He was a former reporter and editor for the Indianapolis Star. Brody was a key figure in the development of the Indiana Farm Bureau Federation and played a significant role in co-operative efforts among farmers.

**SPECIAL CO-OP REFRIGERATOR**

**SAVE MONEY • SAVE TIME**

**FARM BUREAU STORES**

**CO-OP ASS'NS**

**44,500**

Farm and town automobile owners in Indiana are learning that a co-operative buying program can save the consumer more than 250,000 dollars a year.

**SMALL FARMS GROW BIG IN PROFITS AND COMFORTS**

**WITH RUNNING WATER**

**Mr. Charlie Miller, Mason, R. P. D., knows the importance of co-operating with his neighbors to get a better price for his produce.**

**Michigan Farm Bureau**

The Michigan Farm Bureau's co-operative buying program is helping farmers increase their profits and improve their living conditions. By working together, farmers can achieve economies of scale and negotiate better prices for their products. Co-operation among farmers is essential for the sustainable development of rural communities and the preservation of agricultural heritage.
PLANT FARM BUREAU'S SAFE SEEDS ....

Farm Bureau guarantees to the Farmers the origin, purity Etc., of Farm Bureau Seeds

CLOVERS

Farm Bureau has plenty of A-1 Michigan grown grass, Alfalfa and Mow ihmacker seed. All pure, high germinating seed, and the very best for Michigan farms.

OATS & BARLEY

We recommend certified Worthy Oats for heavy soils. Great yields. Ripe lodging. Certified. Whole-merine seed is better for lighter soils. We recommend Spartan or Wisconsin No. 6 barley.

ALFALFAS

No. 3 Michigan alfalfa is very scarce because of nature's heavy rains. We have some Michigan 90% alfalfa that holds 81% pure crop seed. A good buy. Also Irish Blues and common. Old reliable.

SEEDS & CORN

We have plenty of certified and un-certified growing corn. Lots of good cooking corn. Michigan hybrid 601 and 606 for Zenas 1 and 2; No. 1518 for Zenas 3; No. 401 and Kings Cove for Zones 4 and 5; Kings Cove and 602 (from grower) for Zones 5 and 6.

Timothy
Field Peas
 Soy Beans
 Buckwheat

Rape
 Vetch
 Sunflower
 Spring Wheat
